AICPA

HEALTH CARE ORGANIZATIONS

***With Conforming Changes as of
May 1, 1997***

This edition of the AICPA Audit and Accounting Guide *Health Care Organizations*, which was originally issued in 1996, has been modified by the AICPA staff to include certain changes necessary because of the issuance of authoritative pronouncements since the Guide was originally issued (see page v). The changes made are identified in a schedule in appendix D of the Guide. The changes do *not* include all those that might be considered necessary if the Guide were subjected to a comprehensive review and revision.

NOTICE TO READERS

This AICPA Audit and Accounting Guide has been prepared by the AICPA Health Care Committee to assist preparers of financial statements in preparing financial statements in conformity with generally accepted accounting principles and to assist auditors in auditing and reporting on such financial statements in accordance with generally accepted auditing standards.

Descriptions of accounting principles and financial reporting practices in Audit and Accounting Guides are approved by the affirmative vote of at least two-thirds of the members of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the AICPA in the areas of financial accounting and reporting. Statement on Auditing Standards (SAS) No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Audit and Accounting Guides that have been cleared by the Financial Accounting Standards Board (for financial statements of entities other than governmental entities) or Governmental Accounting Standards Board (for financial statements of Governmental entities) as sources of established accounting principles in category *b* of the hierarchy of generally accepted accounting principles that it establishes. This Audit and Accounting Guide has been cleared by the Financial Accounting Standards Board and the Governmental Accounting Standards Board. AICPA members should consider the accounting principles described in this Audit and Accounting Guide if the accounting treatment of a transaction or event is not specified by a pronouncement covered by rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatments specified by this Audit and Accounting Guide should be used, or the member should be prepared to justify another treatment, as discussed in paragraph 7 of SAS No. 69.

The AICPA Auditing Standards Board has found the descriptions of auditing standards, procedures, and practices in this Audit and Accounting Guide to be consistent with existing standards covered by rule 202 of the AICPA Code of Professional Conduct. Descriptions of auditing standards, procedures, and practices in Audit and Accounting Guides are not as authoritative as pronouncements of the Auditing Standards Board, but AICPA members should be aware that they may have to justify a departure from such descriptions if the quality of their work is questioned.

The committee and staff also gratefully acknowledge the contributions made to the development, content, and writing of this Audit and Accounting Guide by Maribess L. Miller, former Committee Chair, Larry G. Grinstead, and Robert D. Beard.

In developing this Audit and Accounting Guide, the AICPA Health Care Committee and the Health Care Audit Guide Task Force considered guidance included in the following authoritative pronouncements through May 1, 1997:

- FASB Statements through Statement No. 129, *Disclosure of Information about Capital Structure*
- FASB Interpretations through Interpretation No. 42, *Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power* (an interpretation of FASB Statement No. 116)
- FASB Technical Bulletins (TB) through TB 94-1, *Application of Statement No. 115 to Debt Securities Restructured in a Troubled Debt Restructuring*
- GASB Statements through Statement No. 30, *Risk Financing Omnibus*
- GASB Interpretations through Interpretation No. 4, *Accounting and Financial Reporting for Capitalization Contributions to Public Entity Risk Pools*
- GASB Technical Bulletins (TB) through TB 96-1, *Application of Certain Pension Disclosure Requirements for Employers Pending Implementation of GASB Statement 27*
- AICPA Statements of Position (SOP) through SOP 96-1, *Environmental Remediation Liabilities*
- AICPA Practice Bulletins (PB) through PB 15, *Accounting by the Issuer of Surplus Notes*
- Consensus positions of the FASB's Emerging Issues Task Force reached through January 1997
- AICPA Statements on Auditing Standards (SAS) through SAS No. 82, *Consideration of Fraud in a Financial Statement Audit*

Users of this Guide should consider pronouncements issued subsequent to those listed above to determine their effect on entities covered by this Guide.

Preface

Purpose

This Guide has been prepared to assist providers of health care services in preparing financial statements in conformity with generally accepted accounting principles (GAAP) and to assist independent auditors in auditing and reporting on those financial statements.

Applicability

This Guide applies to health care organizations that are either (a) investor-owned businesses or (b) not-for-profit enterprises that have no ownership interest and are essentially self-sustaining from fees charged for goods and services, as defined in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 4, *Objectives of Financial Reporting by Nonbusiness Organizations*, paragraph 8,¹ or (c) governmental. This Guide applies to organizations whose principal operations consist of providing or agreeing to provide health care services and that derive all or almost all of their revenues from the sale of goods or services; it also applies to organizations whose primary activities are the planning, organization, and oversight of such organizations, such as parent or holding companies of health care providers.

This Guide applies to the following types of health care organizations:

- Clinics, medical group practices, individual practice associations, individual practitioners, emergency care facilities, laboratories, surgery centers, and other ambulatory care organizations
- Continuing care retirement communities (CCRCs)
- Health maintenance organizations (HMOs) and similar prepaid health care plans
- Home health agencies
- Hospitals
- Nursing homes that provide skilled, intermediate, and less intensive levels of health care
- Drug and alcohol rehabilitation centers and other rehabilitation facilities

This Guide also applies to integrated delivery systems that include one or more of the above types of organizations.

This Guide does not apply to voluntary health and welfare organizations, as defined in FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*. These organizations should follow the American Institute of Certified Public Accountants (AICPA) Audit and Accounting Guide *Not-for-Profit Organizations*. Related fund-raising foundations that meet the definition of a *not-for-profit organization* given in FASB Statement No. 117 also should follow the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*.

¹ See paragraph 1.03 of this Guide.

When separate financial statements are issued for a state or local governmental health care organization that uses enterprise fund accounting and reporting, the accounting, reporting, and disclosure requirements set forth in this Guide and by pronouncements of the Governmental Accounting Standards Board (GASB) apply. (See chapter 1 for a discussion of the application of GAAP.)

Limitations

This Guide does not discuss the application of all GAAP and all generally accepted auditing standards (GAAS) that are relevant to the preparation and audit of financial statements of health care organizations. The Guide is directed primarily to those aspects of the preparation and audit of health care organizations' financial statements that are unique to those organizations or areas considered particularly significant to them.

Other Literature

This Guide incorporates certain provisions of FASB Statements No. 116, *Accounting for Contributions Received and Contributions Made*, and No. 117. Not all guidance included in those Statements, however, is incorporated, repeated, or summarized in this Guide. Accordingly, those Statements, and all authoritative guidance,² should be read in conjunction with this Guide.

This Guide supersedes the AICPA Audit and Accounting Guide *Audits of Providers of Health Care Services*. This Guide also incorporates and supersedes AICPA Statements of Position (SOP) 89-5, *Financial Accounting and Reporting by Providers of Prepaid Health Care Services*, 90-8, *Financial Accounting and Reporting by Continuing Care Retirement Communities*, and 94-2, *The Application of the Requirements of Accounting Research Bulletins, Opinions of the Accounting Principles Board, and Statements and Interpretations of the Financial Accounting Standards Board to Not-for-Profit Organizations*.

Office of Management and Budget (OMB) Circular A-128, *Audits of State and Local Governments*, sets forth audit requirements for state and local governments receiving federal assistance. When state and local governments have component units involved in higher education or other not-for-profit activities (and in certain circumstances, hospitals), the audit of the component unit may have to be conducted under the provisions of OMB Circular A-133, *Audits of Institutions of Higher Education and Other Nonprofit Institutions*. If the component unit is an educational institution included in a statewide audit, it can elect to have the audit conducted in accordance with OMB Circular A-128 in lieu of OMB Circular A-133. Auditors of not-for-profit health care organizations that are subject to the audit requirements of the OMB Circular A-133 should refer to SOP 92-9, *Audits of Not-for-Profit Organizations Receiving Federal Awards*, for further guidance on auditing federal assistance received by the entity.

² Other professional literature and authoritative guidance includes statements issued by the AICPA Accounting Standards Executive Committee (AcSEC) and the FASB—including its Emerging Issues Task Force (EITF). Authoritative literature for governmental health care entities includes GASB pronouncements, FASB and AICPA pronouncements specifically made applicable to state and local governmental entities by the GASB, and AICPA Audit and Accounting Guides, Industry Audit Guides, Statements of Position, and Practice Bulletins made applicable to governmental entities and cleared by the GASB.

Effective Date and Transition

The provisions of this Guide, other than those included in paragraphs 1.24 through 1.35, which are discussed below, are effective for financial statements for periods beginning after June 15, 1996.³ Earlier application is permitted.

The provisions included in paragraphs 1.24 through 1.35 are effective for financial statements issued for fiscal years beginning after December 15, 1994, except for organizations with less than \$5 million in total assets and less than \$1 million in annual expenses. For those organizations, the effective date is fiscal years beginning after December 15, 1995. Earlier application is permitted.

Unless the provisions of this Guide, other than those included in paragraphs 1.24 through 1.35, are applied retroactively under the provisions of the following paragraph, the effect of initially applying this Guide shall be reported as the effect of a change in accounting principle, in a manner similar to the cumulative effect of a change in accounting principle (Accounting Principles Board [APB] Opinion No. 20, *Accounting Changes*, paragraph 19). The amount of the cumulative effect should be based on a retroactive computation. A not-for-profit organization should report the cumulative effect of a change in accounting on each class of net assets in the statement of activities between the captions *extraordinary items*, if any, and *change in unrestricted net assets*, *change in temporarily restricted net assets*, and *change in permanently restricted net assets*. The cumulative effect on temporary and permanently restricted net assets should be reflected in the statement of changes in net assets. An investor-owned business should report the amount of the cumulative effect in the income statement between the captions *extraordinary items* and *net income* (APB Opinion No. 20, paragraph 20).

This Guide, other than the guidance in paragraphs 1.24 through 1.35, may be applied retroactively by restating the opening net assets for the earliest year presented or for the year this Guide is first applied if no prior years are presented. In the period in which this Guide is first applied, that organization should disclose the nature of any restatement and its effect on the change in net assets for each period presented. An investor-owned business should account for any restatement as a change in accounting principle applied retroactively (APB Opinion No. 20, paragraphs 27 and 28).

In implementing the guidance in paragraphs 1.24 through 1.35, which incorporates the provisions of SOP 94-2 into this Guide, the transition rules of the APB Opinions and FASB Statements adopted, other than their effective dates, should be followed. However, if there is more than one change in accounting principle as a result of applying the guidance in paragraphs 1.24 through 1.35, organizations have the option of including the cumulative effect of adopting those accounting principles in the statement of activity or similar statement in the year this Guide is adopted, regardless of the transition rules of the APB Opinions and FASB Statements adopted,⁴ and the financial statements should

³ This Guide does not defer the effective date of any pronouncements that cover not-for-profit organizations.

⁴ Organizations that adopt the guidance in paragraphs 1.24 through 1.35 of this Guide in the same year in which they adopt FASB Statement No. 116 are permitted to apply the provisions of paragraph 17 of that Statement, concerning recognition of expirations of restrictions, prospectively, as specified in that Statement, regardless of whether they report the cumulative effect of adopting other accounting principles as a result of applying the guidance in paragraphs 1.24 through 1.35 of this Guide.

disclose the nature of the cumulative adjustment. (Paragraphs 19 and 20 of APB Opinion No. 20 discuss reporting the cumulative effects of changes in accounting principles.) In circumstances in which there is more than one change in accounting principle resulting from applying this Guide and the cumulative effect of adopting those accounting principles is included in the statement of activity or similar statement in the year the guidance in paragraphs 1.24 through 1.35 is adopted, this Guide does not require the pro forma disclosures required by paragraphs 19(d) and 21 of APB Opinion No. 20.

Chapter 1

Unique Considerations of Health Care Organizations

Overview

1.01 Financial statements of health care organizations should be prepared in conformity with generally accepted accounting principles (GAAP). AICPA Statement on Auditing Standards (SAS) No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 411), provides the GAAP hierarchy summary for both nongovernmental and governmental organizations.¹

Classification of Health Care Organizations

1.02 Health care enterprises usually can be classified into the following categories on the basis of their operating characteristics:

- a. *Investor-Owned Health Care Enterprises.* These are owned by investors or others with a private equity interest and provide goods or services with the objective of making a profit.
- b. *Not-for-Profit, Business-Oriented Organizations.* These are characterized by no ownership interests and essentially are self-sustaining from fees charged for goods and services. The fees charged by such organizations generally are intended to help the organization maintain its self-sustaining status rather than to maximize profits for the owner's benefit. Such organizations often are exempt from federal income taxes and may receive contributions of relatively small amounts from resource providers that do not expect commensurate or proportionate pecuniary return.
- c. *Governmental Health Care Organizations.* These are public corporations² and bodies corporate and politic. Other organizations are gov-

¹ Governmental Accounting Standards Board (GASB) Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*, paragraph 6, provides interim guidance for governmental proprietary activities, such as governmental health care enterprises, until the GASB completes its projects on business-type activities and governmental financial reporting. Governmental proprietary activities should apply all applicable GASB pronouncements as well as any Financial Accounting Standards Board (FASB) Statements and Interpretations, Accounting Principles Board (APB) Opinions, and Accounting Research Bulletins (ARBs) issued on or before November 30, 1989, that do not conflict with or contradict GASB pronouncements. Furthermore, paragraph 7 of GASB Statement No. 20 provides that governmental proprietary activities may apply all FASB Statements and Interpretations issued after November 30, 1989, that do not conflict with or contradict GASB pronouncements. Entities that choose to apply these "new" FASB pronouncements must apply them on an "all or none" basis (that is, they may not select which pronouncements to apply). The requirements set forth in this Guide for governmental health care enterprises generally apply to such enterprises that apply paragraph 7 of GASB Statement No. 20.

² Black's Law Dictionary defines a public corporation as: An artificial person (e.g., [a] municipality or a governmental corporation) created for the administration of public affairs. Unlike a private corporation it has no protection against legislative acts altering or even repealing its charter. Instrumentalities created by [the] state, formed and owned by it in [the] public interest, supported in whole or part by public funds, and governed by managers deriving their authority from [the] state. *Sharon Realty Co. v. Westlake*, Ohio Com.Pl., 188 N.E.2d 318, 323, 25, O.O.2d 322. A public corpora-

(continued)

ernmental organizations if they have one or more of the following characteristics:

- Popular election of officers or appointment (or approval) of a controlling majority of the members of the organization's governing body by officials of one or more state or local governments;
- The potential for unilateral dissolution by a government with the net assets reverting to a government; or
- The power to enact *and* enforce a tax levy.

Furthermore, organizations are presumed to be governmental if they have the ability to issue directly (rather than through a state or municipal authority) debt that pays interest exempt from federal taxation. However, organizations possessing only that ability (to issue tax-exempt debt) and none of the other governmental characteristics may rebut the presumption that they are governmental if their determination is supported by compelling, relevant evidence.

- d. *Not-for-Profit, Nonbusiness-Oriented Organizations.* These are voluntary health and welfare organizations (see the Glossary) as defined in FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*. Such organizations are within the scope of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* rather than this Guide.

Financial Reporting of Health Care Organizations

1.03 The nature of the organization and its operating structure have a significant effect on the needs of financial statement users. According to FASB Statement of Financial Accounting Concepts (Concepts Statement) No. 4, *Objectives of Financial Reporting by Nonbusiness Organizations*, paragraph 8:

Some organizations have no ownership interests but are essentially self-sustaining from fees they charge for goods and services. Examples are those private nonprofit hospitals . . . that may receive relatively small amounts of contributions and grants but finance their capital needs largely from the proceeds of debt issues and their operating needs largely from service charges rather than from private philanthropy or governmental grants. As a result, assessment of amounts, timing, and uncertainty of cash flows becomes the dominant interest of their creditors and other resource providers and profitability becomes an important indicator of performance. Consequently, the objectives of FASB Concepts Statement No. 1 [*Objectives of Financial Reporting by Business Enterprises*] may be more appropriate for those organizations. [Footnote reference omitted.]

1.04 The financial reporting for not-for-profit, business-oriented organizations and investor-owned health care enterprises generally is consistent except for transactions that clearly are not applicable. For example, not-for-profit, business organizations would have nothing to report for shareholders' equity. On the other hand, investor-owned health care enterprises typically would not have anything to report for contributions. Reporting for government-

(footnote continued)

tion is an instrumentality of the state, founded and owned in the public interest, supported by public funds and governed by those deriving their authority from the state. *York County Fair Ass'n v. South Carolina Tax Commission*, 249 S.C. 337, 154 S.E.2d 361, 362.

tal health care organizations that use enterprise fund accounting and reporting also is consistent except for matters unique to governmental entities.

1.05 The basic financial statements of health care organizations generally consist of a balance sheet, a statement of operations, a statement of changes in equity (or net assets/fund balance), a statement of cash flows, and notes to the financial statements.³ The statement of operations for not-for-profit organizations should report a performance indicator (see paragraph 10.16) as well as all other changes in unrestricted net assets for the period. The statement of operations may be combined with the statement of changes in equity (net assets). Illustrative financial statements are included in the appendix A of this Guide.

1.06 FASB Statement No. 117⁴ requires not-for-profit organizations to provide information about the liquidity of assets and liabilities in the balance sheet. Health care organizations should classify assets and liabilities as current and noncurrent. However, rather than presenting a classified balance sheet, a continuing care retirement community (CCRC) instead may sequence assets according to their nearness of conversion to cash and may sequence liabilities according to the nearness of the maturity and resulting use of cash.

1.07 FASB Statement No. 95, *Statement of Cash Flows*, and GASB Statement No. 9, *Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities That Use Proprietary Fund Accounting*, established standards for cash flow reporting for investor-owned organizations and governmental entities, respectively. FASB Statement No. 95 was amended by FASB Statement No. 117 to include not-for-profit organizations. The statement of cash flows may be prepared using the direct or indirect method of reporting cash flows.

1.08 A health care organization may be a part of another organization, such as a general-purpose government, a medical school or a university, or a subsidiary of a corporation. The recommendations in this Guide apply to the separate financial statements of these organizations as defined above. Therefore, when separate financial statements are prepared for a governmental health care organization that uses enterprise fund accounting and reporting, the accounting and disclosure requirements set forth by GASB pronouncements and this Guide apply. The requirements in this Guide presume that governmental health care organizations apply paragraph 7 of GASB Statement No. 20. (See footnote 1.)

Revenue From Health Care Services

1.09 In general, gross service revenue is recorded in the accounting records on an accrual basis at the provider's established rates, regardless of whether the health care organization expects to collect that amount. Provisions recognizing contractual adjustments and other adjustments (see examples in paragraph 5.02) are recorded on an accrual basis and deducted from gross service revenue to determine net service revenue. For financial reporting pur-

³ The terms *balance sheet* and *statement of operations* indicate the content and purpose of the respective statements and serve as possible titles for those statements. Other appropriately descriptive titles may also be used. For example, a statement reporting financial position could be called a *statement of financial position* as well as a *balance sheet*. Current practice and purpose suggest, however, that a statement of cash flows only be titled "Statement of Cash Flows."

⁴ This pronouncement is not applicable to governmental health care enterprises. (See footnote 1.)

poses, gross revenue does not include charity care (see discussion in paragraph 10.03) and service revenue is reported net of contractual and other adjustments in the statement of operations. Accounting and auditing issues related to receivables and revenue from health care services are discussed in chapters 5 and 10.

1.10 In many cases, revenues are generated as a result of an agreement to provide health care rather than from the actual provision of services. For example, an integrated delivery system may agree to provide all health-related services for a specified group residing within its primary service area for an agreed-upon amount per member per month (PMPM). These revenues are premium revenues, not patient service revenues, since they are earned by agreeing to provide care, regardless of whether services actually are rendered.

Third-Party Payor Considerations

1.11 Some third-party payors retrospectively determine final amounts reimbursable for services rendered to their beneficiaries based on allowable costs. These payors reimburse the health care organization on the basis of interim payment rates until the retrospective determination of allowable costs can be made. In most instances, the accumulation and allocation of allowable costs and other factors result in final settlements different from the interim payment rates. Final settlements are determined after the close of the fiscal periods to which they apply and may affect materially the health care organization's financial position and results of operations. Consequently, a reasonable estimate of the amount receivable from or payable to these payors should be made in the same period that the related services are rendered. Accounting and auditing issues related to receivables from third parties are discussed in chapter 5.

Classification and Reporting of Net Assets

1.12 Currently, many not-for-profit health care organizations use fund accounting for purposes of internal recordkeeping and managerial control. Many individual funds may be established by an organization to help in monitoring compliance with donor or grantor restrictions due to the fiduciary accountability associated with these resources. Each fund consists of a self-balancing group of accounts composed of assets, liabilities, and net assets. Consistent with FASB Concepts Statement No. 6, *Elements of Financial Statements*, FASB Statement No. 117 concluded that although some not-for-profit organizations may choose to classify assets and liabilities into fund groups, information about those groupings is not a necessary part of general-purpose external financial reporting. Although FASB Statement No. 117 does not preclude not-for-profit organizations from using fund accounting for internal recordkeeping and reporting, for purposes of external financial reporting each of the individual internal funds must be classified into one or more of the three broad classes of net assets: unrestricted net assets, temporarily restricted net assets, and permanently restricted net assets. These classifications are related to the existence or absence of donor-imposed restrictions and are discussed in more detail in paragraphs 1.13 through 1.17 and also chapter 9.

1.13 *Unrestricted Net Assets.* These represent the part of net assets that have not been externally restricted for identified purposes by donors and grantors. Unrestricted net assets also include assets whose use is contractually limited, such as—

- Proceeds of debt issues and funds of the health care organization deposited with a trustee and limited to use in accordance with the requirements of an indenture or a similar agreement.
- Other assets limited to use for identified purposes through an agreement between the health care organization and an outside party other than a donor or grantor. Examples include assets set aside under debt agreements, assets set aside under self-insurance (risk-retention) funding arrangements, and assets set aside to meet statutory reserve requirements (such as those required under state law for many health maintenance organizations [HMOs]).

1.14 Information about significant contractual limits (for example, debt covenants and self-insurance trusts) generally is disclosed in the notes to the financial statements. Similarly, internally designated funds should be reported separately from externally designated funds either on the face of the balance sheet or in the notes to the financial statements.

1.15 *Temporarily Restricted and Permanently Restricted Net Assets.* FASB Statement No. 117 defines two classes of donor-restricted net assets: temporarily restricted and permanently restricted. The distinction between these two types of restricted net assets is based on the nature of the donor's restriction. Temporarily restricted net assets are those donor-restricted net assets that can be used by the not-for-profit organization for their specified purpose once the donor's restriction is met. Generally, these restrictions are met either by the passage of time or by actions taken by the entity, such as use of the funds for the purpose intended. Permanently restricted net assets (for example, endowment funds) are those with donor restrictions that do not expire with the passage of time and cannot be removed by any actions taken by the entity. All donor-restricted net assets must be classified into one of these two broad categories for external reporting. Not-for-profit organizations may want to further classify temporarily and permanently restricted net assets into distinct groups that distinguish the nature or purpose of the donor's restriction. Accounting and reporting considerations pertaining to gifts and grants that are externally restricted for identified purposes by donors and grantors are discussed in paragraphs 9.04 through 9.06 and 10.08 through 10.14.

1.16 It should be noted that donor restrictions generally relate to limitations on the use of net assets rather than the use of specific assets. According to FASB Concepts Statement No. 6, paragraphs 101 and 102:

Restrictions impose responsibilities on management to ensure that the organization uses donated resources in the manner stipulated by resource providers. Sometimes donor-imposed restrictions limit an organization's ability to sell or exchange the particular asset received. For example, a donor may give a painting to a museum stipulating that it must be publicly displayed, properly maintained, and never sold.

More commonly, donors' stipulations permit the organization to pool the donated assets with other assets and to sell or exchange the donated assets for other suitable assets as long as the economic benefits of the donated assets are not consumed or used for a purpose that does not comply with the stipulation. For example, a donor may contribute 100 shares of Security A to an organization's endowment, thereby requiring that the amount of the gift be retained permanently but not requiring that the specified shares be held indefinitely. Thus, permanently restricted net assets and temporarily restricted net assets generally refer to amounts of net assets that are restricted by donor-imposed limits, not to specific assets.

1.17 A not-for-profit organization can report separate line items within any of the three classes of net assets either on the face of the balance sheet or in the notes to the financial statements to further distinguish the nature of donor restrictions within that category of net assets. For example, a health care organization may want to disclose the amount of temporarily restricted net assets restricted for a specific purpose such as indigent care. Further examples are provided in paragraph 15 of FASB Statement No. 117. An organization's internal fund accounting can be used to account for these different types of resources within a specific class of net assets.

Health Care Contracting

1.18 Contracts between a health care provider and a payor based on anything other than full charges requires the provider to accept some financial risk. The nature and degree of risk for the provider varies depending on the contract terms (for example, the definition of the unit of service or the basis for payment). In planning the audit of the health care provider, the auditor considers the audit risk associated with the entity's health care contracts. For example, contracts with payments for services based on a discount from the provider's established rates may have different risks than contracts with payments for services based on a capitated arrangement.

1.19 Generally, capitation payments are made at the beginning of each month and obligate the provider to render covered services during the month. Revenue is earned as a result of agreeing to provide services to qualified beneficiaries and not as a result of actually providing the care. If the provider's accounting system records patient charges and establishes patient receivables as services are rendered, appropriate valuation allowances or adjustments should be recorded so only the amount of contract revenue is recorded.

1.20 A capitation contract may obligate the provider to assume the risk of physician referrals and other outside services. In this case, a liability for unpaid claims, including incurred but not reported claims, should be established. A lag analysis may be helpful in estimating the liability.

1.21 In addition to the capitation payments, the amount of contract revenue may be affected by factors such as reinsurance recoveries, deductibles, coinsurance, and risk pool adjustments. Risk pool adjustments may be based on factors such as utilization or cost targets.

1.22 Sometimes health care providers enter preferred provider arrangements with self-insured employers whereby the provider guarantees that the employer's health care cost will not increase over a specified amount or percentage. In substance, these providers may have provided aggregate stop-loss insurance to the self-insured employer, and a material liability to the provider may exist. FASB Statement No. 5, *Accounting for Contingencies*, provides guidance on accounting for these contingencies. GASB Statement No. 10, *Accounting and Financial Reporting for Risk Financing and Related Insurance Issues*, provides guidance on accounting for contingencies by governmental enterprises.

GAAP Hierarchy for Not-for-Profit Organizations

1.23 SAS No. 69 states that the guidance provided by FASB Statements and Interpretations, Opinions of the APB, and ARBs shall be considered estab-

lished accounting principles pursuant to Rule 203 of the AICPA Code of Professional Conduct. (Appendix G [paragraph 1.45] of this chapter discusses SAS No. 69 and the hierarchy of sources of GAAP.)

1.24 Not-for-profit organizations should follow the guidance in effective provisions of ARBs, APB Opinions, and FASB Statements and Interpretations unless the specific pronouncement explicitly exempts not-for-profit organizations or their subject matter precludes such applicability. (As noted in paragraphs 1.29 and 1.30, not-for-profit organizations should follow the guidance in FASB Statements No. 116, *Accounting for Contributions Received and Contributions Made*, and No. 117 and this Guide in applying the guidance in pronouncements listed in appendixes C and D [paragraphs 1.41 and 1.42] of this chapter.)

1.25 The appendixes [paragraphs 1.39 through 1.46] of this chapter are aids to the implementation of the guidance in this chapter.

1.26 Pronouncements issued by the FASB subsequent to this Guide's effective date apply to not-for-profit organizations unless those pronouncements explicitly exempt not-for-profit organizations or their subject matter precludes such applicability.⁵

1.27 Not-for-profit organizations may follow and are not prohibited from following the guidance in effective provisions of the APB Opinions and the FASB Statements and Interpretations listed in appendix A [paragraph 1.39] of this chapter, which specifically exempt not-for-profit organizations from their application, unless FASB Statements No. 116 or No. 117 or this Guide provide different guidance. (However, the guidance included in the effective provisions of pronouncements listed in appendix A [paragraph 1.39] applies to all for-profit entities owned, whether owned all or in part, by not-for-profit entities.) The discussion in paragraphs 1.29 through 1.35 should be considered in determining the hierarchy of such guidance and of guidance issued by the AICPA.

1.28 Certain financial reporting guidance listed in appendix B [paragraph 1.40] of this chapter, such as that concerning common stock and convertible debt, generally does not apply to the kinds of not-for-profit entities covered by this Guide, because such entities do not enter into the kinds of transactions covered by that guidance. (However, the guidance included in the effective provisions of pronouncements included in appendix B [paragraph 1.40] applies to all for-profit entities owned, whether owned all or in part, by not-for-profit entities. Also, not-for-profit organizations should follow the effective provisions of pronouncements in appendix B [paragraph 1.40] if they enter into the kinds of transactions covered by that guidance.)

1.29 Other pronouncements, which are listed in appendix C [paragraph 1.41] of this chapter (ARB No. 51, *Consolidated Financial Statements*, and APB Opinion No. 29, *Accounting for Nonmonetary Transactions*), do not exempt not-for-profit organizations from their scope, but the transactions they contemplate also are covered by FASB Statement No. 116 and this Guide. FASB Statement No. 116 and No. 117 and this Guide provide guidance for applying

⁵ The guidance in paragraphs 1.23 through 1.35 addresses only the pronouncements listed in paragraph 1.24. However, not-for-profit organizations are also subject to other pronouncements included in categories (b)–(d) of paragraph 5 of SAS No. 69 and should apply AICPA Audit and Accounting Guides, Statements of Position (SOPs), and Practice Bulletins and FASB Technical Bulletins and the consensus positions of the FASB Emerging Issues Task Force (EITF) that apply to them. (Appendix G [paragraph 1.45] of this chapter discusses SAS No. 69 and the GAAP hierarchy.)

the pronouncements to circumstances unique to not-for-profit organizations and not contemplated by the pronouncements and therefore should be followed to apply the guidance in those pronouncements to not-for-profit organizations. (However, the guidance included in the effective provisions of pronouncements included in appendix C [paragraph 1.41] should be followed by all for-profit entities owned, whether owned all or in part, by not-for-profit entities.)

1.30 Some pronouncements (listed in appendix D [paragraph 1.42] of this chapter), which may include guidance concerning the recognition and measurement of assets, liabilities, revenues, expenses, gains and losses, and financial statement display, state that their provisions apply only to entities operating in certain industries. Such entities generally are business enterprises. An example of such guidance is FASB Statement No. 63, *Financial Reporting by Broadcasters*. However, some not-for-profit organizations conduct activities⁶ in some of those industries and should apply the guidance in the pronouncements concerning the recognition and measurement of assets, liabilities, revenues, expenses, and gains and losses to the transactions unique to those industries. However, such not-for-profit organizations should follow the financial statement display guidance in FASB Statement No. 117 and this Guide, even though it may conflict with display that would result from applying the guidance in the pronouncements listed in appendix D [paragraph 1.42].

1.31 Financial reporting pronouncements that have not been superseded and are not included in appendixes A through D [paragraphs 1.39 through 1.42] of this chapter are listed in appendix E [paragraph 1.43] of this chapter. Not-for-profit organizations should follow the effective provisions of the pronouncements listed in appendix E [paragraph 1.43].⁷

1.32 Certain other pronouncements, although they do not exempt not-for-profit organizations and do cover transactions conducted by not-for-profit organizations, include some provisions whose application by not-for-profit organizations may be unclear. Nevertheless, not-for-profit organizations are required to follow the effective provisions of those pronouncements. These provisions and their applicability are discussed below.

APB Opinion No. 16, *Business Combinations*

1.33 Because the conditions for applying the pooling of interests method of accounting for a business combination generally include an exchange of common stock of the combining entities, not-for-profit organizations generally would not meet the conditions for applying that method. The AICPA Accounting Standards Executive Committee (AcSEC) believes that circumstances exist under which reporting on the combination of two or more not-for-profit organizations (or that of a not-for-profit organization with a formerly for-profit entity) by the pooling of interests method better reflects the substance of the transaction than reporting by the purchase method. Therefore, not-for-profit organizations are, under certain circumstances, permitted to report by the pooling of interests method, even though they generally do not issue common stock. Such circumstances include the combination of two or more entities to form a new entity without the exchange of consideration. See paragraph 11.28 for further guidance.

⁶ Such activities may be conducted by (a) for-profit entities owned and consolidated by not-for-profit organizations, (b) divisions of not-for-profit organizations, or (c) entire not-for-profit organizations.

⁷ See footnote 5.

1.34 An example of acceptable practice, in some circumstances, for reporting business combinations by not-for-profit organizations if there has been no exchange of consideration is to report the (a) assets, (b) liabilities, and (c) net asset balances of the combined entities as of the beginning of the year and disclose the information that would be required to be disclosed for a pooling of interests under APB Opinion No. 16.

Provisions of Certain Pronouncements Concerning Financial Statement Display

1.35 The following pronouncements include provisions specifying the financial statement display of certain financial statement elements or items such as gains and losses, extraordinary items, translation adjustments, income tax expense, and prepaid or deferred income taxes:

- APB Opinion No. 9, *Reporting the Results of Operations*
- APB Opinion No. 26, *Early Extinguishment of Debt*, as amended by APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*; FASB Statement No. 4, *Reporting Gains and Losses from Extinguishment of Debt*; and FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities**
- APB Opinion No. 30, as amended by FASB Statement No. 128, *Earnings per Share*
- FASB Statement No. 52, *Foreign Currency Translation*
- FASB Statement No. 109, *Accounting for Income Taxes*

None of the preceding pronouncements considers the net asset reporting model included in FASB Statement No. 117 and this Guide. Therefore, preparers of financial statements of not-for-profit organizations should consider the reporting objectives of these APB Opinions and FASB Statements when exercising judgment about how to best display elements, such as in which net asset class.

GAAP Hierarchy for Governmental Organizations

1.36 SAS No. 69 provides that, for state or local governmental entities, officially established accounting principles consist of GASB Statements and Interpretations as well as AICPA and FASB pronouncements specifically made applicable to state and local governmental entities by GASB Statements or Interpretations. (Appendix G [paragraph 1.45] of this chapter discusses SAS No. 69 and the hierarchy of sources of GAAP for governmental entities.) GASB Statements No. 20 and No. 29, *The Use of Not-for-Profit Accounting and Financial Reporting Principles by Governmental Entities*, provide guidance on the applicability of FASB and AICPA pronouncements to proprietary activities of government, such as governmental health care enterprises that use enterprise fund accounting and financial reporting. Footnote 1 of this chapter discusses the guidance in GASB Statement No. 20.

* In June 1996, the FASB issued Statement No. 125, which supersedes certain pronouncements, including FASB Statement No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse*. FASB Statement No. 125 is effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after December 31, 1996. In December 1996, the FASB issued Statement No. 127, *Deferral of the Effective Date of Certain Provisions of FASB Statement No. 125*, which defers for one year the effective date of certain provisions of FASB Statement No. 125.

1.37 GASB Statement No. 29 provides that proprietary activities that apply the provisions of paragraph 7 of GASB Statement No. 20 should apply only those “new” FASB Statements and Interpretations that are developed for business enterprises, rather than those whose provisions are limited to not-for-profit organizations or address issues primarily concerning such organizations (such as FASB Statements No. 116, No. 117, and No. 124). Appendix H [paragraph 1.46] of this chapter lists all FASB pronouncements issued since November 30, 1989 and their applicability to governmental health care enterprises under GASB Statements No. 20, paragraph 7, and No. 29.

1.38 Paragraph 33 in the “Basis for Conclusions” of GASB Statement No. 20 also provides that AICPA pronouncements issued after November 30, 1989 and not specifically made applicable to governmental entities should be applied using the same logic used in the application of FASB standards. That is, AICPA pronouncements that do not conflict with or contradict GASB pronouncements should be applied on an “all or none” basis and constitute level “b” in the GAAP hierarchy. (See appendix G [paragraph 1.45] of this chapter.) Many of the AICPA pronouncements issued after November 30, 1989 provide guidance on specialized industries, including this Guide. However, users of this Guide should note the provisions of SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*, discussed in paragraph 8.30 of this Guide.

Appendix C—Financial Reporting Pronouncements Whose Application to Not-for-Profit Organizations is Subject to Additional FASB or AICPA Guidance

<i>Pronouncement</i>	<i>Additional Guidance</i>
ARB No. 51, <i>Consolidated Financial Statements</i> , as amended by APB Opinions 10, 16, 18, and 23, and FASB Statement Nos. 58, 71, 94, and 111 ^{CON, DIS}	This Guide
APB Opinion 29, <i>Accounting for Non-monetary Transactions</i> , as amended by FASB Statement Nos. 71, 109, and 123, and including FASB Interpretation No. 30 ^{CON}	FASB Statement No. 116 and chapters 5 and 10 of this Guide provide accounting guidance for contributions
FASB Statement No. 94, <i>Consolidation of All Majority-Owned Subsidiaries</i> ^{CON, DIS}	See ARB No. 51
FASB Statement No. 116, <i>Accounting for Contributions Received and Contributions Made</i> , including FASB Interpretation No. 42 ^{AGT}	This Guide and the AICPA Audit and Accounting Guide <i>Not-for-Profit Organizations</i>
FASB Statement No. 117, <i>Financial Statements of Not-for-Profit Organizations</i> , as amended by FASB Statement No. 124	This Guide
FASB Statement No. 124, <i>Accounting for Certain Investments Held by Not-for-Profit Organizations</i>	This Guide
FASB Interpretation No. 30, <i>Accounting for Involuntary Conversions of Nonmonetary Assets to Monetary Assets</i> , as amended by FASB Statement No. 109	See APB Opinion 29
FASB Interpretation No. 42, <i>Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power</i>	This Guide and the AICPA Audit and Accounting Guide <i>Not-for-Profit Organizations</i>

^{AGT} On December 29, 1995, the FASB released an exposure draft of a proposed FASB Interpretation, *Transfers of Assets in Which a Not-for-Profit Organization Acts as an Agent, Trustee, or Intermediary (An Interpretation of FASB Statement No. 116)*.

^{CON} On October 16, 1995, the FASB released an exposure draft of a proposed FASB Statement, *Consolidated Financial Statements: Policy and Procedures*, that would supersede ARB No. 51 and FASB Statement No. 94, and would amend APB Opinions 16, 17, 18, and 29, and FASB Statement Nos. 5, 14, 15, 37, 57, and 89, and provide guidance that differs from guidance included in SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations*.

^{DIS} On January 19, 1996, the FASB released an exposure draft of a proposed FASB Statement, *Reporting Disaggregated Information about a Business Enterprise*, that would supersede FASB Statement Nos. 14, 18, and 30, and would amend ARB No. 51, APB Opinion 28, and FASB Statement Nos. 21, 51, 69, and 94.

Appendix D—Financial Reporting Pronouncements Pertaining to Specialized Industry Practices of Business Enterprises

This appendix includes pronouncements that apply only to entities operating in certain industries, generally business enterprises. However, some not-for-profit organizations conduct activities in some of those industries and should apply the guidance concerning recognition and measurement of assets, liabilities, revenues, expenses, and gains and losses in those pronouncements to the transactions unique to those industries. In addition, those not-for-profit organizations should follow the financial statement display guidance in FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*, and this Guide, although it may conflict with display that would result from applying the guidance in the pronouncements included in this appendix.

- APB Opinion 12, *Omnibus Opinion—1967* (guidance under the heading “Capital Changes”)
- APB Opinion 13, *Amending Paragraph 6 of APB Opinion No. 9, Application to Commercial Banks*
- FASB Statement No. 7, *Accounting and Reporting by Development Stage Enterprises*, as amended by FASB Statement Nos. 71 and 95, and including FASB Interpretation No. 7
- FASB Statement No. 19, *Financial Accounting and Reporting by Oil and Gas Producing Companies*, as amended by FASB Statement Nos. 25, 69, 71, 109, and 121, and including FASB Interpretation Nos. 33 and 36
- FASB Statement No. 25, *Suspension of Certain Accounting Requirements for Oil and Gas Producing Companies (an amendment of FASB Statement No. 19)*, as amended by FASB Statement No. 111
- FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, as amended by FASB Statement Nos. 75 and 110
- FASB Statement No. 44, *Accounting for Intangible Assets of Motor Carriers (an amendment of Chapter 5 of ARB No. 43 and an Interpretation of APB Opinions 17 and 30)*, as amended by FASB Statement No. 109
- FASB Statement No. 45, *Accounting for Franchise Fee Revenue*
- FASB Statement No. 50, *Financial Reporting in the Record and Music Industry*
- FASB Statement No. 51, *Financial Reporting by Cable Television Companies*, as amended by FASB Statement Nos. 71 and 121^{DIS}
- FASB Statement No. 53, *Financial Reporting by Producers and Distributors of Motion Picture Films*
- FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, as amended by FASB Statement Nos. 91, 97, 109, 113, 114, 115, 120, 121, and 124, and including FASB Interpretation No. 40
- FASB Statement No. 61, *Accounting for Title Plant*, as amended by FASB Statement No. 121
- FASB Statement No. 63, *Financial Reporting by Broadcasters*

- FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities*, as amended by FASB Statement Nos. 91, 115, 124, and 125*
- FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, as amended by FASB Statement Nos. 111 and 121
- FASB Statement No. 69, *Disclosures about Oil and Gas Producing Activities (an amendment of FASB Statements 19, 25, 33, and 39)*, as amended by FASB Statement Nos. 89, 95, and 109^{DIS}
- FASB Statement No. 71, *Accounting for the Effects of Certain Types of Regulation*, as amended by FASB Statement Nos. 90, 92, 109, and 121
- FASB Statement No. 72, *Accounting for Certain Acquisitions of Banking or Thrift Institutions (an amendment of APB Opinion No. 17, an interpretation of APB Opinions 16 and 17, and an amendment of FASB Interpretation No. 9)*
- FASB Statement No. 73, *Reporting a Change in Accounting for Railroad Track Structures (an amendment of APB Opinion No. 20)*
- FASB Statement No. 75, *Deferral of the Effective Date of Certain Accounting Requirements for Pension Plans of State and Local Governmental Units (an amendment of FASB Statement No. 35)*
- FASB Statement No. 90, *Regulated Enterprises—Accounting for Abandonments and Disallowances of Plant Costs (an amendment of FASB Statement No. 71)*, as amended by FASB Statement Nos. 92 and 109
- FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases (an amendment of FASB Statements No. 13, 60, and 65 and a rescission of FASB Statement No. 17)*, as amended by FASB Statement Nos. 98, 114, 115, and 124
- FASB Statement No. 92, *Regulated Enterprises—Accounting for Phase-in Plans (an amendment of FASB Statement No. 71)*
- FASB Statement No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*, as amended by FASB Statement Nos. 113, 115, and 120
- FASB Statement No. 101, *Regulated Enterprises—Accounting for the Discontinuation of Application of FASB Statement No. 71*, as amended by FASB Statement Nos. 109 and 121
- FASB Statement No. 110, *Reporting by Defined Benefit Pension Plans of Investment Contracts (an amendment of FASB Statement No. 35)*
- FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, as amended by FASB Statement No. 120, and including FASB Interpretation No. 40
- FASB Statement No. 120, *Accounting and Reporting by Mutual Life Insurance Enterprises and by Insurance Enterprises for Certain Long-Duration Participating Contracts (an amendment of FASB Statement Nos. 60, 97, and 113 and Interpretation No. 40)*
- FASB Interpretation No. 7, *Applying FASB Statement No. 7 in Financial Statements of Established Operating Enterprises*
- FASB Interpretation No. 9, *Applying APB Opinions No. 16 and 17 When a Savings and Loan Association or a Similar Institution Is Acquired in a Business Combination Accounted for by the Purchase Method*, as amended by FASB Statement No. 72

- FASB Interpretation No. 33, *Applying FASB Statement No. 34 to Oil and Gas Producing Operations Accounted for by the Full Cost Method*
- FASB Interpretation No. 36, *Accounting for Exploratory Wells in Progress at the End of a Period*
- FASB Interpretation No. 40, *Applicability of Generally Accepted Accounting Principles to Mutual Life Insurance and Other Enterprises*, as amended by FASB Statement Nos. 115 and 120

^{DIS} On January 19, 1996, the FASB released an exposure draft of a proposed FASB Statement, *Reporting Disaggregated Information about a Business Enterprise*, that would supersede FASB Statement Nos. 14, 18, and 30, and would amend ARB No. 51, APB Opinion 28, and FASB Statement Nos. 21, 51, 69, and 94.

* In June 1996, the FASB issued Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, which supersedes certain pronouncements, including FASB Statement No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse*. FASB Statement No. 125 is effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after December 31, 1996. In December 1996, the FASB issued Statement No. 127, *Deferral of the Effective Date of Certain Provisions of FASB Statement No. 125*, which defers for one year the effective date of certain provisions of FASB Statement No. 125.

Appendix E—Financial Reporting Pronouncements Not Subsequently Superseded and Not Included in Appendixes A through D of This Chapter

As stated in paragraph 1.24 of this Guide, not-for-profit organizations should follow the guidance in effective provisions of ARBs, APB Opinions, and FASB Statements and Interpretations, except for specific pronouncements that explicitly exempt not-for-profit organizations and pronouncements for which this Guide provides guidance. This appendix includes pronouncements, not subsequently superseded, that (a) do not exempt not-for-profit organizations from their application, (b) by the nature of their subject matter, apply to the kinds of transactions not-for-profit organizations engage in, (c) are subject to no additional FASB or AICPA guidance, and (d) do not pertain to specialized industry practices of business enterprises. Not-for-profit organizations should follow the guidance in the effective provisions of the pronouncements included in this appendix.

- ARB No. 43, *Restatement and Revision of Accounting Research Bulletins*, as amended by APB Opinions 6, 9, 10, 16, 17, 20, 21, 25, and 26, and FASB Statement Nos. 5, 6, 44, 52, 78, 94, 109, 111, 115, and 123
- ARB No. 45, *Long-Term Construction-Type Contracts*
- ARB No. 46, *Discontinuance of Dating Earned Surplus*
- APB Opinion 2, *Accounting for the "Investment Credit,"* as amended by APB Opinion 4 and FASB Statement Nos. 71 and 109
- APB Opinion 4 (amending Opinion 2), *Accounting for the "Investment Credit"*
- APB Opinion 6, *Status of Accounting Research Bulletins*, as amended by APB Opinions 16, 17, and 26, and FASB Statement Nos. 52, 71, 109, and 111
- APB Opinion 9, *Reporting the Results of Operations* (paragraph 1.35 of this Guide discusses this pronouncement), as amended by APB Opinions 13, 15, 20, and 30, and FASB Statement No. 16
- APB Opinion 10, *Omnibus Opinion—1966*, as amended by APB Opinions 12, 14, 16, and 18, and FASB Statement Nos. 111 and 129, and including FASB Interpretation Nos. 39 and 41
- APB Opinion 12, *Omnibus Opinion—1967* (except guidance under the heading, "Capital Changes"), as amended by APB Opinion 14 and FASB Statement Nos. 87, 106, and 111
- APB Opinion 16, *Business Combinations* (paragraph 1.33 of this Guide discusses this pronouncement), as amended by FASB Statement Nos. 10, 38, 71, 79, 87, 106, 109, and 121, and including FASB Interpretation Nos. 4, 9, and 21^{CON}
- APB Opinion 17, *Intangible Assets*, as amended by APB Opinion 30 and FASB Statement Nos. 2, 71, 72, 109, and 121, and including FASB Interpretation No. 9^{CON}

- APB Opinion 20, *Accounting Changes*, as amended by FASB Statement Nos. 16, 58, 71, 73, 95, 111, and 128, and including FASB Interpretation Nos. 1 and 20
- APB Opinion 21, *Interest on Receivables and Payables*, as amended by FASB Statement Nos. 34 and 109
- APB Opinion 22, *Disclosure of Accounting Policies*, as amended by FASB Statement Nos. 2, 52, 95, and 111
- APB Opinion 23, *Accounting for Income Taxes—Special Areas*, as amended by FASB Statement Nos. 60, 71, 94, and 109
- APB Opinion 26, *Early Extinguishment of Debt* (paragraph 1.35 of this Guide discusses this pronouncement), as amended by APB Opinion 30 and FASB Statement Nos. 4, 15, 71, 84, and 125*
- APB Opinion 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (paragraph 1.35 of this Guide discusses this pronouncement), as amended by FASB Statement Nos. 4, 16, 60, 97, 101, 109, and 128, and including FASB Interpretation No. 27
- FASB Statement No. 2, *Accounting for Research and Development Costs*, as amended by FASB Statement Nos. 71 and 86, and including FASB Interpretation Nos. 4 and 6
- FASB Statement No. 4, *Reporting Gains and Losses from Extinguishment of Debt* (an amendment of APB Opinion No. 30) (paragraph 1.35 of this Guide discusses this pronouncement), as amended by FASB Statement Nos. 64 and 71
- FASB Statement No. 5, *Accounting for Contingencies*, as amended by FASB Statement Nos. 11, 16, 60, 71, 87, 111, 112, 113, 114, and 123, and including FASB Interpretation Nos. 14 and 34^{CON}
- FASB Statement No. 6, *Classification of Short-Term Obligations Expected to Be Refinanced* (an amendment of ARB No. 43, Chapter 3A), and including FASB Interpretation No. 8
- FASB Statement No. 10, *Extension of “Grandfather” Provisions for Business Combinations* (an amendment of APB Opinion No. 16)
- FASB Statement No. 11, *Accounting for Contingencies—Transition Method* (an amendment of FASB Statement No. 5)
- FASB Statement No. 13, *Accounting for Leases*, as amended by FASB Statement Nos. 22, 23, 27, 28, 29, 34, 71, 91, 94, 98, 109, and 125,* and including FASB Interpretation Nos. 19, 21, 23, 24, 26, and 27
- FASB Statement No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings*, as amended by FASB Statement Nos. 71, 111, 114, and 121^{CON}
- FASB Statement No. 16, *Prior Period Adjustments*, as amended by FASB Statement Nos. 71 and 109
- FASB Statement No. 22, *Changes in the Provisions of Lease Agreements Resulting from Refundings of Tax-Exempt Debt* (an amendment of FASB Statement No. 13), as amended by FASB Statement Nos. 71 and 125*
- FASB Statement No. 23, *Inception of the Lease* (an amendment of FASB Statement No. 13)

- FASB Statement No. 27, *Classification of Renewals or Extensions of Existing Sales-Type or Direct Financing Leases (an amendment of FASB Statement No. 13)*
- FASB Statement No. 28, *Accounting for Sales with Leasebacks (an amendment of FASB Statement No. 13)*, as amended by FASB Statement No. 66
- FASB Statement No. 29, *Determining Contingent Rentals (an amendment of FASB Statement No. 13)*, as amended by FASB Statement No. 98
- FASB Statement No. 34, *Capitalization of Interest Cost*, as amended by FASB Statement Nos. 42, 58, 62, 71, and 121, and including FASB Interpretation No. 33
- FASB Statement No. 37, *Balance Sheet Classification of Deferred Income Taxes (an amendment of APB Opinion No. 11)*, as amended by FASB Statement No. 109^{CON}
- FASB Statement No. 38, *Accounting for Preacquisition Contingencies of Purchased Enterprises (an amendment of APB Opinion No. 16)*, as amended by FASB Statement No. 109
- FASB Statement No. 42, *Determining Materiality for Capitalization of Interest Cost (an amendment of FASB Statement No. 34)*
- FASB Statement No. 43, *Accounting for Compensated Absences*, as amended by FASB Statement Nos. 71, 112, and 123
- FASB Statement No. 47, *Disclosure of Long-Term Obligations*
- FASB Statement No. 48, *Revenue Recognition When Right of Return Exists*
- FASB Statement No. 49, *Accounting for Product Financing Arrangements*, as amended by FASB Statement No. 71
- FASB Statement No. 52, *Foreign Currency Translation* (paragraph 1.35 of this Guide discusses this pronouncement), as amended by FASB Statement Nos. 95 and 109, and including FASB Interpretation No. 37
- FASB Statement No. 57, *Related Party Disclosures*, as amended by FASB Statement Nos. 95 and 109^{CON}
- FASB Statement No. 58, *Capitalization of Interest in Financial Statements That Include Investments Accounted for by the Equity Method (an amendment of FASB Statement No. 34)*
- FASB Statement No. 62, *Capitalization of Interest Cost in Situations Involving Certain Tax-Exempt Borrowings and Certain Gifts and Grants (an amendment of FASB Statement No. 34)*
- FASB Statement No. 64, *Extinguishments of Debt Made to Satisfy Sinking-Fund Requirements (an amendment of FASB Statement No. 4)*
- FASB Statement No. 66, *Accounting for Sales of Real Estate*, as amended by FASB Statement Nos. 98 and 121
- FASB Statement No. 68, *Research and Development Arrangements*
- FASB Statement No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse*, as amended by FASB Statement Nos. 105 and 125*
- FASB Statement No. 78, *Classification of Obligations That Are Callable by the Creditor (an amendment of ARB No. 43, Chapter 3A)*

- FASB Statement No. 79, *Elimination of Certain Disclosures for Business Combinations by Nonpublic Enterprises (an amendment of APB Opinion No. 16)*
- FASB Statement No. 80, *Accounting for Futures Contracts*, as amended by FASB Statement No. 115
- FASB Statement No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed*
- FASB Statement No. 87, *Employers' Accounting for Pensions*, as amended by FASB Statement Nos. 106 and 109
- FASB Statement No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*
- FASB Statement No. 93, *Recognition of Depreciation by Not-for-Profit Organizations*, as amended by FASB Statement No. 99
- FASB Statement No. 95, *Statement of Cash Flows*, as amended by FASB Statement Nos. 102, 104, and 117
- FASB Statement No. 98, *Accounting for Leases*:
 - *Sale-Leaseback Transactions Involving Real Estate*
 - *Sales-Type Leases of Real Estate*
 - *Definition of the Lease Term*
 - *Initial Direct Costs of Direct Financing Leases*

(an amendment of FASB Statements No. 13, 66, and 91 and a rescission of FASB Statement No. 26 and Technical Bulletin No. 79-11)
- FASB Statement No. 99, *Deferral of the Effective Date of Recognition of Depreciation by Not-for-Profit Organizations (an amendment of FASB Statement No. 93)*
- FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale (an amendment of FASB Statement No. 95)*, as amended by FASB Statement No. 115
- FASB Statement No. 104, *Statement of Cash Flows—Net Reporting of Certain Cash Receipts and Cash Payments and Classification of Cash Flows from Hedging Transactions (an amendment of FASB Statement No. 95)*
- FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*, as amended by FASB Statement Nos. 107, 111, 119, 123, and 125, and including FASB Interpretation No. 39*
- FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*
- FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, as amended by FASB Statement Nos. 112, 119, 123, 125, and 126*
- FASB Statement No. 109, *Accounting for Income Taxes* (paragraph 1.35 of this Guide discusses this pronouncement), as amended by FASB Statement Nos. 115 and 123
- FASB Statement No. 111, *Rescission of FASB Statement No. 32 and Technical Corrections*

- FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits (an amendment of FASB Statements No. 5 and 43)*, as amended by FASB Statement No. 123
- FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan (an amendment of FASB Statements No. 5 and 15)*, as amended by FASB Statement No. 118
- FASB Statement No. 118, *Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures (an amendment of FASB Statement No. 114)*
- FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments*
- FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*
- FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, as amended by FASB Statement No. 127*
- FASB Statement No. 126, *Exemption from Certain Required Disclosures about Financial Instruments for Certain Nonpublic Entities*
- FASB Statement No. 127, *Deferral of the Effective Date of Certain Provisions of FASB Statement No. 125**
- FASB Statement No. 129, *Disclosure of Information about Capital Structure*
- FASB Interpretation No. 1, *Accounting Changes Related to the Cost of Inventory*, as amended by FASB Statement No. 121
- FASB Interpretation No. 4, *Applicability of FASB Statement No. 2 to Business Combinations Accounted for by the Purchase Method*
- FASB Interpretation No. 6, *Applicability of FASB Statement No. 2 to Computer Software*, as amended by FASB Statement No. 86
- FASB Interpretation No. 8, *Classification of a Short-Term Obligation Repaid Prior to Being Replaced by a Long-Term Security*
- FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss*
- FASB Interpretation No. 19, *Lessee Guarantee of the Residual Value of Leased Property*
- FASB Interpretation No. 20, *Reporting Accounting Changes under AICPA Statements of Position*, as amended by FASB Statement No. 111
- FASB Interpretation No. 21, *Accounting for Leases in a Business Combination*
- FASB Interpretation No. 23, *Leases of Certain Property Owned by a Governmental Unit or Authority*
- FASB Interpretation No. 24, *Leases Involving Only Part of a Building*
- FASB Interpretation No. 26, *Accounting for Purchase of a Leased Asset by the Lessee during the Term of the Lease*
- FASB Interpretation No. 27, *Accounting for a Loss on a Sublease*
- FASB Interpretation No. 34, *Disclosure of Indirect Guarantees of Indebtedness of Others*
- FASB Interpretation No. 37, *Accounting for Translation Adjustments upon Sale of Part of an Investment in a Foreign Entity*

- FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts*, as amended by FASB Statement No. 113 and FASB Interpretation No. 41
- FASB Interpretation No. 41, *Offsetting of Amounts Related to Certain Repurchase and Reverse Repurchase Agreements*

CON On October 16, 1995, the FASB released an exposure draft of a proposed FASB Statement, *Consolidated Financial Statements: Policy and Procedures*, that would supersede ARB No. 51 and FASB Statement No. 94, and would amend APB Opinions 16, 17, 18, and 29, and FASB Statement Nos. 5, 14, 15, 37, 57, and 89, and provide guidance that differs from guidance included in SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations*.

* In June 1996, the FASB issued Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, which supersedes certain pronouncements, including FASB Statement No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse*. FASB Statement No. 125 is effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after December 31, 1996. In December 1996, the FASB issued Statement No. 127, *Deferral of the Effective Date of Certain Provisions of FASB Statement No. 125*, which defers for one year the effective date of certain provisions of FASB Statement No. 125.

Appendix G—The Hierarchy of GAAP

SAS No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, establishes the hierarchy of GAAP.

For financial statements of entities ***other than governmental entities***, the hierarchy is summarized as follows:

- Category (a). Rule 203 literature consists of officially established accounting principles, which are FASB Statements and Interpretations, APB Opinions, and ARBs.
- Category (b). This consists of FASB Technical Bulletins and, if cleared by the FASB, AICPA Industry Audit and Accounting Guides, and AICPA SOPs.
- Category (c). This consists of AICPA AcSEC Practice Bulletins that have been cleared by the FASB and consensus positions of the FASB EITF.
- Category (d). This consists of AICPA accounting interpretations and implementation guides ("Qs and As") published by the FASB staff, and practices that are widely recognized and prevalent either generally or in the industry.

If the accounting treatment of a transaction or event is not specified by Rule 203 literature, the auditor should consider whether the accounting treatment is specified by another source of established accounting principles. If an established accounting principle from one or more sources in category (b), (c), or (d) is relevant to the circumstances, the auditor should be prepared to justify a conclusion that another treatment is generally accepted. If there is a conflict between accounting principles relevant to the circumstances from one or more sources in category (b), (c), or (d), the auditor should follow the treatment specified by the source in the higher category—for example, follow category (b) treatment over category (c)—or be prepared to justify a conclusion that a treatment specified by a source in the lower category better presents the substance of the transaction in the circumstances.

For financial statements of ***governmental entities***,¹ the hierarchy is summarized as follows:

- Category (a). Officially established accounting principles, consists of GASB Statements and Interpretations, as well as AICPA and FASB pronouncements specifically made applicable to state and local governmental entities by GASB Statements or Interpretations. GASB Statements and Interpretations are periodically incorporated in the *Codification of Governmental Accounting and Financial Reporting Standards*.

¹ State and local governmental entities include public benefit corporations and authorities; public employee retirement systems; and governmental utilities, hospitals and other health care providers, and colleges and universities.

- Category (b). This consists of GASB Technical Bulletins and, if specifically made applicable to state and local governmental entities by the AICPA and cleared² by the GASB, AICPA Industry Audit and Accounting Guides and AICPA SOPs.
- Category (c). This consists of AICPA AcSEC Practice Bulletins if specifically made applicable to state and local governmental entities and cleared³ by the GASB, as well as consensus positions of a group of accountants organized by the GASB that attempts to reach consensus positions on accounting issues applicable to state and local governmental entities.⁴
- Category (d). Includes implementation guides (“Qs and As”) published by the GASB staff, as well as practices that are widely recognized and prevalent in state and local government.

In the absence of a pronouncement covered by Rule 203 or another source of established accounting principles, the auditor of financial statements of state and local governmental entities may consider other accounting literature, depending on its relevance in the circumstances. Other accounting literature includes, for example, GASB Concepts Statements; the pronouncements referred to in categories (a) through (d) above that relate to other than governmental entities when not specifically made applicable to state and local governmental entities either by the GASB or by the organization issuing them; FASB Concepts Statements; AICPA Issues Papers; International Accounting Standards of the International Accounting Standards Committee; pronouncements of other professional associations or regulatory agencies; Technical Information Service Inquiries and Replies included in AICPA *Technical Practice Aids*; and accounting textbooks, handbooks, and articles. The appropriateness of other accounting literature depends on its relevance to particular circumstances, the specificity of the guidance, and the general recognition of the issuer or author as an authority. For example, GASB Concepts Statements would normally be more influential than other sources in this category.

² The auditor should assume that such pronouncements specifically made applicable to state and local governments have been cleared by the GASB unless the pronouncement indicates otherwise.

³ See footnote 2.

⁴ As of the date of this Guide, the GASB had not organized such a group.

1.46

Appendix H—New FASB Pronouncements— Applicability Under GASB Statement No. 20, paragraph 7

<i>Statement No.</i>	<i>Title</i>	<i>Apply?</i>
103	<i>Accounting for Income Taxes—Deferral of Effective Date of FASB Statement No. 96</i>	N/A
104	<i>Statement of Cash Flows—Net Reporting of Certain Cash Receipts and Cash Payments and Classification of Cash Flows from Hedging Transactions</i>	Yes—See paragraph 74 of GASB Statement No. 9
105	<i>Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk</i>	Yes
106	<i>Employers' Accounting for Postretirement Benefits Other Than Pensions</i>	Optional based on GASB Statement No. 12
107	<i>Disclosures about Fair Value of Financial Instruments</i>	Yes
108	<i>Accounting for Income Taxes—Deferral of the Effective Date of FASB Statement No. 96</i>	N/A
109	<i>Accounting for Income Taxes</i>	N/A
110	<i>Reporting by Defined Benefit Pension Plans of Investment Contracts</i>	Yes ¹
111	<i>Rescission of FASB Statement No. 32 and Technical Corrections</i>	Yes
112	<i>Employers' Accounting for Postemployment Benefits</i>	Optional based on GASB Statement No. 12
113	<i>Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts</i>	No—Apply GASB Statement No. 10

¹ FASB Statement No. 110 would be applicable to pension plans that apply FASB Statement No. 35, *Accounting and Reporting for Defined Benefit Pension Plans*. Neither FASB Statement No. 35 or No. 110 apply to governmental pension funds when GASB Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, becomes effective for periods beginning after June 15, 1996.

<i>Statement No.</i>	<i>Title</i>	<i>Apply?</i>
114	<i>Accounting by Creditors for Impairments of a Loan</i>	Yes ²
115	<i>Accounting for Certain Investments in Debt and Equity Securities</i>	Yes ³
116	<i>Accounting for Contributions Received and Contributions Made</i>	No ⁴
117	<i>Financial Statements of Not-for-Profit Organizations</i>	No ⁵
118	<i>Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures</i>	Yes
119	<i>Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments</i>	Yes—In conjunction with GASB Technical Bulletin ⁶ 94-1
120	<i>Accounting and Reporting by Mutual Life Insurance Enterprises and by Insurance Enterprises for Certain Long-Duration Participating Contracts</i>	Yes
121	<i>Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of</i>	Yes
122	<i>Accounting for Mortgage Servicing Rights</i>	Yes
123	<i>Accounting for Stock-Based Compensation</i>	N/A
124	<i>Accounting for Certain Investments Held by Not-for-Profit Organizations</i>	No ⁷

² GASB Statement No. 10 provides guidance on reporting investments, including investments in loans, for public entity risk pools. Accordingly, these Statements do not apply to public entity risk pools to the extent that they contradict GASB Statement No. 10.

³ See footnote 2 of this appendix.

⁴ GASB Statement No. 29 provides that proprietary activities that apply the provisions of paragraph 7 of GASB Statement No. 20 should apply only those FASB Statements and Interpretations issued after November 30, 1989, that are developed for business enterprises. They should not apply FASB Statements and Interpretations whose provisions are limited to not-for-profit organizations, such as FASB Statements No. 117 and No. 124, or address issues concerning primarily such organizations, such as FASB Statement No. 116.

⁵ See footnote 4 of this appendix.

⁶ GASB and FASB Technical Bulletins are issued by the GASB and FASB staff. In the hierarchy of GAAP, Technical Bulletins constitute level b GAAP guidance, after Statements and Interpretations. Technical Bulletins may be issued if a majority of the Board does not object to their issuance.

⁷ See footnote 4 of this appendix.

<i>Statement No.</i>	<i>Title</i>	<i>Apply?</i>
Interpretation 39	<i>Offsetting of Amounts Related to Certain Contracts</i>	Yes ⁸
Interpretation 40	<i>Applicability of Generally Accepted Accounting Principles to Mutual Life Insurance and Other Enterprises</i>	Yes—However, the GASB is aware of only one governmental entity that is a mutual life insurance entity
Interpretation 41	<i>Offsetting of Amounts Related to Certain Repurchase and Reverse Repurchase Agreements</i>	No—Provisions of GASB Statement No. 3, paragraph 81, apply
Technical Bulletin ⁹ 94-1	<i>Application of Statement 115 to Debt Securities Restructured in a Troubled Debt Restructuring</i>	Yes

⁸ See footnote 2 of this appendix.

⁹ See footnote 6 of this appendix.

Chapter 2

General Auditing Considerations

Scope of the Engagement

2.01 For each audit engagement, the independent auditor and the health care organization should establish a clear understanding, preferably in writing, of the scope of audit services to be performed and the independent auditor's responsibilities regarding accompanying information. In addition to reporting on the entity's basic financial statements, the independent auditor may be asked to report on the following special reports: (a) cost-reimbursement reports; (b) cost reports related to research grants; (c) reports for contributors; (d) reports for local, state, or federal authorities; (e) reports related to bond indentures and other debt instruments; and (f) other special-purpose reports. The nature, timing, and extent of auditing procedures to be performed and the type of reports to be issued are based on the scope of services required by the entity.

Planning the Audit

2.02 The nature, timing, and extent of planning usually vary with the size and complexity of the entity, as well as with the independent auditor's experience with the entity and with the industry. SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311), contains guidance on planning an audit in accordance with generally accepted auditing standards (GAAS).

2.03 The independent auditor's work in forming an opinion on financial statements consists of obtaining and evaluating evidential matter regarding management's assertions. Assertions are representations by management that are embodied in the financial statements. They can be either explicit or implicit and can be classified according to the following broad categories: existence and occurrence, completeness, rights and obligations, valuation and allocation, and presentation and disclosure.

2.04 The purpose of specific audit objectives and examples of control activities in the auditing sections of the following chapters is to illustrate how the independent auditor might obtain an understanding of internal control, assess control risk, and perform audit procedures. There is not necessarily a one-to-one relationship between audit objectives and procedures. Some procedures may relate to more than one objective. On the other hand, a combination of procedures may be needed to achieve a single objective. The illustrations are not intended to be all-inclusive or to suggest that specific audit objectives, control activities, and audit procedures should be applied. Some of the objectives may not be relevant to a particular entity because of the nature of its operations or the absence of certain types of transactions. The absence of one or more of the illustrative controls would not necessarily indicate a deficiency in internal control. The auditor performs procedures that are responsive to the auditor's risk assessment.

2.05 The illustrations are arranged by broad audit objectives. These classifications may be useful in the evaluation process, but the classifications are of secondary importance. Some specific objectives may serve to achieve more than one broad objective.

2.06 Many of the illustrative control activities are premised on the existence of certain essential characteristics of internal control (for example, authorization of transactions, segregation of duties, documentation, supervision and review, and timeliness of procedures). To avoid repetition, these characteristics have not been emphasized in the illustrations.

Inherent Risk

2.07 In determining the scope of audit procedures to be performed, the independent auditor should be aware of certain aspects of the health care organization's operations that are usually subject to higher or lower levels of inherent risk. SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312), provides guidance on the consideration of audit risk and materiality when planning and performing an audit of financial statements.

2.08 In many health care organizations, certain accounts typically (a) will have a low volume of transactions, (b) will consist of transactions that are not complex, and (c) do not require the use of significant accounting estimates. Accounts such as inventories, marketable securities, assets whose use is limited, property and equipment, long-term debt, and equity frequently have these characteristics and may allow the auditor to assess inherent risk as being at a relatively low level. However, in certain circumstances, such as investments in complex derivative financial instruments, inherent risk may be higher. The auditor should use professional judgment in evaluating the factors relevant to assessments of inherent risk.

2.09 Because of the large monetary amounts and the complexity of determining health care service revenue and receivables, there are risks associated with health care service revenue recognition and the valuation of the related receivables. A significant portion of services usually is paid for by third parties such as Medicare, Medicaid, and various health insurance carriers under statutory provisions or other arrangements in amounts that can be significantly different from, and frequently less than, the entity's established rates.

2.10 Risks are associated with recognizing the liability for costs incurred by providers of prepaid health care services (for example, HMOs) because such costs may have been incurred but not yet reported to the providers. It is therefore necessary to estimate the liability for those costs. These estimates often require a high degree of management judgment. Management must consider historical experience as well as the effects of any changes in conditions such as seasonality trends and changes in subscriber population and in the services and benefits provided.

2.11 Risks also are associated with contingencies for uninsured medical malpractice losses and obligations under continuing care contracts. A high degree of management judgment and complex analyses usually are involved in evaluating the related financial statement assertions.

2.12 The risk of errors, irregularities, or illegal acts by clients is present in all audit engagements. SAS No. 53, *The Auditor's Responsibility to Detect and*

Report Errors and Irregularities (AICPA, *Professional Standards*, vol. 1, AU sec. 316A),* and SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317), describe the auditor's responsibilities for detecting these matters in an audit of financial statements. They also describe the auditor's responsibilities for communicating detected errors, irregularities, and illegal acts to parties within and external to the entity.

2.13 The presence of some factors in isolation would not necessarily indicate increased risk. In assessing risk, the following management characteristics may be considered:

- a. Management operating and financing decisions are dominated by a single person.
- b. Management places undue emphasis on meeting earnings projections.
- c. Management's reputation in the business community is poor.
- d. Management compensation is influenced by earnings.
- e. Management lacks experience in dealing with complex matters such as third-party payment regulations or contracts and medical malpractice risks.

2.14 The following operating and industry characteristics also may be considered in assessing risk:

- a. The profitability of the entity is significantly less than the industry average or inconsistent with the industry.
- b. Operating results are significantly less than projected results.
- c. Market share is decreasing.
- d. Decision making is decentralized and lacks adequate monitoring.
- e. Internal or external matters exist that raise substantial doubt about the entity's ability to continue as a going concern.

2.15 In assessing risk, the following engagement characteristics also may be considered:

- a. Many contentious or difficult accounting issues are present.
- b. The number and complexity of third-party payor contracts have increased.
- c. Final settlements with third-party payors have resulted in substantial revisions to prior estimates.
- d. The number or amount of adjustments in prior periods has been significant.

* SAS No. 53 is superseded by SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), which describes the auditor's responsibilities to plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free of material misstatements, whether caused by error or fraud, and provides guidance on what should be done to meet those responsibilities. SAS No. 82 was issued in February 1997 and is effective for audits of financial statements for periods ending on or after December 15, 1997, with earlier application permitted. In addition SAS No. 82 amends SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312), and SAS No. 1, sections 110, *Responsibilities and Functions of the Independent Auditor*, and 230, *Due Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU secs. 110 and 230). This Guide will be amended to conform to SAS No. 82 nearer to the pronouncement's effective date.

Internal Control^[1]

2.16 SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), describes the components of internal control and explains how an independent auditor should consider internal control in planning and performing an audit. Internal control is a process—effected by an entity's board of directors, management, and other personnel—designed to provide reasonable assurance regarding the achievement of objectives in the following categories: (a) reliability of financial reporting, (b) effectiveness and efficiency of operations, and (c) compliance with applicable laws and regulations. Internal control consists of the following five interrelated components:

- a. Control environment
- b. Risk assessment
- c. Control activities
- d. Information and communication
- e. Monitoring

2.17 The auditor should obtain an understanding of each of the five components of internal control sufficient to plan the audit by performing procedures to understand the design of controls relevant to an audit of financial statements and whether the controls have been placed in operation.

2.18 After obtaining an understanding of the components of internal control, the independent auditor assesses control risk for the assertions embodied in the account balance, transaction class, and disclosure components of the financial statements. The independent auditor uses the knowledge provided by the understanding of internal control and the assessed level of control risk in determining the nature, timing, and extent of substantive tests for financial statement assertions.

Analytical Procedures

2.19 SAS No. 56, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 329), provides guidance on the use of analytical procedures and requires their use in the planning and overall review stages of all audits. For planning purposes, these procedures should focus on (a) enhancing the independent auditor's understanding of the client's business and the transactions and events that have occurred since the last audit date and (b) identifying areas that may represent specific risks relevant to the audit. Thus, the objective of the procedures is to identify such things as the existence of unusual transactions and events, as well as amounts, ratios, and trends that might indicate matters that have financial statement and audit planning ramifications. For overall review purposes, these procedures should focus on considering the adequacy of the evidence gathered in response to unusual or unexpected balances or relationships. The objective of the procedures is to assist the auditor in assessing the conclusions reached and evaluating the over-

^[1] [Footnote deleted.]

all financial statement presentation. Analytical procedures also may be used as substantive tests to identify potential misstatements. These procedures focus on comparing actual balances with expected balances and investigating and evaluating significant differences from the balances expected.

2.20 Examples of sources of information for developing expectations include prior-period financial information, budgets, and health care financial and statistical ratios. Additional information is available from the Center for Healthcare Industry Performance Studies' (CHIPS) Financial Analysis Service, which is published annually, as well as other health care industry associations.

2.21 Following are examples of analytical procedures the independent auditor may find useful:

- Comparison of account balances with budget and prior-period amounts
- Analysis of changes in revenues during the current period based on statistical data (for example, admissions, patient days, visits, and professional service procedure counts for laboratory, radiology, and surgery) and information concerning price changes
- Comparison between periods of the number of days of revenue in receivables
- Relationship between periods of the allowance for uncollectible accounts to the balance of patient accounts receivable in the aggregate, based on known changes in the accounts receivable's aging and composition by payor
- Relationship between periods of the liability for claims incurred but not reported (IBNR) to the related expense

Accounting Estimates

2.22 In determining the scope of audit procedures to be performed, the independent auditor should recognize that certain areas of health care organization operations require accounting estimates that may be material in the preparation and presentation of financial statements. SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*,² requires entities to include in their financial statements information about the use of estimates in the preparation of financial statements. In addition, if certain specified disclosure criteria are met, the SOP requires entities to include disclosures about certain significant estimates in their financial statements. (SOP 94-6 is effective for financial statements issued for fiscal years ending after December 15, 1995.) SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342), provides guidance on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates in an audit of financial statements in accordance with GAAS.

2.23 Although management is responsible for making estimates, the independent auditor is responsible for evaluating the reasonableness of estimates and should consider appropriate procedures in planning and performing the audit. These procedures should include both subjective and objective factors.

² SOP 94-6 does not pertain to governmental entities, unless the entity has elected to follow all FASB pronouncements under paragraph 7 of GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*. (See chapter 1, footnote 1.)

2.24 The independent auditor should acquire an understanding of the relevance of internal control to the accumulation of data and the preparation of accounting estimates. Internal control should also provide for adequate review and approval of accounting estimates by appropriate levels of authority.

2.25 Although significant accounting estimates may affect many elements of a health care organization's financial statements, they most often affect the following:

- a. The provision for third-party payor contractual adjustments and allowances and the provision for estimated receivables and payables for final settlements with those payors
- b. The provision for uncollectible accounts
- c. Accruals for uninsured medical malpractice claims
- d. Accruals for obligations under continuing care contracts
- e. Accruals by providers of prepaid health care services for IBNR costs

Individual Practice Associations

2.26 In planning the audit of an individual practice association (IPA), the auditor usually considers the following matters:

- The size of a typical IPA accounting department and business office often is not large enough to result in effective segregation of duties. However, most IPAs have an active office manager who can exercise a high degree of influence and control over the operations.
- Physician compensation arrangements often use incentives or other features with complicated methodologies and formulas.
- Contracts with managed care plans, often with capitated payment and risk pool settlement terms, frequently represent a significant amount of revenue for the IPA.

2.27 IPAs with capitated contracts accrue costs when the services are rendered, including cost estimates of IBNR claims. The IBNR accrual includes an estimate of the costs of services for which the IPA is responsible, including referrals outside the IPA. Risk pool settlements should be accrued during the contract period based on relevant factors, such as experience to date.

Other Planning Considerations

2.28 In planning the audit, the independent auditor also should consider—

- Matters relating to the entity's business and the health care industry.
- Financial statement items likely to require adjustment.
- Conditions that might require extension or modification of audit tests (such as the existence of related party transactions) or the existence of uninsured malpractice risks.
- The entity's experience with payment denials and other matters subject to review by medical review organizations.
- The nature of reports expected to be rendered. Examples include reports on consolidated or consolidating financial statements, reports on financial statements filed with the Securities and Exchange Commission (SEC), reports filed with third-party payors or other regulatory bodies, and other special reports.

2.29 Planning procedures usually include reviewing the independent auditor's files relating to the entity and holding discussions with audit personnel and the personnel of the entity. Examples of these procedures include the following:

- Review correspondence files, the prior year's working papers, permanent files, financial statements, and independent auditors' reports.
- Review the minutes of meetings of the governing board of directors and board committees.
- Review the relationship of affiliated organizations to the health care organization and determine the extent to which their financial information should be included in the financial statements of the entity. (See the related discussion in chapter 11.)
- Review the status of unsettled cost (reimbursement) reports for prior periods filed with third-party payors.
- Discuss matters that may affect the audit with the firm's personnel responsible for any nonaudit services to the entity.
- Identify situations for which accounting estimates are required and relevant factors that may affect those estimates.
- Inquire about current business developments affecting the entity.
- Read the current year's interim financial statements and 10-Q forms.
- Review periodic reports to third-party payors or other regulatory bodies.
- Discuss the nature, scope, and timing of the engagement with the entity's management, board of directors, or audit committee.
- Consider the effects of all applicable accounting and auditing pronouncements, particularly recent pronouncements.
- Coordinate the assistance of entity personnel in data preparation.
- Determine the extent of involvement, if any, of consultants, specialists, and internal auditors.
- Establish the timing of the audit work.

2.30 The independent auditor may find it helpful to maintain a permanent file that includes copies of the following documents relating to the health care organization:

- a. Articles of incorporation
- b. Bylaws
- c. Chart of accounts
- d. Organization chart
- e. Specific documents concerning restrictions on donor gifts and bequests
- f. Contracts and agreements, including leases, agreements with physicians, agreements with third-party payors, and agreements with affiliated organizations
- g. Description of internal control
- h. Loan agreements, bond indentures, and other debt instruments

2.31 The independent auditor should understand the specific cost-finding or other rate-setting methods used by third-party payors to determine final

amounts reimbursable to the health care organization. These payment methods may require that a health care organization accumulate and report various statistical data, such as admissions, discharges, patient days, visits, beds, square footage, and pounds of laundry.

2.32 The independent auditor intending to use audit-sampling procedures should refer to SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350), when planning the work to be done.

2.33 If the health care organization has an internal audit function, the independent auditor should also refer to SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 322).

Transactions Processed by Service Organizations

2.34 Providers of health care services may use outside service organizations to perform tasks requiring specialized skills or equipment. Services provided by such organizations include either executing transactions and maintaining the related accountability or recording transactions and processing related data or both. Examples of service organizations used by health care organizations include the following:

- Bank trust departments that invest and hold assets whose use is limited
- Electronic data processing (EDP) service bureaus that process payroll
- Billing entities that prepare reimbursement claims to insurers and other third parties
- Administrators of employee benefit plans who process and pay benefit claims and maintain participant records

2.35 SAS No. 55, as amended by SAS No. 78, states that the auditor should obtain an understanding of each of the components of internal control sufficient to plan the audit and to assess control risk. SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), explains the considerations an auditor should make in fulfilling this responsibility when an entity uses a service organization to process transactions. The auditor of a health care organization should determine whether a service organization is used and obtain an understanding of the service organization's internal control regarding such transactions to the extent necessary to plan the audit. This understanding may be obtained by one or any combination of the following:

- a. Considering information such as user manuals available at the health care organization
- b. Considering information obtained directly from the service organization in response to a request from the health care organization
- c. Obtaining and considering a service auditor's report

2.36 The auditor uses the understanding obtained to assess control risk. In some cases, the auditor may conclude that it would be efficient to perform procedures to obtain evidential matter about the operating effectiveness of certain controls involving transactions processed by the service organization to provide a basis for assessing control risk below the maximum. Procedures to evaluate operating effectiveness include one or any combination of the following:

- a. Performing tests of controls at the health care organization
- b. Performing tests of controls at the service organization
- c. Obtaining a service auditor's report that describes the results of tests of operating effectiveness performed by the service auditor

Other Audit Considerations

Illegal Acts

2.37 The Social Security Act provides for criminal penalties for individuals or entities that offer, pay, solicit, or receive remuneration to induce business that is reimbursed under Medicare or state health care programs. The types of remuneration covered by the Medicare Anti-Kickback Statute include, with certain exceptions, kickbacks, bribes, and rebates made directly or indirectly, overtly or covertly, and in cash or in kind. In addition, prohibited conduct includes not only remuneration intended to induce referrals or patients but also remuneration intended to induce the purchasing, leasing, ordering, or arranging for any good, facility, service, or item paid for by Medicare or state health care programs. In addition, fraudulent activities may exist that are unrelated to Medicare or state programs, such as fraudulent billing and admitting practices.

2.38 The auditor's procedures will vary based on his or her assessment of the risk of material misstatement resulting from such illegal acts. SAS No. 54 states that the auditor should plan and perform the audit to provide reasonable assurance of detecting illegal acts having a direct and material effect on the determination of financial statement amounts. SAS No. 54 also notes that an audit in accordance with GAAS does not include audit procedures specifically designed to detect illegal acts that have only an indirect effect on the financial statements (for example, illegal acts that have a material effect as the result of fines or penalties that may be imposed on the entity) and provides guidance on the auditor's responsibilities when specific information concerning the possible existence of this type of illegal act comes to the auditor's attention.

2.39 Examples of laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of amounts in financial statements of health care organizations include tax laws affecting tax accruals and tax expense as well as Medicare and Medicaid laws directly affecting the amount of revenue recognized during the accounting period (such as those concerning the submission of bills for fictitious patients).

2.40 Health care organizations also may be affected by many other laws and regulations such as those related to Medicare and Medicaid fraud and abuse, securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment opportunities, and price-fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity's operating aspects than to its financial and accounting aspects, and their financial statement effect is only indirect. An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. For example, patients may be obtained based on illegal arrangements with physicians or other providers. While the direct effects of the services rendered may be recorded appropriately, their indirect effects, the

possible contingent liability for violating Medicare and Medicaid fraud and abuse statutes, may not be appropriately disclosed. Even when violations of such laws and regulations can have consequences material to the financial statements, auditors may not become aware of the existence of the illegal act unless he or she is informed by the client, or there is evidence of a governmental agency investigation or enforcement proceeding in the records, documents, or other information normally inspected in an audit of financial statements.

2.41 Whether an act is, in fact, illegal is a determination that is normally beyond the auditor's professional competence. The auditor's training, experience, and understanding of the client and the industry may provide a basis for recognizing that some acts coming to the auditor's attention may be illegal. However, determining whether a particular client act is illegal generally would be based on the advice of an informed expert qualified to practice law or may have to await final determination by a court of law. For example, determining whether admitting a patient or providing a service is medically necessary or whether a particular procedure or device was properly approved is not within the auditor's professional competence.

Use of a Specialist

2.42 SAS No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 336), provides guidance to the auditor who uses the work of a specialist in performing the audit of a health care organization's financial statements. Guidance is provided on deciding when to use a specialist, the auditor's responsibilities for evaluating the qualifications and the work of the specialist, and using the findings of the specialist. The Statement requires the auditor to evaluate the relationship of the specialist to the client and states that the auditor should perform additional procedures if the auditor concludes that the objectivity of the specialist may be impaired by such a relationship.

Clinical Coding Validations

2.43 Typically, a number of clinicians (e.g., the attending physician, consulting physicians, radiologists, pathologists, therapists, and nurses) add documentation to a patient's medical record. Provider personnel generally review the medical record and assign a code (ICD-9-CM or CPT-4 code) to the record. The provider prepares and submits a bill that includes, among other things, the assigned ICD-9-CM or CPT-4 code. The Medicare Fiscal Intermediary or other third-party payor typically reviews the bill and assigns it a specific payment code, such as a Diagnostic Related Group (DRG) number. Payment is based on the DRG or other payment code assigned. The provider may check the payment code assigned and follow up on any discrepancies identified. However, since the assignment of the payment code is made by the third-party payor, responsibility for correct assignment rests with that payor.

2.44 Errors can occur throughout this process. Physicians or other clinicians may not document the appropriate procedure. Coding personnel may not notice or interpret certain items in the medical record correctly. Accordingly, an incorrect code may be assigned and an erroneous amount may be paid.

2.45 An auditor ordinarily would not find it necessary to consider the process of assigning codes in planning and performing an audit of the provider's financial statements. However, the auditor should be alert for indications of potential material misstatements of the financial statements re-

sulting indirectly from such matters. For example, the auditor may become aware that a retrospective review has been performed or that an investigation has been completed or is in process. In such circumstances, the auditor should consider whether performance of additional substantive audit procedures is necessary to reduce audit risk to an acceptable level.

Going-Concern Considerations

2.46 SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341), provides guidance to the independent auditor conducting an audit on how to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern. Continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. Ordinarily, information that significantly contradicts the going-concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revision of its operations, or similar actions. SAS No. 59 states that the independent auditor has a responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited.

2.47 Noncompliance with donor-imposed restrictions should be disclosed if there is a reasonable possibility that a material contingent liability has been incurred at the date of the financial statements or there is at least a reasonable possibility that the noncompliance could lead to a material loss of revenue or could cause an entity to be unable to continue as a going concern. If the noncompliance results from an organization's failure to maintain an appropriate composition of assets in amounts needed to comply with all donor restrictions, the amounts and circumstances should be disclosed.

Communication

Communication of Matters Related to Internal Control

2.48 SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), provides guidance in identifying and reporting conditions related to an entity's internal control that are observed during an audit of the financial statements. It is contemplated that the communication generally would be to the audit committee or, in organizations that do not have an audit committee, to those with an equivalent level of authority and responsibility such as the board of directors, the owner in an owner-managed enterprise, or the individuals who engaged the independent auditor. Conditions noted by the independent auditor that are considered reportable under SAS No. 60 should be reported, preferably in writing. If information is communicated orally, the independent auditor should document the communication by appropriate memoranda or notations in the working papers.

Communication With Audit Committees

2.49 SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), establishes a requirement for the inde-

pendent auditor to determine that certain matters related to the conduct of an audit are communicated to those with responsibility for oversight of the financial reporting process. The communications required by SAS No. 61 are applicable to (a) entities that either have an audit committee or otherwise have formally designated oversight of the financial reporting process to a group equivalent to an audit committee (such as a finance committee or a budget committee) and (b) all SEC engagements as defined in SAS No. 61. In addition, communication with the audit committee or its equivalent by the independent auditor on certain specified matters when they arise in the conduct of an audit is required by other standards, including SAS No. 53^{*} and SAS No. 54.

Client Representations

2.50 SAS No. 19, *Client Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333), provides guidance to the independent auditor about the representations to be obtained from management as part of an audit. The specific written representations to be obtained depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. Paragraph 4 of SAS No. 19 lists matters ordinarily included in management's representation letter. Independent auditors of health care organizations also might obtain representations, if applicable, of the following:

- The health care organization is in compliance with the provisions of Internal Revenue Code (IRC) sec. 501(c)(3) and is exempt from federal income tax under IRC sec. 501(a), as evidenced by a determination letter.
- Information returns have been filed on a timely basis.
- Provision has been made, when material, for estimated retroactive adjustments by third-party payors under reimbursement agreements.
- The health care organization is in compliance with bond indentures or other debt instruments.
- Pending changes in the organizational structure, financing arrangements, or other matters that could have a material effect on the financial statements of the entity are properly disclosed.
- The health care organization is in compliance with contractual agreements, grants, and donor restrictions.
- The health care organization has maintained an appropriate composition of assets in amounts needed to comply with all donor restrictions.
- All assets and liabilities under the entity's control have been included in the financial statements.
- The internal controls over the receipt and recording of contributions received are adequate.
- Reclassifications between net asset classes is proper.

^{*} SAS No. 53 is superseded by SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), which describes the auditor's responsibilities to plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free of material misstatements, whether caused by error or fraud, and provides guidance on what should be done to meet those responsibilities. SAS No. 82 was issued in February 1997 and is effective for audits of financial statements for periods ending on or after December 15, 1997, with earlier application permitted. In addition SAS No. 82 amends SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312), and SAS No. 1, sections 110, *Responsibilities and Functions of the Independent Auditor*, and 230, *Due Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU secs. 110 and 230). This Guide will be amended to conform to SAS No. 82 nearer to the pronouncement's effective date.

Single Audit Act and Related Audit Considerations

2.51 An independent auditor may be engaged to audit the financial statements of a health care organization that expends federal awards from a governmental agency in accordance with the Single Audit Act Amendments of 1996 and Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Financial assistance may take the form of grants, contracts, loans, loan guarantees, property, cooperative agreements, interest subsidies, and insurance or direct appropriations.

2.52 OMB Circular A-133 prescribes policies, procedures, and guidelines to implement the Single Audit Act Amendments of 1996 and requires state and local governments and not-for-profit organizations that expend total federal awards equal to or in excess of \$300,000 in a fiscal year to have an audit performed in accordance with the Act and OMB Circular A-133.

2.53 Institutions covered by OMB Circular A-133 include both not-for-profit hospitals and institutions of higher education and public hospitals and institutions of higher education, and their affiliated hospitals, voluntary health and welfare organizations and other community-based organizations. Medicare payments to a non-federal entity for providing patient care services to Medicare eligible individuals are not considered federal awards expended under OMB Circular A-133. Medicaid payments to a subrecipient for providing patient care services to Medicaid eligible individuals are not considered federal awards expended under OMB Circular A-133 unless a state requires the funds to be treated as federal awards expended because reimbursement is on a cost-reimbursement basis.^[3]

2.54 OMB Circular A-110 establishes standard requirements (such as insurance, record retention, and banking) for obtaining consistency and uniformity among federal agencies in the administration of grants to and agreements with public and private hospitals and other entities. OMB Circular A-87, *Cost Principles for State and Local Governments*, establishes principles and standards for determining allowable costs incurred by state and local governments under grants, contracts, and other agreements. OMB Circular A-21, *Cost Principles for Educational Institutions*, and OMB Circular A-122, *Cost Principles for Nonprofit Organizations*, establish principles and standards for determining allowable costs incurred by educational institutions and not-for-profit organizations under grants, contracts, and other agreements.

2.55 SAS No. 74, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AICPA, *Professional Standards*, vol. 1, AU sec. 801), provides general guidance on applying the requirements of SAS No. 53* and SAS No. 54 in audits of governmental entities and entities that receive governmental financial assistance. The Statement explains the requirements of the financial audit stand-

^[3] [Footnote deleted.]

* SAS No. 53 is superseded by SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), which describes the auditor's responsibilities to plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free of material misstatements, whether caused by error or fraud, and provides guidance on what should be done to meet those responsibilities. SAS No. 82 was issued in February 1997 and is effective for audits of financial statements for periods ending on or after December 15, 1997, with earlier application permitted. In addition SAS No. 82 amends SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312), and SAS No. 1, sections 110, *Responsibilities and Functions of the Independent Auditor*, and 230, *Due Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU secs. 110 and 230). This Guide will be amended to conform to SAS No. 82 nearer to the pronouncement's effective date.

ards contained in *Government Auditing Standards* (the Yellow Book) issued by the Comptroller General of the United States and their relationship to GAAS. It also provides general guidance on testing compliance with requirements applicable to federal financial assistance programs. The Statement clarifies that the entity, rather than the independent auditor, is responsible for arranging for audits that meet all applicable requirements and provides guidance on communications the auditor should make upon becoming aware that the entity may be subject to an audit requirement that may not be satisfied by his or her engagement.

2.56 At the date of issuance of this Guide, the AICPA is working on a new SOP to address specific guidance on the new requirements of the Single Audit Act Amendments of 1996 and OMB Circular A-133. This SOP will supersede SOP 92-9, *Audits of Not-for-Profit Organizations Receiving Federal Awards*, and certain sections of the Audit and Accounting Guide *Audits of State and Local Governmental Units*. Auditors should be alert for revised AICPA guidance in this area.

Chapter 3

Cash and Cash Equivalents

Accounting and Financial Reporting

3.01 Cash and cash equivalents should include all cash and highly liquid investments that are both (a) readily convertible to cash and (b) so near to maturity that they present insignificant risk of changes in value because of changes in interest rates, in accordance with paragraph 8 of FASB Statement No. 95, *Statement of Cash Flows*, and paragraph 9 of GASB Statement No. 9, *Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities That Use Proprietary Fund Accounting*. For fiduciary purposes, separate checking or savings accounts may be maintained for restricted donations. Such accounts, however, are not reported on a line separate from other cash and cash equivalents because donor restrictions generally relate to limitations on the use of net assets rather than on the use of specific assets.¹ However, cash and claims to cash that (a) are restricted as to withdrawal or use for other than current operations, (b) are designated for expenditure in the acquisition or construction of noncurrent assets, (c) are required to be segregated for the liquidation of long-term debts, or (d) are required by a donor-imposed restriction that limits their use to long-term purposes are reported separately and are excluded from current assets. Internally designated funds should be reported separately from externally designated funds either on the face of the balance sheet or in the notes to the financial statements. If the form of the assets is not evident from the description on the balance sheet, the form of the assets should be disclosed in the notes to the financial statements. GASB Statement No. 9, paragraph 8, provides that a governmental health care enterprise's statement of cash flows should explain the change in all cash and cash equivalents, regardless of any restrictions on their use.

Agency Funds

3.02 Health care organizations may receive and hold assets owned by others under agency relationships; for example, they may perform billing and collection services for physicians. In accepting responsibility for those assets, an organization incurs a liability to the principal under the agency relationship to return the assets in the future or, if authorized, to disburse them to another party on behalf of the principal. Agency funds are reported as unrestricted assets. Transactions involving receipt and disbursement of agency funds are discussed in paragraph 11.23. In September 1996, the FASB issued Interpretation No. 42, *Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power* (an interpretation of FASB Statement No. 116, *Accounting for Contributions Made and Contributions Received*), which provides guidance relating to situations where the recipient organization has the unilateral power to redirect the use of the assets away from the

¹ A columnar presentation that highlights the three classes of net assets (that is, permanently restricted, temporarily restricted, and unrestricted) is not precluded if the totals for the reporting entity as a whole are displayed.

specified beneficiary (see paragraph 11.23). The FASB is also considering the proper accounting for situations in which a donor specifies a third-party beneficiary, including accounting by that beneficiary for the contributions received.

Disclosures

3.03 If the provider has concentrations of credit risk related to financial instruments such as certificates of deposit or money market mutual funds, the disclosure requirements of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*,² should be followed. Examples of potential exposure to credit risk include funds deposited with a single financial institution in excess of Federal Deposit Insurance Corporation (FDIC) limits and investments in obligations that are not insured or guaranteed by the government. For governmental health care enterprises, GASB Statement No. 3, *Deposits with Financial Institutions, Investments (including Repurchase Agreements), and Reverse Repurchase Agreements*, requires certain disclosures about deposits, including credit risk classification of bank balances that are not entirely insured.

Auditing

3.04 There are no unique auditing considerations with respect to cash and cash equivalents recorded by health care organizations.

² This pronouncement is not applicable to governmental health care enterprises that do not apply paragraph 7 of GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*. (See chapter 1, footnote 1.)

Chapter 4

Investments

Accounting

4.01 This chapter discusses the accounting and reporting for investments of health care entities other than (a) equity investments accounted for under the equity method or (b) investments in consolidated subsidiaries. Discussions pertaining to those two types of investments are included in chapter 11.

4.02 The accounting for investments in equity securities that have readily determinable fair values and all investments in debt securities is discussed in paragraphs 4.03 through 4.12. Other types of investments (such as real estate or oil and gas interests) are reported at amortized cost and are subject to impairment considerations consistent with FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*.¹

Investments in Debt Securities and Certain Equity Securities

4.03 This section discusses the accounting and reporting for investments in equity securities that have readily determinable fair values and all investments in debt securities held by (a) investor-owned entities, (b) not-for-profit organizations, and (c) governmental entities.

Investor-Owned Entities

4.04 Investor-owned providers are subject to the accounting and reporting requirements of FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. FASB Statement No. 115 defines three categories into which an enterprise classifies investments. The accounting and reporting differ by category. Investments in debt securities that the enterprise has the positive intent and ability to hold to maturity are classified as *held-to-maturity securities* and are reported at amortized cost. Debt and equity securities that are bought and held principally for the purpose of selling them in the near term are classified as *trading securities* and reported at fair value, with unrealized holding gains and losses included in income. However, an enterprise is not precluded from classifying at acquisition a security it plans to hold for a longer period as a trading security. Investments in debt securities that are not classified as held-to-maturity or trading and equity securities that are not classified as trading are classified as *available-for-sale securities* and reported at fair value, with unrealized holding gains and losses excluded from income and reported in a separate component of shareholders' equity.

4.05 Investor-owned entities should follow the disclosure requirements of FASB Statement No. 115.

¹ This pronouncement is not applicable to governmental health care enterprises that do not apply paragraph 7 of GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*. (See chapter 1, footnote 1.)

Not-for-Profit Organizations

4.06 Not-for-profit organizations should report investments in equity securities with readily determinable fair values and all debt securities at fair value on the balance sheet consistent with FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*. Investment return, including realized and unrealized gains and losses, should be included as changes in net assets consistent with paragraphs 4.07 through 4.10.

4.07 Investment return (including realized and unrealized gains and losses) not restricted by donors or by law should be classified as changes in unrestricted net assets as follows:

- a. Included in the performance indicator (see paragraphs 10.16 and 10.17):
 - Dividend, interest, and other similar investment income
 - Realized gains and losses
 - Unrealized gains and losses on trading securities²
 - Other than temporary impairment losses
- b. Excluded from the performance indicator:
 - Unrealized gains and losses on other than trading securities

4.08 Except as described in paragraphs 4.09 and 4.10, investment return (including realized and unrealized gains and losses) restricted by donors or by law, should be classified as changes in temporarily or permanently restricted net assets consistent with the applicable restrictions.

4.09 Gains and investment income that are limited to specific uses by donor-imposed restrictions may be reported as increases in unrestricted net assets if the restrictions are met in the same reporting period as the gains and income are recognized, provided that the organization has a similar policy for reporting contributions received, applies the policy consistently from period to period, and discloses its accounting policy. The classification of these gains and investment income in unrestricted net assets should be consistent with paragraph 4.07.

4.10 In the absence of donor stipulations or law to the contrary, losses on the investments of a donor-restricted endowment fund³ shall reduce temporarily restricted net assets to the extent that donor-imposed temporary restrictions on net appreciation of the fund have not been met before the loss occurs. Any remaining loss shall reduce unrestricted net assets and shall be excluded from the determination of the performance indicator. If losses reduce the assets of a donor-restricted endowment fund below the level required by the donor stipulations or law, gains that restore the fair value of the assets of the endowment fund to the required level shall be classified as increases in unrestricted net assets and shall be excluded from the determination of the performance indicator.

² Trading securities are defined in FASB Statement No. 115, including any interpretations thereof.

³ Donors that create endowment funds can require that their gifts be invested in perpetuity or for a specified term. Some donors may require that a portion of income, gains, or both be added to the gift and invested subject to similar restrictions. It is generally understood that at least the amount of the original gift(s) and any required accumulations are not expendable, although the value of the investments purchased may occasionally fall below that amount. Future appreciation of the investments generally restores the value to the required level. In states that have enacted its provisions, the Uniform Management of Institutional Funds Act describes "historic dollar value" as the amount that is not expendable.

4.11 Not-for-profit organizations should follow the disclosure requirements of FASB Statement No. 124.

Governmental Entities

4.12 Governmental health care entities that apply paragraph 7 of GASB Statement No. 20 should follow the requirements of FASB Statement No. 115. GASB Statements No. 3, *Deposits with Financial Institutions, Investments (including Repurchase Agreements), and Reverse Repurchase Agreements*, No. 28, *Accounting and Financial Reporting for Securities Lending Transactions*, and GASB Interpretation No. 3, *Financial Reporting for Reverse Repurchase Agreements*, provide guidance on investment-related disclosures required by governmental entities as well as accounting for securities lending and reverse repurchase agreements. Practitioners should also be aware of a proposed GASB Statement, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, which was issued for public comment in March 1996. That proposal would require governmental health care enterprises to report many of their investments at fair value, with the effect of changes in value reported as a component of excess of revenues over expenditures.

Financial Statement Presentation

Entities Subject to FASB Statement No. 115 or FASB Statement No. 124

4.13 Securities should be reported as either current or noncurrent, as appropriate, under the provisions of ARB No. 43, *Restatement and Revision of Accounting Research Bulletins*, Chapter 3A.⁴

4.14 For cash flow reporting purposes, purchases, sales, and maturities of trading securities should be classified as cash flows from operating activities. Cash flows from purchases, sales, and maturities of all other securities should be classified as cash flows from investing activities. If investments in debt securities are reported as cash equivalents in accordance with FASB Statement No. 95, *Statement of Cash Flows*, or GASB Statement No. 9, *Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities That Use Proprietary Fund Accounting*, the notes to the financial statements should reconcile the reporting classifications used in the statement of financial position.

4.15 All health care organizations with investments that meet the definition of financial instruments set forth in FASB Statement No. 105, *Disclosure*

⁴ Chapter 3A of ARB No. 43 indicates in paragraph 4 that "the term *current assets* is used to designate cash and other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business." That paragraph further indicates that the term also comprehends "marketable securities representing the investment of cash available for current operations." Paragraph 5 indicates that "a one-year time period is to be used as a basis for the segregation of current assets in cases where there are several operating cycles occurring within a year." Paragraph 6 says that the "concept of the nature of current assets contemplates the exclusion from that classification of . . . cash and claims to cash which are restricted as to withdrawal or use for other than current operations, are designated for expenditure in the acquisition of construction of noncurrent assets, or are segregated for the liquidation of long-term debts." Cash and cash equivalents of permanent endowment funds held temporarily until suitable long-term investment opportunities are identified are included in the classification "long-term investments."

of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk, are subject to the disclosure requirements of FASB Statements No. 105 and No. 107, *Disclosures about Fair Value of Financial Instruments*. Organizations with derivative financial investments (for example, futures, forward, swap, and option contracts) are subject to the disclosure requirements in FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments*.⁵ Governmental health care entities are also required to disclose information about their investments in accordance with GASB Statements No. 3 and No. 28, GASB Technical Bulletin No. 94-1, *Disclosures about Derivatives and Similar Debt and Investment Transactions*, and GASB Interpretation No. 3.

4.16 The following example illustrates the accounting treatment and financial statement presentation for other-than-trading securities of a not-for-profit health care organization:

Facts

Other than trading securities are purchased in year 1 at a cost of \$100. At the end of year 1, the fair value of the securities is \$300. In year 2, the securities are sold for \$400.

Journal Entries

- Entry at the end of year 1 to adjust the recorded value of the securities to fair value:

Valuation allowance	200	
Change in net unrealized gains and losses on investments		200

- Entry at the end of year 2 to record the sale of the securities:

Cash	400	
Realized gain		300
Investments		100
Change in net unrealized gains and losses on investments	200	
Valuation allowance		200

As discussed in paragraph 4.07, *unrealized* gains and losses on other than trading securities are reported in the statement of operations *below* the performance indicator and *realized* gains and losses are reported in the statement of operations *above* the performance indicator.

Auditing*

4.17 Auditing objectives and procedures for investments of health care organizations generally are similar to those of other organizations. In addition, the independent auditor may need to consider the examples of specific auditing objectives, selected control activities, and auditing procedures that are presented in exhibit 4.1.

⁵ FASB Statements No. 105, No. 107, and No. 119 are not applicable to governmental health care enterprises that do not apply paragraph 7 of GASB Statement No. 20. (See chapter 1, footnote 1.)

* SAS No. 81, *Auditing Investments* (AICPA, *Professional Standards*, vol. 1, AU sec. 332), which supersedes SAS No. 1, section 332, *Long-Term Investments*, and deletes Interpretation No. 1 of section 332, "Evidential Matter for the Carrying Amount of Marketable Securities," provides guidance to auditors in auditing investments in debt securities and equity securities as defined in FASB Statement No. 115 and investments accounted for under APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*. SAS No. 81 is effective for audits of financial statements for periods ending on or after December 15, 1997. Early application is permissible.

Exhibit 4.1**Auditing Considerations**

<i>Financial Statement Assertions</i>	<i>Specific Auditing Objectives</i>	<i>Selected Control Activities</i>	<i>Auditing Procedures</i>
Existence and completeness; rights and obligations; and valuation	Marketable securities are fairly stated, properly classified, described, and disclosed.	An independent trustee manages the investments. The trustee's reports are reviewed by a responsible employee.	Verify existence through confirmation. Test the valuation of equity and debt securities not intended to be held to maturity by comparing the recorded values with the fair market values reported by the trustee or another independent source.
Valuation, rights, and obligations	Endowment funds are properly stated at their required value and related gains and losses are properly classified.	Value of endowment funds are reviewed periodically to ensure that the balance is at its required level.	Verified that value of endowments are at required levels through confirmation. Review treatment of gains and losses on endowment funds to ensure that they are properly classified.
Accuracy and completeness	Investment income and gains/losses are recorded in accordance with donor restrictions.	Review of investment transactions to ensure they are recorded in compliance with donor restrictions.	Test the recording of selected transactions to ensure amounts are properly classified in accordance with donor restrictions.

<i>Financial Statement Assertions</i>	<i>Specific Auditing Objectives</i>	<i>Selected Control Activities</i>	<i>Auditing Procedures</i>
Presentation and disclosure	Securities are properly classified.	Classification is monitored periodically and is based on management's intent or ability to dispose of excess funds that are available for operations within an operating cycle.	

Chapter 5

Receivables

5.01 Receivables may include amounts due for (a) health care services from patients, residents, third-party payors, and employers; (b) premiums and stop-loss insurance recoveries; (c) intercompany transactions; (d) promises to give in future periods (pledges); and (e) amounts due from employees, physicians, or others. All loans, such as loans to physicians, should be evaluated periodically for impairment. Loans that are included in the scope of FASB Statement No. 114, *Accounting by Creditors for Impairments of a Loan*,¹ should be evaluated based on the provisions of that statement. A loan is impaired when, based on current information and events, it is probable that the provider will be unable to collect all amounts due, including principal and interest, according to the contractual terms of the loan agreement. If the provider measures an impaired loan using a present value amount, the creditor should calculate that present value based on an estimate of the expected future cash flows of the impaired loan, discounted at the loan's effective interest rate.

5.02 Amounts realizable from third-party payors for health care services are usually less than the provider's full established rates for those services. The realizable amounts may be determined by (a) contractual agreement with others (such as Blue Cross plans, Medicare, Medicaid, or HMOs), (b) legislation or regulation (such as workers' compensation or no-fault insurance), or (c) provider policy or practice (such as courtesy discounts to medical staff members and employees or other administrative adjustments).

5.03 Revenue and the related receivables for health care services usually are recorded in the accounting records on an accrual basis at the provider's full established rates. The provision for contractual adjustments (that is, the difference between established rates and third-party payor payments) and discounts (that is, the difference between established rates and the amount collectible) are recognized on an accrual basis and deducted from gross service revenue to determine net service revenue. Contractual adjustments, discounts, and an allowance for uncollectibles are recorded to report the receivables for health care services at net realizable value. Estimates of contractual adjustments, other adjustments, and the allowance for uncollectibles are reported in the period during which the services are provided even though the actual amounts may become known at a later date. This later date may be (a) when the person is discharged, (b) subsequent to discharge or completion of service, (c) when the third party is billed, or (d) when payment or partial payment is received. As discussed in paragraph 10.03, the provision of charity care does not qualify for recognition as receivables or revenue in the financial statements.

Rate Setting

5.04 The independent auditor should be familiar with the rate-setting environment in which the entity operates and the regulations and contractual agreements that determine payments to be received for health care services.

¹ This pronouncement is not applicable to governmental health care enterprises that do not apply paragraph 7 of GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*. (See chapter 1, footnote 1.)

Payment rates established by regulations or contractual agreements may be determined either prospectively or retrospectively.

5.05 Prospective rate setting is a method used to set payment rates in advance of the delivery of health care services. Such payment rates determine what third parties will pay for health care services during the rate period (generally one year). Prospective rate setting may result from a contractual agreement with a third party, such as a Blue Cross plan, or it may be mandated through legislation. The intent of prospective rate setting is to establish payment rates before the period to which they will apply and that are not subject to change. The independent auditor should be aware, however, that some rate-setting methods described as prospective may include provision for retrospective adjustments and that some third parties pay prospective rates for certain services and retrospective rates for other services.

5.06 Under retrospective rate setting, third parties usually determine an interim payment rate and, during the rate period (generally one year), pay the health care organization for services rendered using that rate. After the rate period has ended, a final settlement is made in accordance with federal or state regulations or contractual agreements.

Estimated Final Settlements

5.07 Under a retrospective system, an entity may be entitled to receive additional payments or may be required to refund amounts received in excess of amounts earned under the system. Although final settlements are not made until a subsequent period, they are usually subject to reasonable estimations and are reported in the financial statements in the period in which services are rendered. Differences between original estimates and subsequent revisions (including final settlements) are included in the statement of operations in the period in which the revisions are made and disclosed, if material. Those differences are not treated as prior period adjustments unless they meet the criteria for prior period adjustments as set forth in FASB Statement No. 16, *Prior Period Adjustments*.

5.08 Rate-setting methods that are described as prospective but provide for retrospective adjustments are accounted for as retrospective rate-setting systems for the services to which they apply (see paragraph 5.07).

State Waiver Contingencies Under Medicare

5.09 Certain states (referred to as waiver states) have received permission to determine rates of payment for Medicare patients in accordance with a statewide rate-setting method different from the method used by the federal program. A condition for Medicare participation in a state waiver program typically requires that Medicare expenditures in that state not exceed prescribed limits. If Medicare expenditures exceed prescribed limits, the excess, depending on the conditions of the waiver, may be recoverable by the federal government. FASB Statement No. 5, *Accounting for Contingencies*, provides guidance with respect to accounting for loss contingencies, such as those arising under state Medicare waivers. GASB Statement No. 10, *Accounting and Financial Reporting for Risk Financing and Related Insurance Issues*, provides guidance with respect to accounting for contingencies by governmental entities.

Premiums and Stop-Loss Insurance Receivables

5.10 Some health care organizations contract to provide comprehensive health care services for a fixed period in return for fixed periodic premiums.

Many of those organizations may transfer a portion of their financial risks under the contract to another organization by purchasing stop-loss insurance. Receivables of those organizations may include uncollected premiums and amounts recoverable from stop-loss insurers reduced by appropriate valuation allowances. Chapter 13 provides guidance on applying GAAP for stop-loss insurance costs of providers of prepaid health care services. FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, also provides guidance on accounting for reinsurance contracts. Governmental entities should comply with the provisions of GASB Statement No. 10 which provides different guidance on accounting for reinsurance contracts than FASB Statement No. 113.

Promises to Give in Future Periods (Pledges)

5.11 Providers involved in fund-raising campaigns frequently are the recipients of promises to give² with payments due in future periods; pledge drives are a common example. FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*,³ establishes the accounting and financial reporting guidance for pledges and similar promises to pay; a general summary of that guidance is presented below. Specific guidance is provided in chapter 5 of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*. By specifying that they will adhere to future payment dates, donors implicitly indicate that their gift is to support activities in each period in which a payment is scheduled. Therefore, in any promise to give with payments due in future periods, a time restriction is implicit unless the donor explicitly states that the gift is to support current activities or other circumstances clearly point to that intent.

5.12 Promises to give fall into two broad categories: conditional and unconditional. Conditional promises to give depend on the occurrence of a specified future and uncertain event (for example, a stipulation that the provider must meet a matching requirement) whose occurrence or failure of occurrence gives the donor the right of return of the assets or releases the donor from the obligation to transfer assets in the future. Conditional promises to give are not recognized in financial statements until the conditions on which they depend are substantially met (that is, until the period in which the conditional promise becomes an unconditional promise). A transfer of assets in partial fulfillment of a conditional promise shall be accounted for as a refundable advance (that is, as a liability) until such time as the conditional promise becomes unconditional.⁴

5.13 Unconditional promises to give with payments due in future periods should be reported as receivables and as restricted support in the period the promise is received (unless explicit donor stipulations or circumstances surrounding the receipt of the promise make clear that the donor intended the

² To be recognized in financial statements there must be sufficient evidence in the form of verifiable documentation that a promise was made and received (FASB Statement No. 116, paragraph 6).

³ This pronouncement is not applicable to governmental health care enterprises. (See chapter 1, footnote 1.)

⁴ For accounting purposes, a conditional promise to give is considered unconditional if the possibility that the condition will not be met is remote. In the case of ambiguous donor stipulations, if a promise contains stipulations that are not clearly unconditional (that is, if the donor's stipulations are ambiguous), the promise is presumed to be a conditional promise. Additional guidance on distinguishing conditional promises from unconditional promises is provided in FASB Statement No. 116, paragraphs 22 and 23.

promise to be used to support activities of the current period). The expiration of those restrictions (or the expiration of a portion of the restriction) is recognized as the donor makes the future payment or payments. If the promise is to be paid in one future payment, the related temporarily restricted net assets will be transferred to unrestricted net assets in the period in which the payment is received. If the donor sets forth a schedule of future payments, a transfer from temporarily restricted net assets to unrestricted net assets is made in each period a payment is received. If other explicit donor restrictions are attached to the promise, such as that the gift be used for a specific purpose, the expiration of the restriction is recognized in the time period(s) when the donor makes the future payment(s) and when the stipulated purpose for which the assets were restricted has been fulfilled. In the period (or periods) that the restrictions expire, the temporarily restricted net assets (or the portion of the temporarily restricted net assets that relate to the particular payment installment) are reclassified as unrestricted net assets and reported in the statement of operations as net assets released from restriction.

5.14 In the year that unconditional promises to give cash are received, they should be measured at the present value⁵ of their estimated future cash flows. (Unconditional promises to give cash that are expected to be collected within one year of the financial statement date may be measured at their net realizable value.) In determining the estimated future cash flows of unconditional promises to give cash, not-for-profit organizations should consider when the receivable is expected to be collected, the creditworthiness of the other parties, the organization's past collection experience and its policies concerning the enforcement of promises to give, and other factors concerning the receivable's collectibility. If the fair value of unconditional promises to give cash decreases after initial measurement because of decreases in estimated future cash flows, the decrease should be recognized in the period(s) in which the expectation changes. Such decreases should be reported as expenses or losses (bad debt) in the net asset class in which the net assets are represented.⁶ Accretion of the discount element of the unconditional promise to give is accounted for as contribution income, which increases unrestricted, temporarily, or permanently restricted net assets, as appropriate.

5.15 With regard to pledges and other promises to pay in future periods, if a provider routinely conducts fund drives, an estimate of the future cash flows of a portfolio of short-term promises resulting from a mass fund-raising appeal may be made based on experience gained from similar appeals in prior years.

5.16 Chapter 5 of the Audit and Accounting Guide *Not-for-Profit Organizations* provides further guidance regarding accounting for promises to give in future periods.

Financial Statement Presentation

Accounts Receivable

5.17 Receivables are reported net of an allowance for doubtful accounts. Although the aggregate amount of receivables may include balances due from

⁵ FASB Statement No. 116 states that present value should be calculated using a discount rate commensurate with the risks involved.

⁶ As discussed in FASB Statement No. 116, all expenses should be reported as decreases in unrestricted net assets. Therefore, decreases in contributions because of changes in the estimated future cash flows should be reported as losses if they are decreases in temporarily restricted net assets or permanently restricted net assets.

patients and third-party payors (including final settlements and appeals), the amounts due from third-party payors for retroactive adjustments of items such as final settlements or appeals shall be reported separately in the financial statements.

5.18 Accounts receivable of health care organizations generally are subject to the same financial disclosure requirements as other business organizations. FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*,⁷ sets forth disclosure requirements regarding the carrying amount of patient accounts receivable.

5.19 FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*,⁸ requires disclosure of information about significant concentrations of credit risk from third parties and off-balance-sheet risk of accounting losses for all financial instruments, including trade accounts receivable. Concentration of credit risk frequently is an issue because most health care organizations generally tend to treat patients from their local or surrounding communities. Accordingly, disclosure should be made of the primary geographic sources of patients. It should be noted that concentration of credit risk may be a significant issue in stand-alone financial statements issued for a member hospital of a large national multi hospital system but may not be an issue for financial statements prepared for the hospital system. When the individual facilities' financial statements are consolidated into statements prepared for the entire system, the credit risk is dispersed over a much larger base of health plans, patients, and geographies and, therefore, is not as concentrated. Health care organizations with significant concentrations of credit risk should comply with the disclosure provisions of FASB Statement No. 105.

5.20 Off-balance-sheet risk exists when the possible accounting loss from a financial instrument is not reflected on the balance sheet. Health care organizations (most notably hospitals) may enter into arrangements where they will finance their patient accounts receivable as a cash flow management strategy. Organizations that enter into certain types of receivable financing arrangements should disclose their off-balance-sheet risk, in accordance with FASB Statement No. 105.

5.21 FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments*,⁹ requires disclosures about derivative financial instruments—futures, forward, swap, and option contracts; and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statements No. 105 and No. 107. GASB Technical Bulletin 94-1, *Disclosures about Derivatives and Similar Debt and Investment Transactions*, also applies to governmental health care enterprises.

5.22 FASB Statement No. 119 requires disclosures about amounts, nature, and terms of derivative financial instruments that are not subject to FASB Statement No. 105 because they do not result in off-balance-sheet risk of accounting loss. It requires that a distinction be made between financial in-

⁷ This pronouncement is not applicable to governmental health care enterprises that do not apply paragraph 7 of GASB Statement No. 20. (See chapter 1, footnote 1.)

⁸ See footnote 7.

⁹ See footnote 7.

struments held or issued for trading purposes (including dealing and other trading activities measured at fair value with gains and losses recognized in earnings)¹⁰ and financial instruments held or issued for purposes other than trading. FASB Statement No. 119 requires additional disclosures about those derivative financial instruments held for trading purposes, those held for purposes other than trading, and those accounted for as hedges of anticipated transactions.

Interfund Receivables

5.23 Interfund receivables (or payables) may exist in internal records. However, since general-purpose financial statements of not-for-profit health care organizations do not classify assets and liabilities into fund groups, interfund receivables (or payables) are eliminated. Such interfund balances and transactions are different from interfund transactions between a governmental health care enterprise fund and another fund, such as the general fund or a special revenue fund of a primary government, when the two funds are included in the same financial reporting entity. Governmental health care enterprises that are a part of a larger financial reporting entity, such as a city or a county, are required to report amounts that are receivable (or payable) to other funds or component units of the same financial reporting entity in their external financial reports.

Promises to Give in Future Periods (Pledges)

5.24 Contributions receivable should be reported net of an allowance for uncollectible amounts. That allowance may be based on the receivable's age, the creditworthiness of the parties, the organization's past collection experience and its policies concerning the enforcement of promises to give, and other factors concerning the receivable's collectibility. After the date of initial measurement, bad debt expense should be reported for the amount of promises to give that are expected to be uncollectible (see paragraph 5.12).

5.25 Recipients of unconditional pledges (promises to give in future periods) shall disclose—

- a. The amounts of promises receivable in less than one year, in one to five years, and in more than five years.
- b. The amount of the allowance for uncollectible promises receivable.

5.26 Recipients of conditional pledges (promises to give in future periods) shall disclose—

- a. The total of the amounts promised.
- b. A description and amount for each group of promises having similar characteristics, such as amounts of promises conditioned on establishing new programs, completing a new building, or raising matching gifts by a specified date.

Auditing

5.27 In general, receivables, particularly those arising from health care services, are material to the financial position of health care organizations.

¹⁰ See chapter 4 for further guidance relating to accounting for investments by not-for-profit entities.

Examples of specific auditing objectives, selected control activities, and auditing procedures that may be considered by the independent auditor as they relate to the major components of receivables of health care organizations are presented in exhibit 5.1 at the end of this chapter.

Accounts Receivable Confirmations

5.28 Direct confirmation of amounts due from discharged patients and third-party payors may be an appropriate audit procedure for obtaining evidence about the existence and accuracy of amounts due. However, many patients whose accounts are expected to be paid by a third-party payor may not have received bills, and many third-party payors may be unable to respond to confirmation requests on specific account balances. In addition, obtaining confirmation of receivables from patients who are not discharged may be impracticable because those patients may not know the amount of their indebtedness until they are discharged.

5.29 If confirmation of amounts due from patients and third-party payors is impracticable or determined not to be effective, the independent auditor should document this decision in accordance with SAS No. 67, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1, AU sec. 330), and should use alternate procedures such as—

- Performing an analytical procedure or testing the details of subsequent receipts.
- Reviewing third-party contracts or payment agreements.
- Comparing billings with documentation in medical records.
- Reviewing the results of third-party payor audits and, if available, peer review organization (PRO) reports.
- Examining or confirming interim payments with third-party payors.

	required disclosures are made.		amounts is disclosed properly. Determine that differences between original estimates and subsequent revisions (including final settlements) are included in the statement of operations in the period in which the revisions are made and disclosed, if material.

Chapter 6

Property and Equipment, Supplies, and Other Assets

Overview

6.01 Health care organizations use various types of property and equipment. Those assets may be material to the financial position of institutional health care organizations, such as hospitals and nursing homes. Typical accounts used to record property and equipment transactions are land, land improvements, buildings and improvements, leasehold improvements, equipment (fixed and movable), leased property and equipment, accumulated depreciation and amortization, and construction in progress.

6.02 Supplies usually are not material to the financial position of health care organizations. However, because of the volume of supply transactions, they may materially affect operations. Supplies typically include medical and surgical supplies; pharmaceuticals; linens, uniforms, and garments; food and other commodities; and housekeeping, maintenance, and office supplies.

6.03 Other assets may include prepaid expenses, deposits, and deferred expenses. Prepaid costs, such as amounts paid to physicians for future services (for example, administering a hospital department or providing community services that further the organization's mission) may be deferred and amortized over the period benefited. Such assets are classified as current or noncurrent as appropriate.

Accounting

6.04 Accounting for property and equipment, supplies, and other assets of health care organizations is similar to that used by other business organizations.

6.05 Depreciation and amortization of property and equipment are recorded in conformity with GAAP. Useful lives assigned to depreciable assets should be reasonable, based on the circumstances. The American Hospital Association publishes useful guidelines for classifications and estimated useful lives for property and equipment used by hospitals. Those guidelines also may be useful to other health care organizations. If there is a potential that an asset is impaired, health care organizations should consider the guidance in FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*.¹

6.06 The recognition of contribution income related to donated long-lived assets (or assets recognized to be acquired with donated funds) is discussed in chapter 10 of this Guide.

¹ This pronouncement is not applicable to governmental health care enterprises that do not apply paragraph 7 of GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*. (See chapter 1, footnote 1.)

Financial Statement Presentation

6.07 Financial statement presentation of property and equipment of health care organizations is similar to that of other business organizations. Property held for investment purposes should be presented as part of investments. Donor or legal restrictions on the proceeds from the disposition of donated property and equipment (or of property and equipment purchased with cash restricted for acquisition of long-lived assets) are disclosed.

6.08 Financial statement presentation of supplies and other assets of health care organizations is similar to that of other business organizations.

Auditing

6.09 Auditing objectives for property and equipment, supplies, and other assets of health care organizations are similar to those in audits of other business organizations. The auditor may be able to assess inherent risk for these accounts as being relatively low because the transactions therein are generally small in number, relatively simple in nature, and do not involve the use of complex estimates. The auditor should consider the characteristics of the entity and of the transactions occurring during the period when assessing inherent risk for these accounts.

6.10 A health care organization may have access to the use of property and equipment under a variety of arrangements. It may (a) own property and equipment, (b) rent property and equipment from an independent or related organization, (c) use property and equipment provided by a related organization (such as a religious order) or by an unrelated organization under an affiliation program, or (d) use property and equipment provided by a government agency or unit or a government-related hospital district. The independent auditor should inquire into (and the financial statements should disclose) the nature of any relationship between the health care organization and lessors, bailors, or other owners of property. With respect to leases, FASB Statement No. 13, *Accounting for Leases*, as amended and interpreted, provides accounting guidance.² GASB Statement No. 13, *Accounting for Operating Leases with Scheduled Rent Increases*, provides additional guidance for operating leases of governmental health care enterprises.

6.11 In evaluating capitalization policies, the independent auditor should consider whether interest has been capitalized in accordance with the provisions of FASB Statement No. 34, *Capitalization of Interest Cost*, and related amendments and FASB Statement No. 62, *Capitalization of Interest Cost in Situations Involving Certain Tax-Exempt Borrowings and Certain Gifts and Grants*.

6.12 In evaluating the entity's depreciation policies, the auditor may wish to refer to the American Hospital Association's *Estimated Useful Lives of Depreciable Hospital Assets*, which is revised periodically and sets forth plant asset classifications and the estimated useful lives of depreciable assets. The auditor also should be aware that social, economic, and scientific advances in the health care industry make obsolescence an important factor to be considered when evaluating depreciation policies and methods.

² For governmental health care enterprises, National Council on Governmental Accounting (NCGA) Statement No. 5, *Accounting and Financial Reporting Principles for Lease Agreements of State and Local Governments*, requires the application of FASB Statement No. 13 for proprietary activities and provides additional guidance on specific matters unique to governmental entities.

6.13 FASB Statement No. 121 requires that health care organizations review long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. In considering a health care organization's application of FASB Statement No. 121, auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. In addition to evaluating the entity's procedures for identifying indicators of impairment, the auditor should consider information obtained during the audit in determining whether the health care organization has identified appropriate indicators of impairment. For example, a change in the use of a facility from an acute-care hospital to an ambulatory surgery center may require that the asset be reviewed for impairment using the method prescribed by FASB Statement No. 121.

6.14 The independent auditor may need to consider the examples of specific auditing objectives, selected control activities, and auditing procedures relating to property and equipment that are presented in exhibit 6.1.

Exhibit 6.1

Auditing Considerations

<i>Financial Statement Assertions</i>	<i>Specific Auditing Objectives</i>	<i>Selected Control Activities</i>	<i>Auditing Procedures</i>
<i>Donated Property Equipment</i>			
Valuation	Donated property and equipment is reported at fair market value at the date of donation.	Procedures ensure that the donation of property and equipment is known and recorded and that documentation supports the determination of the fair market value.	Review the documentation supporting the determination of the fair market value.
Presentation and disclosure	The receipt of donated property and equipment is properly reported.		Review material donated property and equipment transactions to ensure the propriety of the reporting.
<i>Property and Equipment Not Held for Use in Operations</i>			
Presentation and disclosure	Property and equipment not used for operations is reported separately.	Property records segregate property and equipment not used for operating purposes.	Determine that property held for nonoperating purposes is reported separately.
<i>Property and Equipment Additions</i>			
Rights and obligations	The appropriate health care planning agency or other regulatory agency approvals, if required, have been obtained for property and equipment additions.	Management regularly monitors compliance with health care planning agency regulations related to additions of property and equipment.	For material new construction, determine compliance with health care planning agency or other regulatory agency requirements.

<i><u>Financial Statement Assertions</u></i>	<i><u>Specific Auditing Objectives</u></i>	<i><u>Selected Control Activities</u></i>	<i><u>Auditing Procedures</u></i>
		Additions are authorized in the capital budget.	
Existence and valuation	Recorded property and equipment are owned by the entity and are carried at the appropriate amounts.	Inventory of fixed assets is taken periodically. Detailed property records periodically are reconciled to the recorded amounts.	Review a summary of property and equipment (cost and accumulated depreciation) including additions, deletions, and transfers.

Chapter 7

Current Liabilities, Tax Considerations, and Long-Term Obligations

Overview

7.01 Current liabilities may include notes payable to banks; the current portion of long-term debt; accounts payable; advances from and amounts payable to third-party payors for estimated and final reimbursement settlements; refunds to and deposits from patients and others; deferred revenue; accrued salaries and payroll taxes; and other accruals such as pension or profit-sharing contributions, compensated absences, and income and other taxes. In addition, there may be a current portion of estimated malpractice costs and risk-contract recognized losses (see chapter 8).

7.02 Long-term obligations may include notes, mortgages, capital leases, bonds, and obligations under continuing care contracts. They also may include estimated malpractice cost and risk-contract recognized losses.

Accounting for Current Liabilities

7.03 Accounting for current liabilities of health care organizations is similar to that of other business enterprises. Health care organizations are usually labor-intensive and provide employees with compensated absences, such as for holidays, vacations, and illnesses. Liabilities related to such absences are accounted for in accordance with FASB Statement No. 43, *Accounting for Compensated Absences*. Governmental health care entities should follow the guidance in GASB Statement No. 16, *Accounting for Compensated Absences*.

7.04 Liabilities related to postretirement benefits other than pensions should be accounted for in accordance with FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, and postemployment benefits should be accounted for in accordance with FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits*. These two pronouncements are not required to be applied by governmental health care enterprises. GASB Statement No. 12, *Disclosure of Information on Postemployment Benefits Other Than Pension Benefits by State and Local Governmental Employers*, however, does require certain disclosures about postemployment benefits.

Tax Considerations for Not-for-Profit Health Care Organizations

7.05 Health care organizations that are owned and operated by a state or local government are exempt from federal income tax pursuant to IRC sec. 115 and also are exempt from the federal income tax filing requirements. Such organizations are exempt not only from regular federal income tax but also from the tax on unrelated business income. If a health care entity is owned and operated by a separately constituted authority or other legal entity, the entity's

management should consider whether such authority or other legal entity is organized properly to preserve qualification of the tax exemption pursuant to IRC sec. 115. In some cases, state or local governmental entities will secure tax-exempt status as an IRC sec. 501(c)(3) organization. If such an exemption is secured, the entity may become subject to federal income tax and the related filing requirements on the same basis as other tax-exempt entities.

Tax-Exempt Entities

7.06 Nongovernmental not-for-profit health care organizations usually seek exemption from federal income tax under IRC sec. 501(a). Under IRC sec. 501(a), entities organized and operated exclusively for religious, charitable, or educational purposes, as described in IRC sec. 501(c)(3), are exempt from federal income taxes. The following are additional requirements for such entities:

- a. No part of the entity's net earnings, either directly or indirectly, inures to any private shareholder or individual.
- b. No substantial part of the entity's activities consists of carrying on propaganda or otherwise attempting to influence legislation. (IRC sec. 501(h) provides a limited exception to the general rule that public charities may not incur expenditures to influence legislation.)
- c. The entity does not participate in, or intervene in, any political campaign on behalf of any candidate for public office.

7.07 The term *charitable* is used in IRC sec. 501(c)(3) in its generally accepted legal sense. Providing health care to the community is considered a charitable activity. Therefore, provided a health care entity is not organized or operated for the benefit of private interests (such as designated individuals, the founder or the founder's family, shareholders of the entity, or persons controlled directly or indirectly by such private interests), it generally would qualify as an IRC sec. 501(c)(3) organization.

7.08 The Internal Revenue Service (IRS) has ruled that in order for a nursing home to establish its exemption as a public charitable organization under IRC sec. 501(c)(3), it must be operated to meet the primary needs of the elderly for housing, health care, and financial security. Operating for financial security generally means that an individual will be maintained in residence even if such individual can no longer pay residence fees.

Private Inurement

7.09 Under IRC sec. 501(c)(3) no part of the net earnings of the charitable organization shall inure to the benefit of any private shareholder or individual. A private shareholder or individual refers to a person or persons having a private or personal interest in the activities of the organization. The IRS has stated that physicians have a personal or private interest in the activities of a hospital and could be subject to the private inurement proscription.

Unrelated Business Income Tax

7.10 Although not-for-profit organizations may be exempt from federal income tax, they nevertheless may be subject to tax on unrelated business income. The objective of the tax on unrelated business is to place such activities

on the same basis as that of taxable entities. Unrelated business income is the income from any regularly carried-on trade or business, the conduct of which is not substantially related to the exercise or performance of the organization's tax-exempt purpose or function. The fact that proceeds from an activity are used exclusively for the entity's tax-exempt purpose does not make the activity substantially related to its tax-exempt purpose or function. As is the case with most tax-related definitions, there are qualifications and exceptions. Some of the more significant exclusions from this tax include—

- An annual specific deduction for certain limited activities.
- Income from activities of which substantially all the work is performed by unpaid volunteers.
- Income from activities carried on for the convenience of the entity's patients, officers, or employees.
- Dividends, interest, annuities, royalties, capital gains and losses, and rents from real property—with two major exceptions. The first exception is that income from investments that are debt-financed and otherwise not functionally related to the tax-exempt purpose is taxable. The second major exception makes taxable the interest, annuities, royalties, and rents received from a controlled (80-percent-owned) taxable corporation or partnership unless this entity is engaged in an activity that would have been exempt if it were carried on directly by the not-for-profit organization.

Financial Statement Presentation

7.11 Financial reporting and disclosure requirements for current liabilities and long-term obligations of health care organizations are the same as for other business organizations. In addition, with respect to CCRCs, the method of accounting for advance fees, the method of calculating the obligation to provide future services and use of facilities, and the refund policy for refundable fees are disclosed in the financial statements. Chapter 14 describes other disclosure requirements applicable to CCRCs. Taxable entities have the same financial reporting and disclosure requirements as other commercial enterprises. Tax-exempt entities should disclose their tax-exempt status.

Long-Term Debt

7.12 Significant sums of money are required to replace and upgrade buildings and expand the facilities of health care organizations. As a result, health care organizations are dependent on external sources of funds to satisfy their capital needs. Most health care organizations finance acquisitions, additions, and renovations with long-term debt.

7.13 In addition to serving as a financing source for government operations, tax-exempt debt frequently is issued by state and local governments on behalf of nongovernmental organizations (for example, not-for-profit organizations) to foster private-sector participation in certain desirable community activities such as the provision of health care services. Tax-exempt bonds usually can be issued to obtain a higher ratio of project financing (up to 100 percent), a longer maturity period (up to thirty years), and a lower interest cost than taxable bonds. The majority of tax-exempt bonds issued by health care or-

ganizations are revenue bonds, which are bonds secured by a pledge of the entity's revenues. General obligation bonds are secured by the revenues of the issuing authority.

Financing Authorities

7.14 Because most providers legally cannot issue tax-exempt revenue bonds directly, a significant number of states have enacted legislation permitting health care organizations to borrow funds for capital projects by issuing bonds through financing authorities. Financing authorities are authorized to issue tax-exempt bonds or other obligations and use the proceeds for the benefit of the health care organization. To obtain project financing, a health care organization sometimes is required by a financing authority to enter into a lease arrangement, a sublease arrangement, or both. At other times, a lease or sublease arrangement is not required.

7.15 When a financing authority issues tax-exempt bonds or similar debt instruments and uses the proceeds for the benefit of a health care organization, the obligation is reported as a liability in the organization's balance sheet if the health care organization is responsible for repayment. In some cases, this obligation may take the form of a liability arising from a capital lease. If a health care organization has no obligation to make payments of principal and interest on the debt or capital or operating lease payments on related buildings or equipment, the organization should not reflect the liability on its balance sheet. In such circumstances, proceeds from the bond issue are reported as contributions from the sponsoring organization.

Assets Whose Use is Limited

7.16 Among the many provisions normally included in the bond indentures of tax-exempt issues are the requirements to set aside funds annually from operations to ensure that bond principal, interest payments, and other requirements are met. The treatment of funds established under the terms of debt-financing instruments is discussed in paragraph 1.14.

Advance Refundings

7.17 In an advance refunding, new debt is issued for the purpose of replacing an existing debt issue. Advance refundings enable providers to restructure their long-term liabilities, take advantage of reduced interest rates, or terminate restrictive bond covenants. The terms by which the debt may be satisfied legally and the related lien released without the debt necessarily being retired are spelled out in the debt instrument. Under the Tax Reform Act of 1986, bonds issued before January 1, 1986, may be advance refunded only twice. Bonds issued on or after that date may be advance refunded only once.

7.18 The accounting, financial reporting, and disclosure requirements for advance refundings entered into by health care organizations other than governmental entities are described in FASB Statements No. 4, *Reporting Gains and Losses from Extinguishment of Debt* (as amended), No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, and FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts*. Generally speaking, these entities are required to report any

gain or loss resulting from an advance refunding as an extraordinary item in the financial statements of the period in which the refunding occurred. However, when a debtor enters into a binding contract with a holder of its debt obligation, FASB EITF Issue No. 95-15, *Recognition of Gain or Loss When a Binding Contract Requires a Debt Extinguishment to Occur at a Future Date for a Specified Amount*, states that a debtor should recognize a loss, based on the terms of the binding contract and the debt's carrying amount at the date the contract becomes binding to both the debtor and the holder. The accounting, financial reporting, and disclosure requirements for advance refundings (and for current refundings) entered into by governmental health care entities are set forth in GASB Statements No. 23, *Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Activities*, and No. 7, *Advance Refundings Resulting in Defeasance of Debt*. Generally speaking, governmental entities are required to amortize any gain or loss resulting from a current or advance refunding to interest expense over the shorter of the life of the new bonds or the remaining life of the old bonds.

7.19 There are several types of advance refundings, including net advance refundings, full cash advance refundings, and crossover refundings (see the Glossary). In a crossover refunding, because the old bonds are not defeased until the crossover date, no immediate gain or loss should be recognized. If the retirement dates of the old debt have been established, the call premium, unamortized premium or discount, and initial issue costs should be recognized systematically in the income statement over the remaining life of the old debt as an adjustment of the cost of borrowing related to the old debt. In addition, the income earned on the funds used to consummate the advance refunding and the interest expense on both the old and new debts should be recognized in the statement of operations. The funds used to consummate the advance refunding should be reported as an asset and both the old and new debts should be reported as liabilities. The assets and liabilities should not be offset. In a binding contract, EITF Issue No. 95-15 requires that the loss recognized include the amount of deferred debt issuance costs and premium or discount related to the debt obligation that would remain unamortized, based on the amortization policies being applied to those items prior to entering into the binding contract, at the future date of the exchange specified in the contract. In other words, the effective interest rate on the debt should remain unchanged during the time period between the contract date and the future date of the exchange.*

7.20 FASB Statement No. 125 is effective for transfers and servicing of financial assets and extinguishment of liabilities occurring after December 31, 1996, and is to be applied prospectively. Earlier or retroactive application is not permitted. If an entity has debt considered to be extinguished by an in-substance defeasance prior to December 31, 1996 under the provisions of FASB Statement No. 76, *Extinguishment of Debt*, the financial statements should disclose a general description of the transaction and the amount of the debt that is considered extinguished at the end of each period that the debt remains outstanding.

Arbitrage Rebate Liabilities

7.21 Advance refundings involving tax-exempt debt are subject to arbitrage rules under the IRC sec. 103(c) and related regulations that, in general,

* Consideration should also be given to EITF Issue No. 96-19, *Debtor's Accounting for a Modification or Exchange of Debt Instruments*, when a consensus has been reached.

prohibit the yield realized from the investment of the proceeds of the new debt from exceeding the yield on the debt itself. Compliance with those rules is necessary for the interest on the debt to be exempt from federal income tax and, possibly, from state and local tax.

7.22 Whenever a provider invests tax-exempt bond proceeds and the ultimate yield is higher than the interest rate on the bonds, the provider may be subject to an arbitrage rebate liability. The arbitrage determination is made as of the date of the issue; however, intentional acts undertaken after the date of the issue can disqualify the issue retroactively. The earnings in excess of interest expense represent a liability that must be paid to the U.S. Treasury in order for the bonds to maintain their tax-exempt status. The arbitrage rebate liability may be a substantial amount if the bond proceeds are not spent as quickly as planned. For example, this may occur if a provider encounters a delay in a major construction project.

Auditing

7.23 Auditing objectives and procedures for long-term debt issued by health care organizations generally are similar to those of other organizations. In addition, the independent auditor may need to consider the examples of specific auditing objectives, selected control activities, and auditing procedures that are presented in exhibit 7.1.

Exhibit 7.1

Auditing Considerations

<i>Financial Statement Assertions</i>	<i>Specific Auditing Objectives</i>	<i>Selected Control Activities</i>	<i>Auditing Procedures</i>
<i>Tax-Exempt Debt</i>			
Presentation and disclosure	Amounts related to tax-exempt debt are properly classified in the financial statements and related disclosures are adequate.	Procedures ensure that the providers monitor their compliance with restrictive debt covenants.	Review the debt instruments for the presence of any restrictive debt covenants. Test compliance with restrictive debt covenants.
<i>Income Taxes</i>			
Rights and obligations	The not-for-profit organization has obtained a qualifying income tax exemption from the governmental authority.	Management monitors compliance with applicable tax regulations. Transactions are reviewed for their effect on tax status and tax liabilities.	Determine that the not-for-profit organization has obtained a determination of its tax-exempt status. Inquire if tax returns have been filed on a timely basis. Determine the status of the tax returns under examination. Read the prior years' tax returns. Read the minutes and the accounting for evidence of significant unrelated business activities. Review for reasonableness

<i>Financial Statement Assertions</i>	<i>Specific Auditing Objectives</i>	<i>Selected Control Activities</i>	<i>Auditing Procedures</i>
			the unrelated business income tax liability.
Presentation and disclosure	The entity's tax-exempt status and its tax contingencies are disclosed in the notes to the financial statements.		Determine that the entity's tax-exempt status is disclosed in the notes to the financial statements.

Chapter 8

Commitments and Contingencies

Overview

8.01 Commitments and contingencies may include (a) losses arising from litigation, including malpractice and other claims; (b) contingencies related to risk contracting; (c) third-party payment and rate-setting programs; (d) construction contract commitments; (e) the Hill-Burton Act obligation to provide uncompensated care; (f) commitments and guarantees that include contractual agreements with physicians, specialists, and others who perform services by arrangement with health care organizations; and (g) commitments and contingent liabilities related to pension plans, operating leases, purchase commitments, and loan guarantees.

8.02 FASB Statement No. 5, *Accounting for Contingencies*, as amended and interpreted, and FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss*, provide guidance on accounting for contingencies. FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, discusses accounting for claims costs, including estimates of costs relating to IBNR claims. Governmental health care entities should consider the accounting and disclosure requirements of GASB Statement No. 10, *Accounting and Financial Reporting for Risk Financing and Related Insurance Issues*, as amended by GASB Statement No. 30, *Risk Financing Omnibus*, and Interpretation No. 4, *Accounting and Financial Reporting for Capitalization Contributions to Public Entity Risk Pools*.

Medical Malpractice Claims

8.03 The extent of risk transfer is key in determining whether a liability should be recognized in a provider's financial statements pertaining to malpractice claims. The existence of an insurance policy, by itself, is no assurance that the risk of financial loss is transferred.

8.04 If the entity has purchased a claims-made insurance policy (see paragraph 8.13), there is no transfer of risk for claims not reported to the insurance carrier within the policy term. With regard to retrospectively rated insurance policies (see paragraphs 8.14 and 8.15) and policies by captive insurance companies (see paragraphs 8.16 through 8.19), the economic substance of the terms of the insurance policy may more closely resemble a claims funding mechanism than an instrument that transfers risk of loss to an external third party. If the health care organization has not transferred risk to an external third party, it should evaluate its exposure to losses arising from malpractice claims and record a liability, if appropriate.

Accruing Malpractice Liabilities

8.05 The ultimate costs of malpractice claims, which include costs associated with litigating or settling claims, are accrued when the incidents that give rise to the claims occur. Estimated losses from asserted and unasserted claims are accrued either individually or on a group basis, based on the best estimates

of the ultimate costs of the claims and the relationship of past reported incidents to eventual claims payments. All relevant information, including industry experience, the entity's own historical experience, the entity's existing asserted claims, and reported incidents, is used in estimating the expected amount of claims. The accrual includes an estimate of the losses that will result from unreported incidents, which are probable of having occurred before the end of the reporting period.

8.06 In estimating the probability that unreported incidents have occurred, some health care organizations may develop a range of possible estimates of the number of unreported incidents, including zero. However, the greater the volume of a health care organization's operations, the greater the likelihood that the organization's minimum estimate of the number of probable unreported incidents will be greater than zero.

8.07 If it is probable that a loss has been incurred and the information available indicates the loss is within a range of amounts, the most likely amount of loss in the range is accrued. If no amount in the range is more likely than any other, the minimum amount in the range is accrued. The potential additional loss is disclosed if there is at least a reasonable possibility of a loss in excess of the amount accrued.

8.08 In estimating losses from malpractice claims, a health care organization may need to modify data drawn from industry experience so it is relevant to developing an estimate that is specific to the organization. Various factors (such as the nature of operations, size, and the provider's past experience) are considered in assessing comparability. Further, industry data that are not current may not be relevant.

8.09 Estimated losses are reviewed and changed, if necessary, at each reporting date. The amounts of the changes are recognized currently as additional expense or as a reduction of expense.

8.10 Accrued unpaid claims and expenses that are expected to be paid during the normal operating cycle (generally within one year of the date of the financial statements) are classified as current liabilities. All other accrued unpaid claims and expenses are classified as noncurrent liabilities.

8.11 A health care organization discloses its program of medical malpractice insurance coverages and the basis for any related loss accruals. If the organization cannot estimate losses relating to a particular category of malpractice claims (for example, asserted claims, reported incidents, or unreported incidents) in accordance with paragraphs 8.03 through 8.10, the potential losses related to that category of claims are not accrued. However, the contingency is disclosed in the notes to the financial statements, as required by FASB Statement No. 5.

8.12 The FASB is considering the accounting implications of certain discounting applications, including discounting insurance claims. Until the discounting issue is resolved, health care organizations that discount accrued malpractice claims should disclose in the notes to the financial statements the carrying amount of accrued malpractice claims that are discounted in the financial statements and the interest rate or rates used to discount those claims.

Accounting for Claims-Mode Insurance Policies and Tail Coverage

8.13 A claims-made insurance policy represents a transfer of risk within the policy limits to the insurance carrier for asserted claims and incidents re-

ported to the insurance carrier. The policy, however, does not represent a transfer of risk for claims and incidents not reported to the insurance carrier during the policy period. Consequently, a health care organization that is insured under a claims-made insurance policy recognizes the estimated cost of those claims and incidents not reported to the insurance carrier, in accordance with paragraphs 8.03 through 8.10. This estimation is done *unless* the health care organization has bought tail coverage (see the Glossary) and included the cost of the premium as an expense in the financial statements for that period.

Accounting for Retrospectively Rated Premiums

8.14 A health care organization with a retrospectively rated insurance policy whose ultimate premium is based primarily on the health care organization's loss experience accounts for the minimum premium as an expense over the period of coverage under the policy and accrues estimated losses from asserted and unasserted claims in excess of the minimum premium, as indicated in paragraphs 8.03 through 8.10. Such estimated losses, however, are not accrued in excess of a stipulated maximum premium. If the health care organization cannot estimate losses from asserted or unasserted malpractice claims, as indicated in paragraphs 8.03 through 8.10, the health care organization should disclose the existing contingency in the notes to the financial statements, as required by FASB Statement No. 5.

8.15 A health care organization insured under a retrospectively rated policy whose ultimate premium is based primarily on the experience of a group of health care organizations amortizes the initial premium to expense on a pro rata basis over the policy term. The organization also accrues additional premiums or refunds on the basis of the group's experience to date, which includes a provision for the ultimate cost of asserted and unasserted claims before the financial statement date, whether reported or unreported. The health care organization discloses that (a) it is insured under a retrospectively rated policy and (b) premiums are accrued based on the ultimate cost of the experience to date of a group of organizations. If the health care organization cannot estimate losses from asserted or unasserted malpractice claims, as indicated in paragraphs 8.03 through 8.10, it should disclose the existing contingency in the notes to the financial statements, as required by FASB Statement No. 5.

Accounting for Medical Malpractice Claims Insured by Captive Insurance Companies

8.16 A majority-owned captive insurance company (for example, a wholly owned captive) is consolidated in accordance with FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*. Multi provider captives, in which the ownership percentage is 50 percent or less, are accounted for in accordance with APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*.

8.17 A health care organization insured by an unconsolidated multi provider captive insurance company for medical malpractice claims under a retrospectively rated insurance policy whose ultimate premium is based primarily on the health care organization's experience up to a maximum premium, if any, accounts for such insurance as indicated in paragraph 8.14.

8.18 A health care organization insured by an unconsolidated multi provider captive insurance company for medical malpractice claims under a retrospectively rated policy based primarily on the experience of a group of health care organizations accounts for such insurance as indicated in paragraph 8.15. However, the health care organization considers whether the economic substance of the multi provider captive insurance company is sufficient to relieve the health care organization from further liability. The health care organization should disclose that (a) it is insured under a retrospectively rated policy of a multi provider captive insurance company and (b) the premiums are accrued based on the captive insurance company's experience to date.

8.19 A health care organization that is insured by a multi provider captive insurance company discloses in its financial statements that it is insured by such a company, and it should disclose its ownership percentage, if significant, in the captive company as well as the method of accounting for its investment in, and the operations of, the captive company. In addition, if the health care organization cannot make the necessary estimates of losses from asserted or unasserted claims, as indicated in paragraphs 8.03 through 8.10, the health care organization discloses the existing contingency in the notes to the financial statements, as required by FASB Statement No. 5.

Accounting for Trust Funds

8.20 In general, a trust fund, whether legally revocable or irrevocable, is included in the financial statements of the health care organization. A portion of the fund equal to the amount of assets expected to be liquidated to pay malpractice claims classified as current liabilities is classified as a current asset; the balance of the fund, if any, is classified as a noncurrent asset. Revenues and administrative expenses of the trust fund are included in the statement of operations (see chapter 10). In some circumstances, the foregoing may not be possible (for example, if a common trust fund exists for a group of health care organizations; if the health care organization is part of a common municipality risk-financing internal service fund; or if the legal, regulatory, or indenture restrictions prevent the inclusion of a trust fund in a health care organization's financial statements). In those circumstances, the provisions of paragraphs 8.21 and 8.22 apply.

8.21 In general, estimated losses from asserted and unasserted claims are accrued and reported, as indicated in paragraphs 8.03 through 8.12. The estimated losses are not based on payments to the trust fund. However, accounting for a health care organization that participates in a pooled fund depends on the extent to which the associated risks and rewards have been transferred to another party. An organization that transfers its risk of loss to the common trust fund and forfeits its rights to any excess funding should expense its contributions and account for its participation in the trust fund based on the type of coverage obtained (for example, occurrence basis, claims-made, or retrospectively rated). Governmental health care entities that are component units of a state or local government reporting entity and that participate in that entity's risk-financing internal service fund should report claims expenses equal to the charges from the internal service fund if those charges meet the requirements of paragraphs 65 through 68 of GASB Statement No. 10.

8.22 The existence of the trust fund and whether it is irrevocable is disclosed in the financial statements.

Governmental Health Care Enterprises

8.23 Governmental health care enterprises that are component units of a state or local governmental reporting entity and that participate in that entity's risk-financing internal service fund should report claims expenses equal to the charges from the internal service fund if those charges meet the requirements of paragraphs 65 through 68 of GASB Statement No. 10. A governmental health care enterprise that participates in a public entity risk pool with transfer or pooling of risk should present its premium or required contribution as insurance expense, as discussed in GASB Statement No. 10, paragraphs 69 and 70. Enterprises participating in public entity risk pools without transfer or pooling of risk should report payments to pools as deposits and recognize and measure claims liabilities in accordance with GASB Statement No. 10, paragraphs 53 through 58.

Auditing Commitments and Contingencies

8.24 Auditing objectives and procedures for commitments and contingencies generally are similar to those of other organizations. The independent auditor may need to consider the specific auditing objectives, selected control activities, and auditing procedures presented in exhibit 8.1 at the end of this chapter.

Auditing Medical Malpractice Loss Contingencies

8.25 The existence of an insurance policy, by itself, is no assurance that malpractice contingencies are assumed by others. The auditor should review the insurance contracts and determine the extent of the risk retained by the provider. Specific auditing procedures to consider include the following:

- Determine the type (such as occurrence basis or claims-made) and level (per occurrence or in the aggregate) of insurance protection the provider has obtained.
- Determine if the coverage actually transfers the malpractice risks. Is the insurance with a related party (for example, a captive insurance company)? Does it provide for retrospective premiums or similar adjustments?

Once the extent of the risk retained is understood, the auditor will be able to determine the nature, extent, and timing of other auditing procedures.

8.26 If a health care organization has transferred the risk of loss to a financially viable third party by purchasing insurance coverage of sufficient limits on an occurrence basis, no additional auditing procedures are necessary. If the organization retains all or a portion of the risk through self-insurance or has purchased a claims-made policy, the independent auditor should perform additional auditing procedures to obtain reasonable assurance that the organization's accounting for medical malpractice losses is in accordance with GAAP.

8.27 The independent auditor should consider the extent to which the renewal of a claims-made policy or the purchase of tail coverage after the balance-sheet date but before the auditor's report is issued limits the entity's liability exposure as of the balance-sheet date. If an entity either renews a claims-made policy or purchases tail coverage, and the new policy covers claims asserted during the new policy term (regardless of when the incident occurred),

the entity has transferred to the insurer the risk for that portion of the entity's claims that is expected to be reported during the new policy term (up to the new policy limits). Accordingly, the entity's liability for the IBNR claims transferred would not exceed the premium on the new policy, except for anticipated claims in excess of the new policy limits.

8.28 Management's intent to renew a claims-made policy is not sufficient to constitute a limit on IBNR claims as of the balance-sheet date unless management contractually obligates itself for renewal before the issuance date of the financial statements and the cost is expensed in the period covered by the financial statements. The requirement to renew a claims-made policy or to purchase and expense tail coverage applies even if state regulations require that renewal of claims-made coverage be offered continually.

8.29 If the insured has the unilateral option to purchase tail coverage at a premium that may not exceed a stipulated maximum, and the provider intends to purchase that coverage, the amount of IBNR loss to be accrued may effectively be limited to the maximum tail-coverage premium stated in the policy. However, providers in these circumstances that do not intend to purchase tail coverage may not accrue the cost of obtaining that coverage as a substitute for the IBNR accrual.

Auditing Accounting Estimates

8.30 Management is responsible for making the accounting estimates that are included in the financial statements. Management is also responsible for providing proper disclosure of (1) the use of estimates in the preparation of financial statements and (2) certain significant estimates (SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*).¹ The auditor is responsible for evaluating the reasonableness of management's estimates and the adequacy of the related disclosures. The auditor does this using one or more of the following approaches:

- a. Test the process used by management to develop the estimate.
- b. Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate.
- c. Review subsequent events or transactions occurring prior to completion of fieldwork.

8.31 In evaluating management's estimates of asserted and unasserted claims, the auditor should consider factors such as management's description and evaluation of asserted claims and unasserted claims arising from reported incidents; the lawyer's (and, if appropriate, the outside risk manager's) assessment of asserted claims and reported incidents not covered by insurers; and the actuary's evaluations of the aggregate liability covering asserted claims and unasserted claims arising from reported and unreported incidents.

8.32 Written assurances should be obtained from management that it has disclosed all such matters required to be disclosed by FASB Statement No. 5.

¹ See paragraphs 8.40 through 8.42. SOP 94-6 does not pertain to governmental entities unless the entity has elected to follow all FASB pronouncements under paragraph 7 of GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*. (See chapter 1, footnote 1.)

8.33 In evaluating the information provided by legal counsel, it may be necessary to supplement the written representations with inquiries if the representations are not clear regarding the probability of the litigation outcome or the potential range of loss.²

8.34 The auditor should consider the frequency of losses due to unreported incidents and the magnitude of prior losses and underlying causes for the IBNR claims. If there is a basis for an accrual, the auditor should then determine whether the entity's prior history supports the estimation of the number of claims and the probable settlement value.

Use of Actuaries and Actuarial Methods

8.35 An actuary may be engaged to provide or review the estimate of the medical malpractice loss amount or range of amounts or to assist in developing certain factors and assumptions used in estimating the malpractice liability. The decision to use an actuary should be based on a consideration of whether (a) the estimated claim liability is potentially material to the fair presentation of financial statements in conformity with GAAP and (b) special knowledge is required to estimate the claim liability.

8.36 If an actuary is involved in a substantial way in determining the amount of a provider's malpractice self-insurance liability, the independent auditor should follow the requirements of SAS No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 336). The independent auditor should consider the actuary's professional qualifications, reputation, prior experience in estimating malpractice claim losses, and relationship to the client. There should be an understanding among the auditor, the client, and the actuary of the objectives and scope of the analysis and the methods and assumptions used. The independent auditor should be aware of (a) the limitations of assurances in actuarial calculations due to uncertainties and (b) restrictions as to the use of the actuarial reports. The independent auditor is responsible for determining the adequacy of the actuary's report for purposes of corroborating the representations in the financial statements. The independent auditor should perform an appropriate test of the accounting data provided by the client to the actuary. Such accounting data may include historical claim experience, policy terms (such as coverage, expiration, deductibles, presence of retrospectively determined premiums, and indemnity limitations), exposure data (such as the number of beds, high-risk medical specialties, outpatient visits, and emergency room visits), and information about risk management systems, personnel, and procedures.

8.37 An accrual for malpractice losses should be based on estimated ultimate losses and costs associated with settling claims. Accruals should not be based on recommended funding amounts, which in addition to a provision for the actuarially determined liability also includes a provision for (a) credit for investment income and (b) a margin for risk of adverse deviation. The follow-

² According to SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*, vol. 1, AU sec. 337), a letter of audit inquiry to the lawyer handling the claims is the auditor's primary means of obtaining corroboration of the information furnished by management concerning claims made and known incidents for which claims have not been made that are either uninsured or in excess of the insurance coverage. Audit inquiry letters generally would not be required with respect to reported contingencies that were not considered to have a material potential loss. The inability or unwillingness of counsel to evaluate asserted claims and or reported incidents would give rise to a modification of the auditor's opinion.

ing are examples of factors to consider and adjustments that may be required to convert actuarially determined malpractice funding amounts to an appropriate loss accrual to be reported in the financial statements:

- The risk of adverse deviation is an additional cost factor applied to bring a funding requirement to a selected confidence level. This factor does not meet the criteria for recognition as a liability in accordance with FASB Statement No. 5.
- An evaluation should be made of the extent and validity of industry data when the credibility factor actuarial technique is used. The lower the credibility factor, the greater the blending of industry data. This may create an unacceptable level of industry data at lower confidence levels. Further, a low credibility factor may indicate that provider-specific data is not sufficient to support the claims liability estimation process.
- A review of the discounting approach used is necessary to develop the required disclosure. The impact on the discounting calculation of any other adjustment made to the actuarially determined amounts (such as risk of adverse deviation or the credibility of the risk management system) has to be evaluated.
- A review of the expenses included in the loss estimation process should be made. Such expenses include the expense of settlement and litigation (that is, allocated loss adjustment expenses).

8.38 Limitations on the availability of provider-specific data, lack of a sufficient patient population for claims projection purposes, a very low credibility factor, and a variety of other factors may cause the actuary's estimate of loss to be of limited value in developing an estimate of the liability under GAAP.

Risks and Uncertainties

8.39 Uncertainties arise when the evidence available is insufficient for a reasonable estimation of the effects of the outcome of a particular future event on the current financial statements. Normally, the resolution of the uncertainty is prospective, and sufficient evidence cannot be expected to exist at the time of the audit. In these situations, it cannot be determined what adjustments, if any, to the financial statements may be appropriate. The existence of such an uncertainty, if material, ordinarily should result in the inclusion of an explanatory paragraph in the auditor's report. In certain circumstances, the possible effects of the uncertainty on the financial statements may be so pervasive that the balance of the financial statements has little meaning. In these cases, a disclaimer of opinion may be appropriate.

8.40 SOP 94-6 requires entities to include in their financial statements information about—

- a. The nature of their operations.
- b. Use of estimates in the preparation of financial estimates.

In addition, if certain specified disclosure criteria are met, it requires entities to include in their financial statements disclosures about—

- a. Certain significant estimates.
- b. Current vulnerability due to certain concentrations.

8.41 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to changes in the near term. Examples of similar estimates that may be included in financial statements of health care organizations include, but are not limited to, the following:

- Assets subject to impairment, for example, goodwill
- Environmental remediation-related obligations
- Litigation-related contingencies, for example, fraud and abuse actions by regulators
- Estimated risk pool settlements arising from managed care contracting
- Amounts reported for long-term obligations such as amount reported for pensions and postemployment benefits
- Estimated net proceeds recoverable, the provisions for expected loss to be incurred, or both, on disposition of a business or assets

8.42 Examples of concentrations that may meet the criteria that require disclosure in the financial statements of health care organizations in accordance with paragraph 21 of the SOP include the following:

- Concentrations in the volume of business transacted with a particular payor, supplier, lender, grantor, or contributor
- Concentrations in revenue from particular products, services, or fund-raising events
- Concentrations in the available sources of supply of material, labor, or services, or of licenses or other rights used in the entity's operations
- Concentrations in the market or geographic area in which an entity conducts its operations

Evaluating Lawyers' Responses

8.43 Determining the outcome of pending or threatened litigation, claims and assessments (including unasserted claims and assessments) normally is beyond the auditor's professional competence. Accordingly, the auditor's evaluation of the need for disclosures or report modifications is based primarily on the opinion of the lawyer handling the matter. The American Bar Association (ABA) has adopted a *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information* under which lawyers accept certain responsibility for responses to auditors' inquiries. However, the ABA Statement of Policy is not enforceable by the ABA in the same way the AICPA is able to enforce its standards under the accounting profession's Code of Professional Conduct. As a result, lawyers' responses may vary widely.

8.44 Interpretation No. 7 of SAS No. 12, entitled "Assessment of a Lawyer's Evaluation of the Outcome of Litigation" (AICPA, *Professional Standards*, vol. 1, AU sec. 9337.18–22) includes the following examples of evaluations of litigation, which may be considered to communicate in a sufficiently clear manner a remote likelihood of an unfavorable outcome:

- "We are of the opinion that this action will not result in any liability to the company."
- "It is our opinion that the possible liability to the company in this proceeding is nominal in amount."
- "We believe the company will be able to defend this action successfully."

- “We believe that the plaintiff’s case against the company is without merit.”
- “Based on the facts known to us, after a full investigation, it is our opinion that no liability will be established against the company in these suits.”

8.45 On the other hand, the lawyer may use terms, such as *meritorious defenses*, that have different meanings to different lawyers. The Interpretation includes the following examples of lawyers’ evaluations that are unclear regarding the likelihood of an unfavorable outcome:

- “This action involves unique characteristics wherein authoritative legal precedents do not seem to exist. We believe that the plaintiff will have serious problems establishing the company’s liability under the act; nevertheless, if the plaintiff is successful, the award may be substantial.”
- “It is our opinion that the company will be able to assert meritorious defenses to this action.” (The term “*meritorious defenses*” indicates that the company’s defenses will not be summarily dismissed by the court; it does not necessarily indicate the lawyer’s opinion that the company will prevail.)
- “We believe the action can be settled for less than the damages claimed.”
- “We are unable to express an opinion as to the merits of the litigation at this time. The company believes there is absolutely no merit to the litigation.” (If the company’s lawyer, with the benefit of all relevant information, is unable to conclude that the likelihood of an unfavorable outcome is “remote”, it is unlikely that management would be able to form a judgment to that effect.)
- “In our opinion, the company has a substantial chance of prevailing in this action.” (A “substantial chance”, a “reasonable opportunity”, or similar terms indicate more uncertainty than an opinion that the company will prevail.)

8.46 When the lawyer’s response is unclear, the auditor may request a conference to clarify the lawyer’s opinion. If the response is still unclear or the materiality of the uncertainty cannot be determined, the auditor should consider the guidance in paragraphs 29 through 32 of SAS No. 58, *Reports on Audited Financial Statements*, as amended by SAS No. 79, *Amendment to Statement on Auditing Standards No. 58*, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508).

Auditing

8.47 The independent auditor may need to consider the examples of specific auditing objectives, selected control activities, and auditing procedures for commitments and contingencies that are presented in exhibit 8.1.

			Determine whether uncertainties related to medical malpractice claims need to be disclosed in the auditor's report.
Presentation and disclosure	The program of medical malpractice insurance coverage and the basis for any loss accruals are disclosed adequately in the financial statements.		

Chapter 9

Net Assets (Equity)

Investor-Owned Health Care Organizations

9.01 The equity accounts of investor-owned health care entities are similar to those of other investor-owned businesses.

Not-for-Profit and Governmental Health Care Organizations

9.02 The balance sheets of not-for-profit health care organizations should report separate amounts for each of three classes of net assets:¹ (a) permanently restricted net assets, (b) temporarily restricted net assets, and (c) unrestricted net assets. This is based on the existence or absence of donor-imposed restrictions.

9.03 Unrestricted net assets generally result from revenues from providing or agreeing to provide health care services, receiving unrestricted contributions and grants, or receiving dividends or interest from investing in income-producing assets minus expenses incurred in providing or agreeing to provide health care services, providing other community benefits, and performing administrative functions. The only limits on the use of unrestricted net assets are the broad limits resulting from the nature of the provider's organization; the environment in which the organization operates; the purposes specified in its articles of incorporation or in its bylaws; or limits resulting from contractual agreements with suppliers, creditors, and others entered into in the course of business. Information about significant contractual limits, including the existence of restrictive debt covenants, generally is provided in the notes to the financial statements. Similarly, information about self-imposed limits may be provided either on the face of the balance sheet or in the notes to the financial statements. Such specifics include information about voluntary resolutions by the entity's governing board to designate a portion of its unrestricted net assets for identified purposes (for example, funded depreciation).

9.04 Information about the nature and amounts of different types of permanent restrictions or temporary restrictions should be provided either by reporting their amounts on the face of the financial statements or by including relevant details in the notes to the financial statements. Separate line items may be reported within permanently restricted net assets (or in the notes to the financial statements) to distinguish between permanent restrictions for holdings of (a) assets, such as land or works of art, donated with stipulations that they be used for a specified purpose, be preserved, and not be sold, or (b) assets donated with stipulations that they be invested to provide a permanent source of income (that is, permanent endowment funds).

9.05 Similarly, separate line items may be reported within temporarily restricted net assets (or in the notes to the financial statements) to distinguish

¹ Though some health care organizations may use other terms, such as *equity*, this Guide uses the term *net assets* to describe residual interest.

between temporary restrictions for (a) support of particular operating activities, (b) investment for a specified term, (c) use in a specified future period, or (d) acquisition of long-lived assets. Donors' temporary restrictions may require that resources be used in a later period or after a specified date (time restrictions) or that resources be used for a specified purpose (purpose restrictions) or both. For example, gifts of cash and other assets with stipulations that they be invested to provide a source of income for a specified term and that the income be used for a specified purpose are restricted both as to time and purpose.

9.06 Governmental health care entities either report (1) the three classes of fund balance or (2) unrestricted (general) and restricted fund balances.²

9.07 The nature of the restrictions on donor-restricted resources should be disclosed in the financial statements.

Auditing

9.08 The independent auditor may need to consider the examples of specific auditing objectives, selected control activities, and auditing procedures relating to net assets (equity) that are presented in exhibit 9.1.

² In June 1995, the GASB issued for comment *Preliminary Views—Governmental Financial Reporting Model*. That proposal includes draft definitions of restricted assets and equity that are different from that used in FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*. It also proposes that equity of governmental business-type activities, including health care organizations, be reported in three components—capital, noncapital restricted, and noncapital unrestricted. The GASB currently plans to issue a final pronouncement on these issues in 1997.

Exhibit 9.1

<i>Financial Statement Assertions</i>	<i>Specific Auditing Objectives</i>	<i>Selected Control Activities</i>	<i>Auditing Procedures</i>
<i>Net Assets (Equity)</i>			
Rights and obligations	Resources are used and accounted for in accordance with donor and grantor restrictions.	Management monitors compliance with these restrictions.	<p>Review the minutes of board and board committee meetings for evidence of donor restrictions.</p> <p>Determine compliance with donor and grantor restrictions.</p>
Presentation and disclosure	Net assets are presented and disclosed properly in the financial statements.	Procedures ensure proper authorization, recording, and presentation.	Test significant net asset transactions to determine that they are properly authorized and recorded.

Chapter 10

Revenue, Expenses, Gains, and Losses

Conceptual Framework for Reporting Revenue, Expenses, Gains, and Losses

10.01 FASB Concepts Statement No. 6, *Elements of Financial Statements*, provides a useful conceptual framework for preparers of financial statements to distinguish among elements of financial statements for purposes of display. Additionally, not-for-profit organizations are subject to the requirements of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*.¹ This chapter draws on the concepts contained in FASB Concepts Statement No. 6 and FASB Statement No. 117 in discussing revenue, expenses, gains, and losses with respect to health care organizations. Expenses are not generally netted against revenues, whereas gains and losses may be displayed as net amounts. The application of these concepts to the classification of revenue, expenses, gains, and losses in the statement of operations of health care organizations is discussed in paragraphs 10.02 through 10.10.

10.02 FASB Concepts Statement No. 6, paragraph 78, defines revenues as “inflows or other enhancements of assets of an entity or settlements of its liabilities (or a combination of both) from delivering or producing goods, rendering services, or other activities that constitute the entity’s ongoing major or central operations.” Similarly, paragraph 80 defines expenses as “outflows or other using up of assets or incurrences of liabilities (or a combination of both) from delivering or producing goods, rendering services, or carrying out other activities that constitute the entity’s ongoing major or central operations.”

Distinguishing Charity Care From Bad Debt Expense

10.03 Charity care represents health care services that are provided but are never expected to result in cash flows. As a result, charity care does not qualify for recognition as receivables or revenue in the financial statements. Distinguishing charity care from bad-debt expense requires the exercise of judgment. Charity care is provided to a patient with demonstrated inability to pay. Each organization establishes its own criteria for charity care consistent with its mission statement and financial ability. Only the portion of a patient’s account that meets the organization’s charity care criteria is recognized as charity. Although it is not necessary for the entity to make this determination upon admission or registration of an individual, at some point the entity must determine that the individual meets the established criteria for charity care. (See paragraph 10.20 for disclosure requirements relating to charity care.)

Revenue

10.04 Revenue usually is recorded when coverage is provided to an enrollee or the service is provided to a patient or resident. Revenue is classified

¹ This pronouncement is not applicable to governmental health care enterprises. (See chapter 1, footnote 1.)

based on the type of service rendered or contracted to be rendered. Examples of revenue include—

- Patient service revenue, which is derived from fees charged for patient care. This may be based on diagnosis related group (DRG) payments, resource-based relative value scales (RBRVS) payments, per diems, discounts, or other fee-for-service arrangements.
- Premium revenue, which is derived from capitation arrangements.
- Resident service revenue, which may be related to maintenance fees, rental fees, or amortization of advance fees.

10.05 Some not-for-profit or governmental health care enterprises may receive relatively small amounts of contributions, grants, or tax support. Such amounts, whether temporarily restricted, permanently restricted, or unrestricted, are recognized as revenue or gains when they are received. Special considerations pertaining to revenue recognition of promises to give in future periods (pledges) are discussed in chapter 5 and in paragraphs 10.07 through 10.10.

10.06 Other revenue, gains, or losses are derived from services other than providing health care services or coverage to patients, residents, or enrollees. These typically include—

- Interest and dividends from all funds held by a trustee, malpractice funds, or other miscellaneous investment activities.
- Certain realized changes in market values of marketable securities (see chapter 4).
- Fees from educational programs, which include tuition for schools (such as nursing) or laboratory and X-ray technology.
- Rental of health care facility space.
- Sales of medical and pharmaceutical supplies to employees, physicians, and others.
- Fees charged for transcripts for lawyers, insurance companies, and others.
- Proceeds from sale of cafeteria meals and guest trays to employees, medical staff, and visitors.
- Proceeds from sale of scrap, used X-ray film, etc.
- Proceeds from sales at gift shops, snack bars, newsstands, parking lots, vending machines, or other service facilities operated by the health care organization.

10.07 Interest earned and gains and losses on investments and other assets (or liabilities) are reported by not-for-profit organizations as increases or decreases in unrestricted net assets, unless their use is temporarily or permanently restricted by explicit donor stipulation or by law. Occasionally, not-for-profit organizations may transfer funds to, or receive transfers from, other related not-for-profit organizations. Unless repayment is expected or the funds are restricted by an independent party, such transfers (referred to as *equity transfers*) are reported as separate items that increase or decrease unrestricted net assets. Net assets released from restriction, such as those related to the fulfillment of time or purpose restrictions, should be reported separately in the financial statements or disclosed in the notes. Additional guidance on accounting for investments can be found in chapter 4.

10.08 Contributions of noncash assets that are not long-lived assets are recognized as revenue or gains in the period received and as assets or a reduc-

tion of liabilities or expenses, depending on the form of the benefits received. (For example, a donation of supplies would be reflected as revenue or gains and as an increase in inventory or supply expense.) The donations are measured at fair value.² Donations received with no restrictions attached are reported as unrestricted support in the statement of operations. Donations with explicit donor restrictions attached (other than permanent restrictions) are reported as temporarily restricted support. The expiration of these restrictions is recognized in the period when the time stipulated by the donor has elapsed, when the stipulated purpose for which the asset was restricted has been fulfilled, or both. When the restriction expires, the temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of operations as “net assets released from restriction.” Donor-restricted contributions whose restrictions are met in the same reporting period may be reported as unrestricted support provided that an organization discloses its accounting policy and applies the policy consistently from period to period. Donations with explicit donor restrictions attached that permanently limit the health care organization’s use of the contributed assets (for example, permanent endowments) are reported as increases in permanently restricted net assets.

10.09 Contributions of long-lived assets, including the use of long-lived assets such as land, buildings, and equipment, are reported as support or gains in the period received. The donation is measured at its fair value. If the donor places no restrictions on the use of the asset, the contribution is reported as unrestricted support. Contributions of long-lived assets with explicit donor restrictions are reported as temporarily or permanently restricted support. The provider reports expirations of donor restrictions when the stipulation is fulfilled and the assets are placed in service. At that time, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of operations as “net assets released from restriction.”

10.10 Donations of cash or other assets that must be used to acquire long-lived assets are reported as temporarily restricted support in the period received. Expirations of donor restrictions are reported when the acquired long-lived assets are placed in service and donor-imposed restrictions are satisfied. The temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of operations as “net assets released from restriction.” For providers that prepare classified balance sheets, assets that are restricted by donors for acquisition of long-lived assets (such as cash or contributions receivable) are not included in “cash and cash equivalents” or with other “contributions receivable.” Rather, those assets are reported in a separate section, such as “assets restricted to investment in property and equipment,” and are sequenced near the “property and equipment” section of the balance sheet.

10.11 The nature and extent of donated services received by health care organizations varies and can range from the limited participation of many people in fund-raising activities to active participation in the entity’s service programs; their values usually are not recorded. Contributed services should be reported as contribution revenue and as assets or expenses if the services create or enhance a nonfinancial (that is, nonmonetary) asset (for example, property and equipment) or meet all of the following criteria:

a. Require specialized skills

² Information necessary to estimate the fair value of a donated asset may be obtained from various sources as described in FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*, paragraph 19.

- b. Are provided by individuals with those skills (such as accounting, financial, construction, educational, electrical, legal, medical, and other services provided by accountants, investment advisers, contractors, teachers, electricians, lawyers, doctors, and other professionals and craftspeople)
- c. Would typically need to be purchased by the organization if they had not been provided by contribution

Additional guidance with regard to the accounting for and the reporting of donated services is provided in FASB Statement No. 116.

10.12 For governmental health care enterprises, contributions from one governmental entity to another governmental health care enterprise are accounted for in accordance with NCGA Statement No. 2, *Grant, Entitlement, and Shared Revenue Accounting by State and Local Governments*. FASB Statement No. 116 is not applicable to contributions and transfers among governmental entities. Contributions from one governmental entity to another governmental health care enterprise are accounted for in accordance with NCGA Statement No. 2 and GASB Statement No. 6, *Accounting and Financial Reporting for Special Assessments*. Furthermore, certain interfund transactions with other funds in the same financial reporting entity are to be accounted for as residual equity transfers or operating transfers, in accordance with paragraph 105 of NCGA Statement No. 1, *Governmental Accounting and Financial Reporting Principles*.

10.13 Additional guidance regarding accounting for contributions discussed above can be found in chapters 5 and 6 of the Audit and Accounting Guide *Not-for-Profit Organizations*, which also addresses the following:

- Permanent endowments
- Split-interest agreements
- Gifts in kind
- Contributed utilities, facilities, or use of long-lived assets

10.14 Foundations, business organizations, and other types of entities may provide resources to health care organizations under programs referred to as grants, awards, or sponsorships. Those asset transfers are contributions if the resource providers receive no value in exchange for the assets transferred or if the value received by the resource provider is incidental to the potential public benefit from using the assets transferred. The asset transfers are exchange transactions if the potential public benefit is secondary to the resource providers' potential direct benefits. For example, a research grant made by a foundation to a hospital would likely be a contribution if the research program is to be planned and carried out by the hospital and the hospital has the right to publish the results. If, however, the grant is made by a pharmaceutical manufacturer that provides potential new medications to be tested in the hospital's research facilities and retains the right to any patents or other results, the grant would likely be an exchange transaction.

Expenses

10.15 The basis and timing of the recognition of expenses for health care organizations generally are the same as for other business enterprises. Not-for-profit organizations report expenses as decreases in unrestricted net assets.

Financial Statement Presentation

10.16 The statement of operations for not-for-profit organizations should include a performance indicator that reports results of operations. Because of the importance of the performance indicator, it should be clearly labeled with a descriptive term such as *revenues over expenses*, *revenues and gains over expenses and losses*, *earned income*, or *performance earnings*. The notes to the financial statements should include a description of the nature and composition of the performance indicator. Not-for-profit organizations should report the performance indicator in a statement that also presents the total changes in unrestricted net assets. Other changes in net assets may be presented separately or in the same statement.

10.17 Health care organizations should report the following items separately from the performance indicator—

- a. Transactions with owners acting in that capacity.
- b. Equity transfers involving other entities that control the reporting entity, are controlled by the reporting entity, or are under common control with the reporting entity.
- c. Receipt of restricted contributions, including temporary restrictions (such as time or purpose) or permanent restrictions.
- d. Contributions of (and assets released from donor restrictions related to) long-lived assets.
- e. Unrealized gains and losses on investments not restricted by donors or by law, except for those investments classified as trading securities (see paragraph 4.07).
- f. Investment returns restricted by donors or by law (see paragraphs 4.08 through 4.10).
- g. Other items that are required by GAAP to be reported separately (such as extraordinary items, the effect of discontinued operations, the cumulative effect of accounting changes, minimum pension liabilities in accordance with paragraph 37 of FASB Statement No. 87, *Employers' Accounting for Pensions*, or foreign currency translation adjustments).³

10.18 Classifying revenues, expenses, gains, and losses within classes of net assets does not preclude incorporating additional classifications within the performance indicator. For example, within a class or classes of changes in net assets, a not-for-profit organization may classify items as operating and non-operating, expendable and nonexpendable, earned and unearned, recurring and nonrecurring, or in other ways. This Guide neither requires nor precludes reporting such intermediate measures or subtotals. However, because terms such as operating income are used with different meanings, if an intermediate measure of operations is reported and its use is not apparent from the details provided on the face of the statement, a note to the financial statements should describe the nature of the reported measure of operations or the items excluded from operations.

³ Governmental enterprises should report extraordinary items and the effect of discontinued operations in the statement of operations immediately preceding *net income*; the cumulative effect of an accounting change should be reported as an adjustment to *beginning fund balance* in the period of the change. Investor-owned enterprises should report extraordinary items, the effect of discontinued operations and the cumulative effect of an accounting change in the statement of operations immediately preceding net income.

10.19 For financial reporting purposes, patient service revenue is reported net of provisions for contractual and other adjustments in the operating statement. Significant revenue earned under capitation arrangements is reported separately. The notes to the financial statements disclose the methods of revenue recognition (for example, policies related to capitation revenue, patient service revenue, or contributions). In addition, with regard to contractual adjustments and third-party settlements, identification and explanation of the estimated amounts that are payable or receivable by the entity are disclosed.

10.20 As discussed in paragraph 10.03, patient service revenue does not include charity care. Management's policy for providing charity care, as well as the level of charity care provided, should be disclosed in the financial statements. Such disclosure generally is made in the notes to the financial statements and is measured based on the provider's rates, costs, units of service, or other statistical measure.

10.21 Expenses may be reported on the face of the financial statements using either a natural classification or a functional presentation. Public companies (that is, registrants with the SEC) are required to disclose segment information.⁴ Not-for-profit organizations that report using a natural classification of expenses are required to disclose expenses by functional classification.

10.22 The extent of classification and subclassification of expenses depends on many factors, such as the nature and complexity of the health care organization. For example, some entities may present only two categories: (a) health services (including inpatient services, outpatient procedures, home health services, etc.) and (b) general and administrative. Others may present additional distinctions such as physician services, research, and teaching. Functional allocations should be based on full cost allocations.

Auditing

10.23 The independent auditor may need to consider the examples of specific auditing objectives, selected control activities, and auditing procedures to audit revenue, expenses, gains, and losses that are presented in exhibit 10.1.

⁴ The segment reporting requirements of NCGA Interpretation No. 2, *Segment Information for Enterprise Funds*, apply to governmental health care enterprises.

Exhibit 10.1

Auditing Considerations

<i>Financial Statement Assertions</i>	<i>Specific Auditing Objectives</i>	<i>Selected Control Activities</i>	<i>Auditing Procedures</i>
<i>Revenue and Gains for Health Care Services</i>			
Existence and occurrence, completeness, and presentation and disclosure	Revenue and gains are reported in the proper period using the accrual basis of accounting and are classified properly by the type of service rendered.	Procedures help ensure that revenue is accrued as services are performed or as contractual obligations are satisfied.	Perform a walk-through of the revenue system. Compare the current period's revenue with prior periods' revenue and/or budgets and obtain explanations for large or unusual variances.
		Management establishes and monitors controls over the recognition of revenue.	Consider the adequacy of the controls over the revenue recognition process.
	In the statement of operations, revenue from health care services is reported, net of contractual adjustments and other adjustments, in the proper period and is classified properly.	Controls ensure that deductions from revenue are recorded in the proper period and are classified properly. Contractual and other adjustments are authorized, controlled, and recorded properly.	Review the financial statements to determine that revenue is reported net of contractual adjustments and other adjustments. Test contractual adjustments, other adjustments, and bad debts to determine that they are accounted for both in accordance with the respective contracts and the

<i>Financial Statement Assertions</i>	<i>Specific Auditing Objectives</i>	<i>Selected Control Activities</i>	<i>Auditing Procedures</i>
		Charity care, bad-debt writeoffs, and courtesy and policy discounts are authorized, controlled, and recorded properly.	entity's policy. Determine that specific and unallocated reserves appear reasonable and comparable to prior year. Review third-party payor contracts and methods of payment and test the entity's computation of estimated adjustments to revenue as required under such contracts.

Chapter 11

The Reporting Entity and Related Organizations

Overview

11.01 The FASB is presently studying the concept of the reporting entity and issues related to consolidations, application of the equity method of accounting, and accounting for various types of joint ventures. On October 14, 1995, the FASB released an exposure draft entitled *Consolidated Financial Statements: Policy and Procedures* as part of its project on consolidations and related matters. The conclusions in this chapter will be reconsidered when the FASB completes this project, which may affect the definition of *control* and other related matters. The GASB has issued Statement No. 14, *The Financial Reporting Entity*, which addresses these issues for governmental entities. GASB Statement No. 14 establishes standards for defining and reporting for the financial reporting entity and for reporting its participation in joint ventures. The GASB also has on its agenda a project on the reporting of affiliated organizations, such as foundations, and has issued an exposure draft of a proposed Statement entitled *The Financial Reporting Entity—Affiliated Organizations*. Accordingly, these matters may require reconsideration pending resolution by the FASB and the GASB.

11.02 Networks among health care organizations, both vertical and horizontal, are being formed continually and new organizational structures are being developed. The dynamics of change in the health care industry and their impact on evolving organizational structures must be considered in defining the reporting entity.

11.03 An integrated health care system typically consists of multiple related entities, operating both for-profit and not-for-profit organizations. A not-for-profit parent corporation may be the sole corporate member or, through other means, it may control other entities such as a not-for-profit hospital, a not-for-profit medical foundation that contracts with a for-profit physician group, or other not-for-profit providers such as a long-term care center, a substance abuse center, a surgery center, or an outpatient clinic. The system also may own stock in various for-profit ventures such as HMOs or insurance companies that may or may not provide patient care. Fund-raising typically is accomplished through a separate foundation. Foundations, auxiliaries, guilds, and similar organizations frequently assist and, in many instances, are related to the health care organization.

11.04 The guidance in this chapter relates to for-profit and not-for-profit consolidations of parent-subsidiary relationships, whether through stock ownership or other means of control. Other circumstances may exist in the health care industry where combined financial statements involving commonly controlled entities are more meaningful than their separate financial statements. More specific guidance related to combined financial statements can be found in ARB No. 51, *Consolidated Financial Statements*, paragraphs 22 and 23.¹

¹ In some situations, debt agreements may require combined financial statements of affiliated entities, the assets or revenues of which serve as collateral for the related debt (sometimes called an "obligated group"). ARB No. 51 applies to those situations. However, if debt or other agreements pre-

(continued)

Financial Reporting

11.05 Whether the financial statements of a reporting health care organization and those of one or more other for-profit or not-for-profit entities should be consolidated, whether those other entities should be reported using the equity method, and the extent of disclosure that should be required (if any) if consolidated financial statements are not presented, should be based on the nature of the relationship between the entities.

11.06 Health care organizations may be related to one or more other entities in numerous ways, including ownership, control, and/or economic interest.

11.07 As discussed in paragraphs 11.10 through 11.16, the existence of various forms of control and economic interests result in various financial reporting. Certain kinds of control result in consolidation (see paragraph 11.10). Other kinds of control result in consolidation only if coupled with an economic interest (see paragraph 11.11). Still other kinds of control result in consolidation being permitted but not required, if coupled with an economic interest (see paragraph 11.12). The existence of either control or an economic interest, but not both, is discussed in paragraph 11.13; disclosures concerning restrictions on distributions are discussed in paragraph 11.14; and reporting under the equity method of accounting is discussed in paragraph 11.16.

11.08 Control is the direct or indirect ability to determine the direction of management and policies through ownership, contract, or otherwise. However, the rights and powers of the controlling entity may vary depending on the legal structure of the controlled entity and the nature of control. The majority owner of a for-profit entity's voting stock or the sole corporate member of a not-for-profit entity may not only have the ability to determine the direction of the controlled entity but also have the proportionate right to (or the responsibility for) operating results and a residual interest in the net assets upon dissolution. However, in other situations, the rights of the controlling party may be more limited. For example, in the case of a sole general partner in a limited partnership, the limited partners—and not the general partner—may be entitled to the net assets upon dissolution. Further, the existence of “super-majority” voting rights can entitle the holder to disproportionate voting powers, and could affect the determination of the “controlling entity.” As a result, whether the financial statements of a controlled entity should be consolidated with the reporting entity depends on the nature of control and whether an economic interest exists.

11.09 An economic interest in another entity exists if (a) the other entity holds or utilizes significant resources that must be used for the unrestricted or restricted purposes of the reporting entity—either directly or indirectly—for producing income or providing services or (b) the reporting entity is responsible for the liabilities of the other entity. The following are examples of economic interests:

- Other entities solicit funds in the name of, and with the expressed or implied approval of, the reporting entity. In addition, substantially all of the funds solicited are intended by the contributor or are otherwise

(footnote continued)

scribe a financial presentation that varies from GAAP (for example, exclusion of entities otherwise required to be consolidated), the auditor should consider SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 623), for reporting guidance.

required to be transferred to the reporting entity or used at its discretion or direction.

- The reporting entity transfers significant resources to another entity whose resources are held for the benefit of the reporting entity.
- The reporting entity assigns certain significant functions to another entity.
- The reporting entity provides or is committed to provide funds for another entity or the reporting entity guarantees significant debt of another entity.
- The reporting entity has a right to, or the responsibility for, the operating results of another entity. Or, upon dissolution, the reporting entity is entitled to the net assets, or is responsible for any deficit, of another entity.

11.10 Health care organizations with a controlling financial interest in other entities through direct or indirect ownership of a majority voting interest² in those other entities should consolidate those other entities, unless control is likely to be temporary or does not rest directly or indirectly with the majority owner or sole corporate member (for example, if the subsidiary is in legal reorganization or in bankruptcy). In such situations consolidation is prohibited, as discussed in paragraph 13 of FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*.

11.11 In the case of (a) control through a majority voting interest in the board of another entity by means other than ownership or sole corporate membership³ and (b) an economic interest in such entities, consolidation is required, unless control is likely to be temporary or does not rest with the majority owner. In this situation consolidation is prohibited, as discussed in paragraph 13 of FASB Statement No. 94.

11.12 Control of a separate not-for-profit organization in which the reporting entity has an economic interest may take forms other than majority ownership or voting interest; for example, control may be through contract or affiliation agreement.⁴ In circumstances such as these, consolidation is permitted but not required, unless control is likely to be temporary. In this situation consolidation is prohibited, as discussed in paragraph 13 of FASB Statement No. 94. If the reporting entity controls a separate not-for-profit entity through

² Because not-for-profit organizations may exist in various legal forms, ownership of not-for-profit organizations may be evidenced in various ways. Examples include corporations issuing stock, corporations issuing ownership certificates, membership corporations issuing membership certificates, joint ventures, and partnerships. A parent corporation typically owns stock in a for-profit entity, whereas a sole corporate member holds membership rights in a not-for-profit entity. As it relates to health care consolidations, sole corporate membership in a not-for-profit entity is considered to be equivalent to ownership of a majority voting interest in a for-profit entity, unless the sole corporate member's economic interest in the controlled entity is limited by state law or contractual agreement.

³ For purposes of this Guide, a majority voting interest in the board of another entity by means other than ownership or sole corporate membership is illustrated by the following example. Entity B has a five-member board, and a simple voting majority is required to approve board actions. Entity A will have a majority voting interest in the board of entity B if three or more of its board members, officers, or employees serve on (or may be appointed at entity A's discretion to) the board of entity B. However, if three of entity A's board members serve on the board of entity B but entity A does not have the ability to require that those members serve on entity B's board, entity A does not have a majority voting interest in the board of entity B.

⁴ Evidence of control may include authority to amend articles of incorporation and bylaws or authority to approve operating, capital, and construction budgets; capital acquisitions; strategic plans, goals, and objectives; and mergers or dissolutions.

a form other than majority ownership (paragraph 11.10) or voting interest (paragraph 11.11), has an economic interest in that other entity, and consolidated financial statements are not presented, the notes to the financial statements should include the following disclosures:

- a. Identification of the other entity and the nature of its relationship with the reporting entity that results in control
- b. Summarized financial data of the other entity, including total assets, liabilities, net assets, revenue, and expenses; and resources that are held for the benefit of the reporting entity or that are under its control
- c. The disclosures set forth in FASB Statement No. 57, *Related Party Disclosures*

11.13 In some cases, one entity may have an economic interest in another entity without controlling it (for example, a noncontrolled entity may solicit funds in the name of, and with the expressed or implied approval of, the reporting entity and substantially all of the funds solicited are intended by the contributor to benefit the reporting entity). The existence of control (other than through ownership or sole corporate membership) or an economic interest, but not both, precludes consolidation but requires the disclosures set forth in FASB Statement No. 57.⁵

11.14 If consolidated financial statements are presented and they include a controlled not-for-profit organization, they should disclose any restrictions made by entities outside of the reporting entity on distributions from the controlled not-for-profit organization to the reporting entity and any resulting unavailability of the net assets of the controlled not-for-profit organization for use by the reporting entity.

11.15 When consolidated financial statements are required or permitted, a minority interest should be provided if such interest is represented by an economic interest whereby the minority interest would share in the operating results or residual interest upon dissolution.

11.16 Investments in common stock of for-profit entities in which the reporting entity has 50 percent or less of the voting stock in the investee should be reported under the equity method in conformity with APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, if the guidance in that opinion requires use of the equity method. The equity method should be followed by an investor whose investment in voting stock gives it the ability to exercise significant influence over operating and financial policies of an investee. Determining the ability of an investor to exercise significant influence is not always clear, and applying judgment is necessary to assess the status of each investment. However, to achieve a reasonable degree of uniformity, the ownership of 20 percent or more of the voting stock leads to a presumption that the investor can exercise significant influence and, therefore, the investment should be accounted for under the equity method in accordance with APB Opinion No. 18. However, this presumption can be overcome in certain instances. FASB Interpretation No. 35, *Criteria for Applying the Equity Method of Accounting for Investments in Common Stock*, paragraph 4, provides examples of indications that an investor may be unable to exercise significant

⁵ The existence of an economic interest does not necessarily cause the entities to be related parties, as defined in FASB Statement No. 57. However, the disclosures required by that statement are required under this Guide if an economic interest exists.

influence. Health care organizations that report investments on the equity method should make the financial statement disclosures required by APB Opinion No. 18.

11.17 This Guide provides guidance concerning consolidated financial statements. Consolidation of a parent or subsidiary organization requires the presentation of a single set of amounts for the entire reporting entity. Combination, as discussed in paragraphs 22 and 23 of ARB No. 51, refers to financial statements prepared for organizations between which common control exists but for which the parent-subsidiary relationship does not exist. Both consolidation and combination require elimination of interorganization transactions and balances. Paragraph 22 of ARB No. 51 states that “there are circumstances, however, where combined financial statements (as distinguished from consolidated statements) of commonly controlled companies are likely to be more meaningful than their separate statements.” This Guide prohibits consolidated financial statements in certain circumstances. However, it provides no guidance concerning combined financial statements of commonly controlled entities, which may be presented in certain circumstances in conformity with the guidance in ARB No. 51.

11.18 Paragraph 15 of FASB Statement No. 94 precludes the use of the parent company’s financial statements as the general-purpose financial statements of the primary reporting entity. Similarly, where consolidation is required, this Guide precludes the issuance of parent company financial statements as the general-purpose financial statements of the primary reporting entity. However, neither FASB Statement No. 94 nor this Guide discuss the use of the parent company’s financial statements as other than the general-purpose financial statements for the primary reporting entity.⁶ GAAP does not preclude the issuance of financial statements for the subsidiary only. However, care should be taken to include all disclosures required by FASB Statement No. 57 and other relevant pronouncements.

Transfers

11.19 Equity transfers are similar to ownership transactions between a for-profit parent and its owned subsidiary (for example, additional paid-in capital or dividends).⁷ However, equity transfers can occur only between related not-for-profit entities when one controls the other or both are under common control. An equity transfer embodies no expectation of repayment, nor does the transferor receive anything of immediate economic value (such as a financial interest or ownership). Equity transfers are reported separately as changes in net assets, are excluded from the performance indicator, and do not result in any step-up in basis of the underlying assets transferred.

11.20 Other transfers may occur among related entities. If the entities are consolidated or combined, such transfers are eliminated in consolidation and/or combination. If the entities are not consolidated or combined (for example, in separate subsidiaries or obligated group financial statements), the

⁶ Contractual agreements or regulatory provisions may require parent company only financial statements. SAS No. 62 provides guidance for reporting on financial presentations to comply with contractual agreements or regulatory provisions.

⁷ Transfers, including residual equity transfers, reported by governmental health care enterprises should be reported in accordance with NCGA Statement No. 1, *Governmental Accounting and Financial Reporting Principles*, paragraphs 105 and 106.

method of accounting for such transfers is dictated by the substance of the transaction as well as the legal form. For example, transfers by a foundation to a hospital under common control, when the foundation is acting other than as an owner, should be accounted for as contributions received by the hospital, consistent with FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*, and chapter 10 of this Guide. In other situations, payments may be made for services provided between not-for-profit entities under common control, which should be accounted for as revenues and expenses depending on the types of services provided.

11.21 A health care organization may loan or advance resources to a related entity. If repayment is reasonably assured, a receivable or payable should be recorded by the entities. Subsequent to the time a receivable is recorded, the ability of the receiving entity to repay the receivable should be considered. If the receivable is not to be repaid, or if the receiving entity is perceived as unable to repay, it may be accounted for as an equity transfer with the transferor reducing net assets and the transferee increasing net assets at the date such determination is made (see paragraph 11.19).

11.22 Transfers that result in changes in ownership interest are accounted for as investments in accordance with APB Opinion No. 18 and FASB Statement No. 94.

11.23 A related entity may act as an agent for the reporting entity. Resources transferred by a related fund-raising organization to an affiliated health care entity that were solicited in the name of the health care entity may represent transfers under an agency arrangement. The reporting entity (and not the agent) records the contribution received in accordance with FASB Statement No. 116. If a contribution is transferable to the ultimate recipient through an agent acting as an intermediary, the ultimate recipient should report the contribution when adequate evidence that the agent has received the promise to give or the contribution becomes available. FASB Interpretation No. 42, *Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power* (an interpretation of FASB Statement No. 116),⁸ clarifies that not-for-profit organizations that receive assets act as donees or donors, rather than as agents, trustees, or intermediaries, if the resource provider specifies a third-party beneficiary or beneficiaries and explicitly grants the recipient organization the unilateral power to redirect the use of the assets away from the specified beneficiary or beneficiaries. Such unilateral power is often referred to as *variance power*.

11.24 Assets transferred from one commonly controlled entity to another should be recorded by the transferee at the carrying value of the transferring entity. This treatment is consistent with the guidance prescribed by AICPA Accounting Interpretation No. 39, *Transfers and Exchanges Between Companies Under Common Control*, of APB Opinion No. 16, *Business Combinations*.

Disclosure

11.25 Significant relationships and transactions not in the ordinary course of business with directors, management, medical staff, or other related

⁸ FASB Interpretation No. 42 was issued in September 1996 and is effective for financial statements issued for fiscal years ending after September 15, 1996, with earlier application encouraged. The Interpretation may be applied either retroactively or by reporting the cumulative effect of the change in the year of the change.

parties (including unconsolidated related organizations) should be disclosed in accordance with FASB Statement No. 57. SAS No. 45, *Omnibus Statement on Auditing Standards—1983*, “Related Parties” (AICPA, *Professional Standards*, vol. 1, AU sec. 334), sets forth procedures for the auditor to consider in determining the existence of transactions with related parties and identifying them.

11.26 Hospital boards may contract with management companies to operate their facilities. Frequently, the management company will employ the administrator as well as other key personnel. Further, services may be acquired from entities related to the management company. The auditor should evaluate the impact of these arrangements on the hospital’s internal controls and disclose related party transactions as required by FASB Statement No. 57.

11.27 The reporting and disclosure requirements of the nongovernmental health care organization under the circumstances noted in paragraphs 11.10 through 11.18 are summarized as follows:

<i>Circumstances</i>	<i>Requirements</i>
The entity owns a majority of a for-profit entity’s voting stock.	Consolidate unless control is likely to be temporary or does not rest with the majority owner or the interest is limited by state law or contractual agreement.
The entity is the sole corporate member of a not-for-profit entity. (See paragraph 11.10, footnote 2.)	Consolidate unless control is likely to be temporary or does not rest with the majority owner or the sole corporate member’s interest is limited by state law or contractual agreement.
The entity controls another through a majority voting interest in the board and an economic interest exists.	Consolidate unless control is likely to be temporary or does not rest with the majority owner or the sole corporate member; or the interest is limited by state law or contractual agreement.
The reporting entity owns 50 percent or less of the common voting stock of an investee and can exercise significant influence over operating and financial policies.	The investment should be accounted for under the equity method in accordance with APB Opinion No. 18.
There have been material transactions between the health care entity and the related organization. (This could be present in any of the foregoing circumstances.)	In the notes to the financial statements (a) disclose the existence and nature of the relationship and (b) describe and quantify the transactions.
An entity has control over another not-for-profit organization or has an economic interest in the other, but not both.	In the notes to the financial statements (a) disclose the existence and nature of the relationship and (b) describe and quantify the transactions. Consolidation is prohibited.

<i>Circumstances</i>	<i>Requirements</i>
The reporting entity controls a separate not-for-profit entity through a form other than majority ownership or voting interest and has an economic interest in that other entity.	Consolidation permitted but not required. If consolidated statements are not presented, the notes to the financial statements should disclose (a) the identification of the other entity and the nature of its relationship with the reporting entity, (b) summarized financial data of the other entity, and (c) the disclosures set forth in FASB Statement No. 57.

Business Combinations

11.28 As discussed in paragraph 11.02, the dynamics of change in the health care industry have resulted in increased business combinations as new organizational structures are being formed. APB Opinion No. 16 provides guidance regarding business combinations concerning for-profit business enterprises and may provide a useful framework when evaluating similar transactions entered into by not-for-profit health care business organizations. A list of possible factors to be considered when evaluating these transactions in relation to APB Opinion No. 16 is summarized as follows:

<i>Circumstances</i>	<i>Accounting and Disclosure Guidance</i>
Monetary consideration received or paid, change in legal title to assets, and/or assumption of liabilities.	This is similar to a purchase under APB Opinion No. 16. ⁹
Change in control (for example, change in sole corporate member).	This is similar to a pooling of interests transaction under APB Opinion No. 16. No step-up in basis.

See paragraphs 1.33 and 1.34 for additional guidance regarding the application of APB Opinion No. 16 to not-for-profit organizations.

Auditing

11.29 The independent auditor may need to consider the examples of specific auditing objectives, control activities, and auditing procedures for related party organizations, balances, and transactions that are presented in exhibit 11.1.

⁹ See AICPA Accounting Interpretation No. 39 of APB Opinion No. 16 for treatment of transfers and exchanges between companies under common control.

Chapter 12

Independent Auditor's Reports

Overview

12.01 The guidance in SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508), applies to audit reports on the financial statements of health care organizations. Such a report may contain an unqualified opinion, an unqualified opinion with an explanatory paragraph, a qualified opinion, a disclaimer of opinion, or an adverse opinion. The facts and circumstances of each particular audit govern the appropriate form of the report.¹ Report examples appearing in this chapter illustrate the form of certain auditor's reports issued by the independent auditor in auditing the financial statements of a health care organization.

Unqualified Opinion

12.02 The independent auditor's standard report states that the financial statements present fairly, in all material respects, an entity's financial position, results of operations, changes in net assets, and cash flows in conformity with GAAP. This conclusion may be expressed only when the independent auditor has formed such an opinion on the basis of an audit performed in accordance with GAAS. An example of the independent auditor's standard report is presented in exhibit 12.1 at the end of this chapter.

Qualified Opinion

12.03 SAS No. 58 states that certain circumstances may require a qualified opinion. A qualified opinion states that except for the effects of the matter to which the qualification relates, the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows in conformity with GAAP. Such an opinion is expressed when—

- a. There is a lack of sufficient competent evidential matter or there are restrictions on the scope of the audit that have led the independent auditor to conclude that an unqualified opinion cannot be expressed and the independent auditor has concluded not to disclaim an opinion (see exhibit 12.2).
- b. The independent auditor believes, on the basis of the audit, that the financial statements contain a departure from GAAP, the effect of which is material, and has concluded not to express an adverse opinion (see exhibit 12.3).

¹ SAS No. 79, *Amendment to Statement on Auditing Standards No. 58, Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508), amends SAS No. 58 to eliminate the requirement that when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. It also clarifies and reorganizes the guidance in SAS No. 58 concerning emphasis paragraphs, uncertainties, and disclaimers of opinion.

Additional Information

12.04 SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1, AU sec. 551), contains useful guidance on reporting on additional information. The information covered by SAS No. 29 is presented to accompany the basic financial statements in an independent auditor-submitted document and is not considered necessary for a fair presentation of financial position, results of operations, changes in net assets, and cash flows in conformity with GAAP. Such information includes additional details or explanations of items in, or related to, the basic financial statements, consolidating/combining information, historical summaries of items extracted from the basic financial statements, statistical data, and other material, some of which may be from sources outside the accounting system or outside the health care organization.

12.05 With respect to supplementary and other information, guidance is contained in SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 550), and SAS No. 52, *Omnibus Statement on Auditing Standards—1987*, “Required Supplementary Information” (AICPA, *Professional Standards*, vol. 1, AU sec. 558). Among other changes, SAS No. 52 amends SAS No. 29 regarding required supplementary information. In addition, SAS No. 42, *Reporting on Condensed Financial Statements and Selected Financial Data* (AICPA, *Professional Standards*, vol. 1, AU sec. 552), contains guidance on reporting in a client-prepared document when condensed financial statements or selected financial data are presented by a public entity.

Special Reports

12.06 If a health care organization is required to follow reporting requirements of a regulatory agency, to report under a cash receipts and disbursements basis of accounting, or to report on another comprehensive basis of accounting other than GAAP, the auditor should follow the guidance in SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 623). SAS No. 62 also provides reporting guidance when reporting on specified elements, accounts, or items of a financial statement; compliance with aspects of contractual agreements or regulatory requirements related to audited financial statements; financial presentations to comply with contractual agreements or regulatory provisions; and financial information presented in prescribed forms (see exhibit 12.4). Accountants’ reports on regulatory basis financial statements generally are prescribed by professional standards as limited use reports. Where obligated group financial statements exclude entities that are required under GAAP to be consolidated in order to comply with loan agreements, the accountants’ report should contain a limited use restriction. Use should be limited to the company and other parties to the agreement. Guidance may also be found in SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AICPA, *Professional Standards*, vol. 1, AU sec. 622). Health care providers that receive federal financial assistance should also refer to SOP 92-9, *Audits of Not-for-Profit Organizations Receiving Federal Awards* (if a not-for-profit non-governmental entity) or the AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units* (if a governmental entity).

Exhibit 12.1

Unqualified Opinion—Comparative Financial StatementsIndependent Auditor's Report

To the Board of Trustees
XYZ Health Care Organization

We have audited the accompanying balance sheets of XYZ Health Care Organization as of September 30, 19X2, and 19X1, and the related statements of operations, changes in net assets, and cash flows for the years then ended. These financial statements are the responsibility of XYZ Health Care Organization's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Health Care Organization as of September 30, 19X2, and 19X1, and the results of its operations, changes in net assets, and cash flows for the years then ended in conformity with generally accepted accounting principles.

[Signature]

[Date]

Exhibit 12.2

Qualified Opinion—Scope LimitationIndependent Auditor's Report

To the Board of Trustees
XYZ Health Care Organization

[Include same first paragraph as the standard report—see exhibit 12.1]

Except as discussed in the following paragraph, we conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We were unable to obtain audited financial statements supporting XYZ's investment in an affiliate stated at \$XXX,XXX and \$XXX,XXX at September 30, 19X2, and 19X1, respectively, or its equity in earnings of that affiliate of \$XXX,XXX and \$XXX,XXX, which is included in the statement of operations for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the affiliate or the equity in its earnings by other auditing procedures.

In our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the affiliate investment and earnings, the financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of XYZ Health Care Organization as of September 30, 19X2, and 19X1, and the results of its operations, changes in net assets, and cash flows for the years then ended in conformity with generally accepted accounting principles.

Exhibit 12.3

**Qualified Opinion—Departure From
Generally Accepted Accounting Principles
That Have a Material Effect on the Financial Statements**

Independent Auditor's Report

To the Board of Trustees
XYZ Health Care Organization

*[Include same first and second paragraphs as the
standard report—see exhibit 12.1]*

XYZ Health Care Organization has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized to conform with generally accepted accounting principles. If these lease obligations were capitalized, property would be increased by \$XXX,XXX and \$XXX,XXX, long-term debt would be increased by \$XXX,XXX and \$XXX,XXX, and unrestricted net assets would be increased by \$XXX,XXX and \$XXX,XXX as of September 31, 19X2, and 19X1, respectively. In addition, earnings would be increased by \$XXX,XXX and \$XXX,XXX, respectively, for the years then ended.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of XYZ Health Care Organization as of September 30, 19X2, and 19X1, and the results of its operations, changes in net assets, and cash flows for the years then ended in conformity with generally accepted accounting principles.

[Date]

Exhibit 12.4

**Report on Financial Statements Prepared Pursuant to a
Master Trust Indenture That Results in a Presentation Not
in Conformity With Generally Accepted Accounting Principles
or Other Comprehensive Basis of Accounting**

Independent Auditor's Report

To the Board of Directors
Sample Health Care Corporation

We have audited the accompanying special-purpose combined balance sheets of the Obligated Group (as defined in the Master Trust Indenture dated December X, 19X0, between Sample Health Care Corporation and Any Bank as Trustee) of Sample Health Care Corporation and Affiliates as of December 31, 19X2, and 19X1, and the related special-purpose combined statements of operations, changes in net assets, and cash flows for the years then ended. These financial statements are the responsibility of management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note 1, these special-purpose financial statements were prepared in accordance with the accounting requirements set forth in the Master Trust Indenture and are not intended to be a presentation in conformity with generally accepted accounting principles.

In our opinion, the special-purpose financial statements of the Obligated Group as of and for the years ended December 31, 19X2, and 19X1, are fairly presented, in all material respects, on the basis of accounting described in Note 1.

This report is intended solely for the information and use of the board of directors and management of Sample Health Care Corporation, the Trustee under the Master Trust Indenture, and bondholders, and should not be used for any other purpose.

Chapter 13

Financial Accounting and Reporting by Providers of Prepaid Health Care Services

Overview

13.01 This chapter provides guidance on applying GAAP to providers of prepaid health care services for the accounting and reporting of health care costs, contract losses (premium deficiencies), stop-loss insurance (reinsurance), and contract acquisition costs.

Accounting for Health Care Costs

13.02 Health care costs should be accrued as services are rendered, including estimates of the costs of services rendered but not yet reported. Furthermore, if a provider of prepaid health care services is obligated to render services to specific members beyond the premium period due to provisions in the contract or regulatory requirements, the costs of such services to be incurred also should be accrued currently. Costs that will be incurred after a contract is terminated, such as guaranteed salaries, rent, and depreciation, net of any anticipated revenues, should be accrued when it is determined that a contract with a sponsoring employer or other group will be terminated.

13.03 Amounts payable to hospitals, physicians, or other health care providers under risk-retention, bonus, or similar programs should be accrued during the contract period based on relevant factors, such as experience to date.

13.04 The basis for accruing health care costs and significant business and contractual arrangements with hospitals, physicians, or other associated entities should be disclosed in the notes to the financial statements.

Accounting for Loss Contracts

13.05 A prepaid health care provider enters into contracts to provide members with specified health care services for specified periods in return for fixed periodic premiums. The premium revenue is expected to cover health care costs and other costs over the terms of the contracts. Only in unusual circumstances would a provider be able to increase premiums on contracts in force to cover expected losses. A provider may be able to control or reduce future health care delivery costs to avoid anticipated losses, but the ability to avoid losses under existing contracts may be difficult to measure or to demonstrate. Associated entities such as hospitals, medical groups, and individual practice associations (IPAs) may enter into similar contracts with prepaid health care providers in which they agree to deliver identified health care services to the providers' members for specified periods in return for fixed fees.

13.06 FASB Statement No. 5, *Accounting for Contingencies*, states that a loss should be accrued in financial statements when it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. Accordingly, losses should be recognized when it is probable that expected fu-

ture health care costs and maintenance costs under a group of existing contracts will exceed anticipated future premiums and stop-loss insurance recoveries on those contracts. The estimated future health care costs and maintenance costs to be considered in determining whether a loss has been incurred should include fixed and variable, direct and allocable indirect costs. Contracts should be grouped in a manner consistent with the provider's method of establishing premium rates, for example, by community rating practices, geographical area, or statutory requirements, to determine whether a loss has been incurred.

Accounting for Stop-Loss Insurance

13.07 In stop-loss insurance, prepaid health care providers or associated entities transfer portions of their financial risks to other companies. A provider typically contracts to recover health care costs in excess of stated amounts during the contract periods.

13.08 Stop-loss insurance premiums should be included in reported health care costs. Stop-loss insurance recoveries should be reported as reductions of related health care costs. Receivables representing amounts recoverable from insurers should be reported as assets, reduced by appropriate valuation allowances. In addition, the nature, amounts, and effects of significant stop-loss insurance contracts should be disclosed.

Accounting for Contract Acquisition Costs

13.09 Many prepaid health care providers incur costs that vary with, and are primarily related to, the marketing of subscriber contracts and member enrollment. These costs, sometimes referred to as acquisition costs, consist mainly of commissions paid to agents or brokers and incentive compensation based on new enrollments. Commissions and incentive compensation may be paid when the contracts are written, at later dates, or over the terms of the contracts as premiums are received. Some providers incur additional costs directly related to the acquisition of specific contracts, such as the costs of specialized brochures, marketing, and advertising. Providers also incur costs that are related to the acquisition of new members but that do not relate to specific contracts and are not considered acquisition costs. These costs include salaries of the marketing director and staff, general marketing brochures, and general advertising and promotion expenses.

13.10 Although there is theoretical support for deferring certain acquisition costs, acquisition costs of providers of prepaid health care services—other than costs of advertising—should be expensed as incurred.¹ Advertising costs should be accounted for in conformity with the guidance in SOP 93-7, *Reporting on Advertising Costs*.²

¹ In accordance with existing practice, as mandated by SOP 89-5, *Financial Accounting and Reporting by Providers of Prepaid Health Care Services*. Although SOP 89-5 has been superseded with the issuance of this Audit and Accounting Guide, its provisions have been adopted in this chapter.

² This pronouncement is not applicable to governmental health care enterprises that do not apply paragraph 7 of GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*. (See chapter 1, footnote 1.)

Chapter 14

Financial Accounting and Reporting by Continuing Care Retirement Communities

Overview

14.01 This chapter provides guidance on applying GAAP to continuing care retirement communities (CCRCs) for refundable and nonrefundable advance fees, for obligations to provide future services and the use of facilities to current residents, and for the costs of acquiring initial care contracts.¹

14.02 The United States has over one thousand CCRCs. Most CCRCs are operated by not-for-profit organizations, and many are affiliated with religious organizations.

14.03 CCRC facilities may be independent or they may be affiliated with other health care facilities. They usually provide less intensive care than do hospitals. They generally supply required continuous nursing service or appropriate assistance to residents who have a wide range of medical conditions and needs.

14.04 Some states regulate CCRCs, although most states currently do not. There is, however, a growing trend toward regulation in this rapidly developing industry. States that do require some form of regulation specify that the CCRCs be certified by a state authority, such as a department of insurance or a department of social services. In addition, some states mandate that escrow or reserve funds be maintained for the protection of residents.

Types of Contracts

14.05 CCRCs use three basic types of contracts. They include all-inclusive (type A), modified (type B), and fee-for-service (type C) contracts.

Type A Contracts

14.06 An all-inclusive continuing-care contract includes residential facilities, meals, and other amenities. It also provides long-term nursing care for little or no increase in periodic fees, except to cover normal operating costs and inflation.

Type B Contracts

14.07 A modified continuing-care contract also includes residential facilities, meals, and other amenities. However, only a specified amount of long-term nursing care is provided for little or no increase in periodic fees, except to

¹ The provisions of this chapter do not apply to governmental health care enterprises, unless the entity has elected to follow all FASB pronouncements under paragraph 7 of GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*. (See chapter 1, footnote 1.)

cover normal operating costs and inflation. After the specified amount of nursing care is used, residents pay either a discounted rate or the full per diem rates for required nursing care.

Type C Contracts

14.08 A fee-for-service continuing-care contract includes residential facilities, meals, and other amenities as well as emergency and infirmary nursing care. Access to long-term nursing care is guaranteed, but it may be required at full per diem rates.

Types of Living Accommodations

14.09 CCRCs offer different types of living accommodations to residents, such as single or shared apartment units or individual homes. They also provide a variety of amenities, including social, recreational, dining, and laundry services.

14.10 CCRCs may provide long-term nursing-care services, either at the same location or, by agreement, with another facility. Residents are transferred to or from a nursing center as medical care is required. As the health of a resident declines, he or she may be transferred permanently to a nursing center.

Fees and Payment Methods

14.11 Continuing-care contracts contain a number of different approaches to providing delivery of services. Contract provisions, for example, may stipulate the amount of the advance fee, whether periodic fees will be required, and, if so, whether they can be adjusted. In addition, contracts generally do the following: detail the future services that will be provided to residents; explain how a resident will be charged for services; describe the CCRC's refund policies and the formula for calculating the amount of the refund, which may be simple or complex; and describe the obligations of the CCRC and the resident if a contract is terminated or a residential unit is reoccupied.

14.12 A CCRC may require several different payment methods for services and the use of facilities. Paragraphs 14.13 through 14.19 discuss three of the most prevalent methods.

Advance Fee Only

14.13 Under this method, a resident pays an advance fee in return for future services and the use of facilities. Such services generally include CCRC housing-related services (for example, meals, laundry, housekeeping, and social services) and health care. These services usually are provided to the resident for the remainder of his or her life or until the contract is terminated. Additional periodic fees are not paid, regardless of how long a resident lives or if the resident requires more services than anticipated. Generally, the resident receives no ownership interest in the facility.

Advance Fee With Periodic Fees

14.14 Under this method, a resident pays an advance fee and periodic fees for services and the use of facilities. Such periodic fees may be fixed, or they may be subject to adjustment for increases in operating costs or inflation or for other economic reasons.

Periodic Fees Only

14.15 Under this method, a resident pays a fee at periodic intervals for services and the use of the facilities provided by the CCRC. Such fees may be either fixed or adjustable.

14.16 An advance fee may be met by transferring a resident's personal assets (which may include rights to future income) or by paying a lump sum of cash to the CCRC.

14.17 Advance fees received for future services may be refunded at the occurrence of some future event, such as death, withdrawal from the CCRC, termination of the contract, or reoccupancy of a residential unit. The amount of the refund generally is based on contractual provisions or statutory requirements.

14.18 Many continuing-care contracts are similar to annuity contracts. Under those contracts, the CCRC assumes the risks associated with (a) estimating the amount of the advance fee and other fees to be paid by a resident and (b) determining whether such fees will be sufficient to cover the cost of providing a resident's required services and the use of facilities. For some contracts, residents may share the future costs without limit.

14.19 The CCRC has an obligation to provide future services for the length of the contract or the life of the resident. In certain circumstances, this obligation continues regardless of whether advance fees or periodic fees are sufficient to meet the costs of providing services to a resident.

Accounting for Refundable Advance Fees

14.20 Payment of an advance fee generally is required before a resident acquires a right to reside in an apartment or residential unit for life. A portion of advance fees may be refundable by rescission within a legally set time period or if a certain future event occurs, such as the death or withdrawal of a resident or termination of the contract. Some refunds are paid only if a residential unit is reoccupied.

14.21 CCRC refund policies vary either by region or according to statutory requirements, but generally the amount of the refund is based on provisions specified in a contract. For example, some contracts require a refund of the advance fee, less a reasonable processing fee. Amounts refunded may be based on a fixed amount or percentage, an amount that declines to a fixed amount over time, an amount that declines to zero, or an amount based on the resale amount. Refunds may be contingent on vacating the unit, resale of the unit, or passage of a fixed period of time if the unit is not resold.

14.22 The estimated amount of advance fees that is expected to be refunded to current residents under the terms of the contracts should be accounted for and reported as a liability. The estimated amount should be based on the individual facility's own experience or, if records are not available, on the experience of comparable facilities. The remaining amount of advance fees should be accounted for as deferred revenue within the liability section of the balance sheet. Adjustments to the estimated liability should be accounted for as deferred revenue and amortized together with nonrefundable advance fees as discussed in paragraph 14.23. The gross amount of contractual refund obligations under existing contracts and the CCRC's refund policy should be disclosed in the notes to the financial statements. Amounts refunded should be disclosed in the statement of cash flows as a financing transaction.

14.23 The deferred revenue should be amortized to income over future periods based on the estimated life of the resident or on the contract term, if shorter. The period of amortization should be adjusted annually based on the actuarially determined, estimated, remaining life expectancy of each individual or on the joint and last survivor life expectancy of each pair of residents occupying the same unit. The straight-line method should be used to amortize deferred revenue except in certain circumstances when costs are expected to increase at a significantly higher rate than future revenues in the later years of residence. In those situations, deferred revenue may be amortized to income using a method that reflects the disproportionate ratio between the costs of the expected services and the expected revenues. The amortized amount should not exceed the amount available to the CCRC under state regulations, contract provisions, or management policy. Unamortized deferred revenue from nonrefundable advance fees should be recorded as revenue upon a resident's death or the termination of the contract. The method of amortization should be disclosed in the notes to the financial statements.

Accounting for Fees Refundable to Residents Only From Reoccupancy Proceeds of a Contract Holder's Unit

14.24 Some contracts between a CCRC and a resident stipulate that all or a portion of the advance fee may be refundable if the contract holder's unit is reoccupied by another person. The source of money for the payment is from the proceeds of the advance fees collected by the CCRC from the next resident of the reoccupied unit. The terms governing how the proceeds from the next resident are to be paid to the previous resident vary from contract to contract. In effect, the CCRC acts as if it were an agent for present and future residents.

14.25 The portion of the fees that will be paid to current residents or their designees, only to the extent of the proceeds of reoccupancy of a contract holder's unit, should be accounted for as deferred revenue, provided that legal and management policy and practice support the withholding of refunds under this condition. Similar amounts received from new residents in excess of the amount to be paid to previous residents or their designees also should be deferred. The deferred revenue should be amortized to income over future periods based on the remaining useful life of the facility. The basis and method of amortization should be consistent with the method for calculating depreciation and should be disclosed in the notes to the financial statements.

Accounting for Nonrefundable Advance Fees

14.26 Under provisions of continuing-care contracts entered into by a CCRC and residents, nonrefundable advance fees represent payment for future services and should be accounted for as deferred revenue. If a CCRC has sufficient historical experience and relevant statistical data about life expectancies, it should consider that information when determining the remaining life of residents. A CCRC with insufficient historical experience or reliable actuarial data may use relevant data of similar communities within that area, relevant national industry statistics, or other appropriate data. Nonrefundable advance fees should be amortized in the manner discussed in paragraph 14.23.

14.27 The application of the conclusions in paragraphs 14.25 and 14.26 is presented in exhibit 14.1 at the end of this chapter.

Accounting for the Obligation to Provide Future Services and the Use of Facilities to Current Residents

14.28 A CCRC expects to provide services and the use of facilities to individuals over their remaining lives under continuing-care contract agreements. The nature and extent of such services depend on such variables as the individual's age, health, sex, and economic status upon entering the CCRC. Thus, the CCRC assumes a risk in estimating the cost of future services and the use of facilities. Although many CCRCs are allowed contractually to increase periodic fees, some contracts may restrict increases in periodic fees and require continuing services without additional compensation. If the advance fees and periodic fees charged are insufficient to meet the costs of providing future services and the use of facilities, the CCRC has a liability to provide future services and the use of facilities that is equal to the estimated cost of providing future services and the use of facilities (defined as amounts that are expected to be incurred to provide services and the use of facilities to individuals over their remaining lives under continuing care contracts, including resident-care, dietary, health care, facility, interest, depreciation, and amortization costs) in excess of the related anticipated revenues. The liability is based on actuarial assumptions (such as mortality and morbidity rates), on estimates of future costs and revenues, and on the specific CCRC's historical experience and statistical data.

14.29 The obligation to provide future services and the use of facilities to current residents should be calculated annually in order to determine whether a liability should be reported in the financial statements. The liability related to continuing-care contracts is the present value of future net cash flows, minus the balance of unamortized deferred revenue, plus depreciation of facilities to be charged related to the contracts, plus unamortized costs of acquiring the related initial continuing-care contracts, if applicable. The calculation should be made by grouping contracts by type, such as all contracts with a limit on annual increases in fees, contracts with unlimited fee increases, and so forth.

14.30 Cash inflows include revenue contractually committed to support the residents and inflows resulting from monthly fees including anticipated increases in accordance with contract terms. This includes third-party payments, contractually or statutorily committed investment income from services related to CCRC activities, contributions pledged by donors to support CCRC activities, and the volume of deferred nonrefundable advance fees. Cash outflows are composed of operating expenses, including interest expense and excluding selling, and general and administrative expenses. Anticipated cost increases affecting these operating expenses should be considered in determining cash outflows. The expected inflation rate as well as other factors should be considered in determining the discount rate. In calculating the liability, the specific CCRC's historical experience or statistical data relating to the residents' life spans should be used. The life spans used should be the same as those used to amortize deferred revenue (see paragraph 14.23). For a new CCRC, either relevant data of similar communities in the area or relevant national industry statistics may be used if they are deemed to be representative.

14.31 In October 1988, the FASB added the issue of discounting to its agenda. Until the discounting issue is resolved, a CCRC should disclose in its notes to the financial statements (1) the carrying amount of the liability to provide future services and the use of facilities related to continuing-care con-

tracts that is presented at present value in the financial statements (if not separately disclosed in the balance sheet) and (2) the interest rate used to discount that liability.

14.32 The application of the conclusions in paragraph 14.30 is presented in exhibit 14.2 at the end of this chapter.

Accounting for the Costs of Acquiring Initial Continuing-Care Contracts

14.33 Advertising cost incurred in connection with acquiring initial continuing-care contracts should be accounted for in conformity with the guidance in SOP 93-7, *Reporting on Advertising Costs*. Other costs of acquiring initial continuing-care contracts that are expected to be recovered from future contract revenues should be capitalized. These costs should be amortized to expenses on a straight-line basis over the average expected remaining lives of the residents under the contract or the contract term, if shorter. The costs of acquiring continuing-care contracts after a CCRC is substantially occupied or one year following completion should be expensed when incurred.²

Financial Statements

14.34 A complete set of illustrative financial statements for a CCRC is included in appendix A.

14.35 The notes to the financial statements for each year presented should include—

- A description of the CCRC and the nature of the related continuing-care contracts entered into by the CCRC.
- The statutory escrow or similar requirements.
- The refund policy of the CCRC and the general amount of refund obligation under the existing contracts.
- The interest rate used to discount the liability to provide future services.

Auditing

14.36 When auditing a CCRC, the independent auditor may need to consider the examples of specific auditing objectives, selected control activities, and auditing procedures that are presented in exhibit 14.3 at the end of this chapter.

² In accordance with existing practice, as mandated by SOP 90-8, *Financial Accounting and Reporting by Continuing Care Retirement Communities*. Although SOP 90-8 is superseded with the issuance of this Audit and Accounting Guide, its provisions have been adopted in this chapter.

Exhibit 14.1

Accounting for Refundable and Nonrefundable Advance Fees

Assumptions:

- The unit is occupied for twenty years.
- The facility has an estimated thirty-year life.
- The resident is admitted on the first day of the year indicated and dies on the last day of year indicated.
- The estimated remaining life expectancy is taken from an appropriate actuarial table.
- The cost of providing future services is expected to be incurred equally over the remaining life.

Example:

Year Admitted	Dies	Resident	Entry Age	Advance Fees			Refunded to the Previous Occupant*
				Total	Nonrefundable 25%	Refundable 75%	
1	4	A	68	\$100,000	\$25,000	\$ 75,000	—
5	8	B	82	120,000	30,000	90,000	\$75,000
9	13	C	79	150,000	37,500	112,500	90,000
14	—	D	80	130,000	32,500	97,500	97,500

Amortization of Nonrefundable Advance Fees:

<i>Resident A</i>	<i>Unamortized Deferred Revenue</i>	<i>Estimated Remaining Life (in Years)</i>	<i>Income</i>
Year 1	\$25,000	12.1 =	\$ 2,066
2	22,934	11.5 =	1,994
3	20,940	11.1 =	1,886
4	19,054	10.6 =	1,798

Unamortized deferred revenue recognized upon the death of the resident	17,256
Total	<u>\$25,000</u>

* Per contract, the amount is limited to 75% of proceeds of reoccupancy up to amount originally paid by previous occupant.

Amortization of Advance Fees Refundable to Residents

\$75,000/30 years = \$2,500 per year for years 1 through 4

15,000/26 years = \$577 additional or \$3,077 per year for years 5 through 8

22,500/22 years = \$1,023 additional or \$4,100 per year for years 9 through next change in occupancy

Health Care Organizations

<u>Resident B</u>	<u>Unamortized Deferred Revenue</u>	<u>Estimated Remaining Life (in Years)</u>	<u>Income</u>
Year 5	\$30,000	6.1 =	\$ 4,918
6	25,082	5.8 =	4,324
7	20,758	5.5 =	3,774
8	16,984	5.3 =	3,205

Unamortized deferred revenue recognized upon the death of the resident	13,779
Total	<u>\$30,000</u>

<u>Resident C</u>	<u>Unamortized Deferred Revenue</u>	<u>Estimated Remaining Life (in Years)</u>	<u>Income</u>
Year 9	\$37,500	7.0 =	\$ 5,357
10	32,143	6.7 =	4,797
11	27,346	6.4 =	4,273
12	23,073	6.1 =	3,783
13	19,290	5.8 =	3,324

Unamortized deferred revenue recognized upon the death of the resident	15,966
Total	<u>\$37,500</u>

<u>Resident D</u>	<u>Unamortized Deferred Revenue</u>	<u>Estimated Remaining Life (in Years)</u>	<u>Income</u>
Year 14	\$32,500	6.7 =	\$4,851
15	27,649	6.4 =	4,321
16	23,328	6.1 =	3,824
17	19,504	5.8 =	3,363
18	16,141	5.5 =	2,935
19	13,206	5.3 =	2,492
20	10,714	5.1 =	2,100

Amortization continues until the death of the resident.

Exhibit 14.2

Accounting for the Obligation to Provide Future Services and the Use of Facilities to Current Residents

Assumptions:

- a. All residents pay a \$ 50,000 fee, which is refundable less 2 percent per month for the first 36 months. After that period, none of the fee is refundable. The CCRC opened on 1/1/X4. (See exhibit 14.1 for an illustration of how to compute refundable and deferred revenue.)
- b. An additional periodic fee of \$1,000 is payable monthly with a 5 percent increase annually.
- c. The unamortized (deferred) costs of acquiring related initial contracts on 12/31/X6 are assumed to be \$17,000.
- d. The unamortized deferred revenue on 12/31/X6 is assumed to be \$27,027.

Present value of net cash flow on 12/31/X6:

Cash inflows:

<u>Resident</u>	<u>Estimated Remaining Life (in Months) on 12/31/X6</u>	<u>Estimated Cash Inflows</u>			
		<u>19X7</u>	<u>19X8</u>	<u>19X9</u>	<u>20X0</u>
A	36	\$12,000	\$12,600	\$13,230	—
B	22	12,000	10,500	—	—
C	27	12,000	12,600	3,308	—
D	38	12,000	12,600	13,230	\$2,315
Estimated cash inflows		<u>\$48,000</u>	<u>\$48,300</u>	<u>\$29,768</u>	<u>\$2,315</u>

Cash outflows:

<u>Resident</u>	<u>Estimated Remaining Life (in Months) on 12/31/X6</u>	<u>Estimated Cash Outflows</u>			
		<u>19X7</u>	<u>19X8</u>	<u>19X9</u>	<u>20X0</u>
A	36	\$10,000	\$12,000	\$15,000	—
B	22	15,000	11,000	—	—
C	27	14,000	17,000	5,000	—
D	38	8,000	12,000	14,000	\$4,000
Estimated cash outflows		<u>\$47,000</u>	<u>\$52,000</u>	<u>\$34,000</u>	<u>\$4,000</u>

<u>Recapitulation</u>	<u>19X7</u>	<u>19X8</u>	<u>19X9</u>	<u>20X0</u>
Cash inflows	\$ 48,000	\$ 48,300	\$ 29,768	\$ 2,315
Cash outflows	(47,000)	(52,000)	(34,000)	(4,000)
	<u>\$ 1,000</u>	<u>\$ (3,700)</u>	<u>\$ (4,232)</u>	<u>\$ (1,685)</u>

Present value of net cash flows discounted at 10 percent \$(7,137)

Depreciation of facilities to be charged to current residents:

Original cost of facility		\$17,000,000
Cost of facility allocable to revenue-producing service areas		\$(2,000,000)
Cost of facility to be allocated to residents (including common areas)		\$15,000,000
Useful life	40 years	
Annual depreciation using straight-line method		\$ 375,000
Number of residents expected to occupy the facility	200	
Annual depreciation per resident		\$ 1,875
Monthly depreciation per resident		\$ 156

<i>Resident</i>	<i>Estimated Remaining Life (in Months) on 12/31/X6</i>	<i>19X7</i>	<i>19X8</i>	<i>19X9</i>	<i>20X0</i>
A	36	\$1,875	\$1,875	\$1,875	—
B	22	1,875	1,560	—	—
C	27	1,875	1,875	468	—
D	38	<u>1,875</u>	<u>1,875</u>	<u>1,875</u>	<u>\$ 312</u>
Yearly estimated depreciation of facilities to be charged to current residents		<u>\$7,500</u>	<u>\$7,185</u>	<u>\$4,218</u>	<u>\$ 312</u>
Total estimated depreciation of the use of facilities to be charged to the current residents					<u><u>\$19,215</u></u>

Liability for providing future services and the use of facilities to current residents:

Present value of future net cash outflows	\$ 7,137
Minus:	
Unamortized deferred revenue on 12/31/X6	(27,027)
Plus:	
Depreciation to be charged to current residents	19,215
Unamortized costs of acquiring initial contracts—see assumption c above	<u>17,000*</u>
Liability for providing future services and the use of facilities to current residents on 12/31/X6	<u><u>\$16,325</u></u>

* These numbers are for illustrative purposes only and no inference has been made as to the recoverability of the \$17,000.

Appendix A

Illustrative Financial Statements

The following illustrative financial statements illustrate the applications of the reporting practices discussed in this guide. Specific types of health care organizations have been selected to illustrate a wide diversity of reporting practices. It is not intended that these illustrations represent either the only types of disclosure nor the only statement formats that would be appropriate. For example, the reporting of revenue, expenses, gains, and losses vary depending on the relationship of the underlying transaction to the entity's operations. More or less detail should appear either in the financial statements or in the notes to the financial statements, depending on the circumstances.

Governmental health care entities are required to follow the accounting and reporting requirements of the GASB. GASB pronouncements may require governmental health care entities to present information beyond or different from that presented by not-for-profit and investor-owned entities. For example, GASB Statement No. 3, *Deposits with Financial Institutions, Investments (including Repurchase Agreements), and Reverse Repurchase Agreements*, requires governmental entities to make certain disclosures about the credit and market risks of their investments. GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, requires certain accounting for and disclosures about pension benefits provided to employees of governmental health care entities, and is effective for periods beginning after June 15, 1997, with earlier implementation encouraged. GASB Statement No. 9, *Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities That Use Proprietary Fund Accounting*, requires governmental health care entities to present a statement of cash flows using a format that differs in some respects from that required by FASB Statement No. 95, *Statement of Cash Flows*, and that requires the reporting of cash flow information on both restricted and unrestricted funds. GASB Statement No. 12, *Disclosure of Information on Postemployment Benefits Other Than Pension Benefits by State and Local Governmental Employers*, requires certain disclosures about other postemployment benefits (OPEB) provided to employees of governmental health care entities. GASB Statement No. 12 also provides that governmental health care entities are not required to change their recognition and measurement of OPEB to comply with FASB Statement No. 106, *Accounting for Postretirement Benefits Other Than Pensions*, or FASB Statement No. 112, *Employer's Accounting for Postemployment Benefits*. In June 1995, the GASB issued for comment *Preliminary Views, Governmental Financial Reporting Model: Core Financial Statements*, as part of its governmental financial reporting model project. That project has the potential to change the definition of enterprise funds, the format and number of financial statements, and reporting on restricted contributions to (and equity of) governmental health care enterprises, among other matters. Practitioners should be aware of this project and any effects it may have on accounting and reporting by governmental health care enterprises.

Other GASB pronouncements may also have implications for governmental health care entities. For example, GASB Statement No. 13, *Accounting for Operating Leases with Scheduled Rent Increases* (paragraph 6.10), may affect the accounting for and financial reporting of certain lease transactions. Discus-

sed elsewhere in this Audit and Accounting Guide are GASB Statement No. 6, *Accounting and Financial Reporting for Special Assessments* (paragraph 10.12), GASB Statement No. 7, *Advance Refundings Resulting in Defeasance of Debt* (paragraph 7.18), GASB Statement No. 10, *Accounting and Financial Reporting for Risk Financing and Related Insurance Issues* (paragraph 8.02), GASB Statement No. 14, *The Financial Reporting Entity* (paragraph 11.01), GASB Statement No. 16, *Accounting for Compensated Absences* (paragraph 7.03), GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting* (chapter 1, footnote 1), GASB Statement No. 23, *Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Activities* (paragraph 7.18), GASB Statement No. 28, *Accounting and Financial Reporting for Securities Lending Transactions* (paragraph 4.12), GASB Statement No. 29, *The Use of Not-for-Profit Accounting and Financial Reporting Principles by Governmental Entities* (chapter 1, footnote 1), GASB Statement No. 30, *Risk Financing Omnibus* (paragraph 8.02), GASB Interpretation No. 3, *Financial Reporting for Reverse Repurchase Agreements* (paragraph 4.12), GASB Interpretation No. 4, *Accounting and Financial Reporting for Capitalization Contributions to Public Entity Risk Pools* (paragraph 8.02), and GASB Technical Bulletin 94-1, *Application of Statement No. 115 to Debt Securities Restructured in a Troubled Debt Restructuring* (paragraph 4.15).

This appendix contains illustrative financial statements for the following types of health care organizations:

1. Not-for-profit hospital
2. Governmental hospital authority
3. Nursing home
4. Continuing care retirement community (CCRC)
5. Home health agency
6. Health maintenance organization (HMO)
7. Ambulatory care organization

Cash and cash equivalents, end of year	<u>\$ 4,758</u>	<u>\$ 5,877</u>

Supplemental Disclosures of Cash Flow Information:

The Hospital entered into capital lease obligations in the amount of \$600,000 for new equipment in 19X7.

Cash paid for interest (net of amount capitalized) in 19X7 and 19X6 was \$1,780,000 and \$1,856,000, respectively.

See accompanying notes to financial statements.

Sample Not-for-Profit Hospital
Notes to Financial Statements
December 31, 19X7 and 19X6

1. Description of Organization and Summary of Significant Accounting Policies

Organization. The Sample Not-for-Profit Hospital (the Hospital), located in Tulsa, Oklahoma, is a not-for-profit acute care hospital. The Hospital provides inpatient, outpatient and emergency care services for residents of northeastern Oklahoma. Admitting physicians are primarily practitioners in the local area. The Hospital was incorporated in Oklahoma in 19X1 and is affiliated with the Sample Health System.

Use of estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents. Cash and cash equivalents include certain investments in highly liquid debt instruments with original maturities of three months or less.

The Hospital routinely invests its surplus operating funds in money market mutual funds. These funds generally invest in highly liquid U.S. government and agency obligations.

Investments. Investments in equity securities with readily determinable fair values and all investments in debt securities are measured at fair value in the balance sheet. Investment income or loss (including realized gains and losses on investments, interest and dividends) is included in the excess of revenues over expenses unless the income or loss is restricted by donor or law. Unrealized gains and losses on investments are excluded from the excess of revenues over expenses unless the investments are trading securities.

Assets limited as to use. Assets limited as to use primarily include assets held by trustees under indenture agreements and designated assets set aside by the Board of Trustees for future capital improvements, over which the Board retains control and may at its discretion subsequently use for other purposes. Amounts required to meet current liabilities of the Hospital have been reclassified in the balance sheet at December 31, 19X7 and 19X6.

Property and equipment. Property and equipment acquisitions are recorded at cost. Depreciation is provided over the estimated useful life of each class of depreciable asset and is computed using the straight-line method. Equipment under capital lease obligations is amortized on the straight-line method over the shorter period of the lease term or the estimated useful life of the equipment. Such amortization is included in depreciation and amortization in the financial statements. Interest cost incurred on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets.

Gifts of long-lived assets such as land, buildings, or equipment are reported as unrestricted support, and are excluded from the excess of revenues over expenses, unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used

to acquire long-lived assets are reported as restricted support. Absent explicit donor stipulations about how long those long-lived assets must be maintained, expirations of donor restrictions are reported when the donated or acquired long-lived assets are placed in service.

Temporarily and permanently restricted net assets. Temporarily restricted net assets are those whose use by the Hospital has been limited by donors to a specific time period or purpose. Permanently restricted net assets have been restricted by donors to be maintained by the Hospital in perpetuity.

Excess of revenues over expenses. The statement of operations includes excess of revenues over expenses. Changes in unrestricted net assets which are excluded from excess of revenues over expenses, consistent with industry practice, include unrealized gains and losses on investments other than trading securities, permanent transfers of assets to and from affiliates for other than goods and services, and contributions of long-lived assets (including assets acquired using contributions which by donor restriction were to be used for the purposes of acquiring such assets).

Net patient service revenue. The Hospital has agreements with third-party payors that provide for payments to the Hospital at amounts different from its established rates. Payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges, and per diem payments. Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

Premium revenue. The Hospital has agreements with various Health Maintenance Organizations (HMOs) to provide medical services to subscribing participants. Under these agreements, the Hospital receives monthly capitation payments based on the number of each HMO's participants, regardless of services actually performed by the Hospital. In addition, the HMOs make fee-for-service payments to the Hospital for certain covered services based upon discounted fee schedules.

Charity care. The Hospital provides care to patients who meet certain criteria under its charity care policy without charge or at amounts less than its established rates. Because the Hospital does not pursue collection of amounts determined to qualify as charity care, they are not reported as revenue.

Donor-restricted gifts. Unconditional promises to give cash and other assets to the Hospital are reported at fair value at the date the promise is received. Conditional promises to give and indications of intentions to give are reported at fair value at the date the gift is received. The gifts are reported as either temporarily or permanently restricted support if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified as unrestricted net assets and reported in the statement of operations as net assets released from restrictions. Donor-restricted contributions whose restrictions are met within the same year as received are reported as unrestricted contributions in the accompanying financial statements.

Estimated malpractice costs. The provision for estimated medical malpractice claims includes estimates of the ultimate costs for both reported claims and claims incurred but not reported.

Income taxes. The Hospital is a not-for-profit corporation and has been recognized as tax-exempt pursuant to Sec. 501(c)(3) of the Internal Revenue Code.

2. Net Patient Service Revenue

The Hospital has agreements with third-party payors that provide for payments to the Hospital at amounts different from its established rates. A summary of the payment arrangements with major third-party payors follows:

- *Medicare.* Inpatient acute care services rendered to Medicare program beneficiaries are paid at prospectively determined rates per discharge. These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors. Inpatient nonacute services, certain outpatient services, and defined capital and medical education costs related to Medicare beneficiaries are paid based on a cost reimbursement methodology. The Hospital is reimbursed for cost reimbursable items at a tentative rate with final settlement determined after submission of annual cost reports by the Hospital and audits thereof by the Medicare fiscal intermediary. Beginning in 19X3, the Hospital claimed Medicare payments based on an interpretation of certain "disproportionate share" rules. The intermediary disagreed and declined to pay the excess reimbursement claimed under that interpretation. Through 1996, the Hospital has not included the claimed excess in net patient revenues pending resolution of the matter. In 19X7, the intermediary accepted the claims and paid the outstanding claims, including \$950,000 applicable to 19X6 and \$300,000 applicable to 19X5 and prior, which has been included in 19X7 net revenues.
- *Medicaid.* Inpatient and outpatient services rendered to Medicaid program beneficiaries are reimbursed under a cost reimbursement methodology. The Hospital is reimbursed at a tentative rate with final settlement determined after submission of annual cost reports by the Hospital and audits thereof by the Medicaid fiscal intermediary.

The Hospital also has entered into payment agreements with certain commercial insurance carriers, health maintenance organizations, and preferred provider organizations. The basis for payment to the Hospital under these agreements includes prospectively determined rates per discharge, discounts from established charges, and prospectively determined daily rates.

3. Investments

Assets Limited as to Use

The composition of assets limited as to use at December 31, 19X7 and 19X6, is set forth in the following table. Investments are stated at fair value.

	<u>19X7</u>	<u>19X6</u>
Internally designated for capital acquisition:		
Cash	\$ 545,000	\$ 350,000
U.S. Treasury obligations	11,435,000	12,115,000
Interest receivable	20,000	35,000
	<u>12,000,000</u>	<u>12,500,000</u>
Held by trustee under indenture agreement:		
Cash and short-term investments	352,000	260,000
U.S. Treasury obligation	6,505,000	7,007,000
Interest receivable	92,000	74,000
	<u>6,949,000</u>	<u>7,341,000</u>
	<u>\$18,949,000</u>	<u>\$19,841,000</u>

Other Investments

Other investments, stated at fair value, at December 31, 19X7 and 19X6, include:

	<u>19X7</u>	<u>19X6</u>
Trading:		
U.S. Corporate Bonds	\$ 1,260,000	\$ 1,475,000
Other:		
U.S. Treasury obligations	\$19,266,000	\$14,233,000
Interest receivable	<u>310,000</u>	<u>232,000</u>
	20,836,000	15,940,000
Less:		
Long-term investments	4,680,000	4,680,000
Long-term investments restricted for capital acquisitions	<u>320,000</u>	<u>520,000</u>
Short-term investments	<u>\$15,836,000</u>	<u>\$10,740,000</u>

Investment income and gains for assets limited as to use, cash equivalents, and other investments are comprised of the following for the years ending December 31, 19X7 and 19X6:

	<u>19X7</u>	<u>19X6</u>
Income:		
Interest income	\$3,585,000	\$2,725,000
Realized gains on sales of securities	150,000	200,000
Unrealized gains on trading securities	<u>165,000</u>	<u>100,000</u>
	<u>\$3,900,000</u>	<u>\$3,025,000</u>
Other Changes in Unrestricted Net Assets:		
Unrealized gains on other than trading securities	<u>\$ 300,000</u>	<u>\$ 375,000</u>

4. Property and Equipment

A summary of property and equipment at December 31, 19X7 and 19X6, follows:

	<u>19X7</u>	<u>19X6</u>
Land	\$ 3,000,000	\$ 3,000,000
Land improvements	472,000	472,000
Buildings and improvements	46,852,000	46,636,000
Equipment	29,190,000	26,260,000
Equipment under capital lease obligations	<u>2,851,000</u>	<u>2,752,000</u>
	82,365,000	79,120,000
Less accumulated depreciation and amortization	<u>34,928,000</u>	<u>30,661,000</u>
	47,437,000	48,459,000
Construction in progress	<u>3,601,000</u>	<u>2,033,000</u>
Property and equipment, net	<u>\$51,038,000</u>	<u>\$50,492,000</u>

Depreciation expense for the years ended December 31, 19X7 and 19X6 amounted to approximately \$4,782,000 and \$4,280,000. Accumulated amortization for equipment under capital lease obligations was \$689,000 and \$453,000

at December 31, 19X7 and 19X6, respectively. Construction contracts of approximately \$7,885,000 exist for the remodeling of Hospital facilities. At December 31, 19X7, the remaining commitment on these contracts approximated \$4,625,000.

5. Long-Term Debt

A summary of long-term debt and capital lease obligations at December 31, 19X7 and 19X6, follows:

	<u>19X7</u>	<u>19X6</u>
7.25 percent 19X7 Tax-Exempt Revenue Bonds, principal maturing in varying annual amounts, due November 1, 20XX, collateralized by a pledge of the Hospital's gross receipts	\$21,479,000	
8.50 percent 19X2 Tax-Exempt Revenue Bonds, principal maturing in varying annual amounts, due June 1, 19XX		\$22,016,000
7.75 percent mortgage loan, principal maturing in varying annual amounts, due January 20XX, collateralized by a mortgage on certain property and equipment	2,010,000	2,127,000
7.75 percent note payable, payable in monthly installments of \$12,000, including interest, due March 19XX, unsecured	125,000	671,000
Capital lease obligations, at varying rates of imputed interest from 6.8 percent to 9.3 percent collateralized by leased equipment	<u>1,000,000</u>	<u>950,000</u>
	24,614,000	25,764,000
Less current portion	<u>1,470,000</u>	<u>1,750,000</u>
	<u>\$23,144,000</u>	<u>\$24,014,000</u>

Under the terms of the 19X7 and 19X2 revenue bond indentures, the Hospital is required to maintain certain deposits with a trustee. Such deposits are included with assets limited as to use. The revenue note indenture also places limits on the incurrence of additional borrowings and requires that the Hospital satisfy certain measures of financial performance as long as the notes are outstanding.

Scheduled principal repayments on long-term debt and payments on capital lease obligations are as follows:

<u>Year Ending December 31,</u>	<u>Long-Term Debt</u>	<u>Capital Leases Obligations</u>
19X8	\$ 970,000	\$ 550,000
19X9	912,000	260,000
20Y0	983,000	260,000
20Y1	1,060,000	45,000
20Y2	1,143,000	—
Thereafter	<u>18,546,000</u>	<u>—</u>
	<u>\$23,614,000</u>	1,115,000
Less amount representing interest under capital leases obligations		<u>115,000</u>
		<u>\$1,000,000</u>

A summary of interest cost and investment income on borrowed funds held by the trustee under the 19X7 and 19X2 revenue bond indentures during the years ended December 31, 19X7 and 19X6, follows:

	<u>19X7</u>	<u>19X6</u>
Interest cost:		
Capitalized	\$ 740,000	\$ 700,000
Charged to operations	<u>1,752,000</u>	<u>1,825,000</u>
Total	<u>\$2,492,000</u>	<u>\$2,525,000</u>
Investment income:		
Capitalized	\$ 505,000	\$ 663,000
Credited to other revenue	<u>330,000</u>	<u>386,000</u>
Total	<u>\$ 835,000</u>	<u>\$1,049,000</u>

6. Temporarily and Permanently Restricted Net Assets

Temporarily restricted net assets are available for the following purposes or periods at December 31, 19X7 and 19X6:

	<u>19X7</u>	<u>19X6</u>
Health care services		
Purchase of equipment	\$ 320,000	\$ 520,000
Indigent care	840,000	950,000
Health education	350,000	400,000
For periods after December 31, 19X9	<u>605,000</u>	<u>600,000</u>
	<u>\$2,115,000</u>	<u>\$2,470,000</u>

Permanently restricted net assets at December 31, 19X7 and 19X6, are restricted to:

	<u>19X7</u>	<u>19X6</u>
Investments to be held in perpetuity, the income from which is expendable to support health care services (reported as operating income)	\$2,973,000	\$2,923,000
Endowment requiring income to be added to original gift until fund value is \$1,500,000	<u>615,000</u>	<u>610,000</u>
	<u>\$3,588,000</u>	<u>\$3,533,000</u>

During 19X7, net assets were released from donor restrictions by incurring expenses satisfying the restricted purposes of indigent care and health care education in the amounts of \$250,000 and \$50,000, respectively.

7. Medical Malpractice Claims

The Hospital purchases professional and general liability insurance to cover medical malpractice claims. There are known claims and incidents that may result in the assertion of additional claims, as well as claims from unknown incidents that may be asserted arising from services provided to patients. The Hospital has employed independent actuaries to estimate the ultimate costs, if any, of the settlement of such claims. Accrued malpractice losses have been discounted at 7 percent and in management's opinion provide an adequate reserve for loss contingencies.

On March 15, 19X7, a patient filed a suit against the Hospital for malpractice during care received as an inpatient. The Hospital believes it has meritorious defenses against the suit; however, the ultimate resolution of the matter could result in a loss. The patient has claimed \$16 million in actual damages. Under state law, punitive damages are determined at trial. The Hospital maintains insurance coverage for malpractice claims. The coverage does not include punitive damages awards. Trial is scheduled to occur within the next year.

8. Pension Plan

The Hospital has a defined benefit pension plan covering substantially all of its employees. The plan benefits are based on years of service and the employees' compensation during the last five years of covered employment. Contributions are intended to provide not only for benefits attributed to service to date but also for those expected to be earned in the future.

The actuarially computed net periodic pension cost for 19X7 and 19X6 included the following components:

	<u>19X7</u>	<u>19X6</u>
Service cost—benefits earned during the period	\$ 905,000	\$ 770,000
Interest cost on projected benefit obligation	700,000	650,000
Actual return on plan assets	(950,000)	(800,000)
Net amortization and deferral	<u>70,000</u>	<u>80,000</u>
Net periodic pension cost	<u>\$ 725,000</u>	<u>\$ 700,000</u>

Assumptions used in the accounting for net periodic pension cost were as follows:

	<u>At December 31,</u>	
	<u>19X7</u>	<u>19X6</u>
Discount rates	7.0%	7.0%
Rates of increase in compensation levels	6.0	6.0
Expected long-term rate of return on assets	8.0	8.0

The following table sets forth the plan's funded status and amounts recognized in the Hospital's financial statements at December 31, 19X7 and 19X6:

	<u>19X7</u>	<u>19X6</u>
Actuarial present value of benefit obligations:		
Vested benefit obligation	\$ 8,020,000	\$ 6,800,000
Nonvested benefit obligation	<u>1,900,000</u>	<u>1,930,000</u>
Accumulated benefit obligation	9,920,000	8,730,000
Effect of projected future compensation levels	<u>1,000,000</u>	<u>980,000</u>
Projected benefit obligation	10,920,000	9,710,000
Plan assets at fair value (primarily listed stocks and U.S. bonds)	<u>11,050,000</u>	<u>9,800,000</u>
Plan assets in excess of projected benefit obligation	130,000	90,000
Unrecognized net gain from past experience different from that assumed	(30,000)	(40,000)
Prior service cost not yet recognized in net periodic pension cost	50,000	55,000
Unrecognized net asset being recognized over 15 years	<u>(15,000)</u>	<u>(20,000)</u>
Prepaid pension cost, included in other assets in the accompanying balance sheets	<u>\$ 135,000</u>	<u>\$ 85,000</u>

9. Postretirement Plans

The Hospital sponsors two defined benefit postretirement plans that cover both salaried and nonsalaried employees. One plan provides medical and dental benefits, and the other provides for the payment of life insurance premiums. The postretirement health care plan is contributory, with retiree contributions adjusted annually; the life insurance plan is noncontributory. The accounting for the health care plan anticipates future cost-sharing changes to the written plan that are consistent with the Hospital's expressed intent to increase retiree contributions each year to 50 percent of the excess of the expected general inflation rate over 6 percent. On July 24, 19X6, the Hospital amended its postretirement health care plan to provide vision coverage. Beginning in 19X7, the Hospital adopted a funding policy for its postretirement health care plan similar to its funding policy for its life insurance plan—an amount equal to a level percentage of the employees' salaries is contributed to the plan annually. For 19X7, that percentage was 4.25, and the aggregate contribution for both plans was \$34,000.

The following table sets forth the plans' combined funded status reconciled with the amount shown in the Hospital's balance sheet at December 31, 19X7 and 19X6:

	<u>19X7</u>	<u>19X6</u>
Accumulated postretirement benefit obligation:		
Retirees	\$(195,000)	\$(187,000)
Fully eligible active plan participants	(105,000)	(100,000)
Other active plan participants	<u>(310,000)</u>	<u>(297,400)</u>
	(610,000)	(584,400)
Plan assets at fair value (primarily listed stocks and U.S. bonds)	<u>100,000</u>	<u>87,960</u>
Accumulated postretirement benefit obligation in excess of plan assets	(510,000)	(496,440)
Unrecognized net gain from past experience different from that assumed and from changes in assumptions	(30,000)	(40,000)
Prior service cost not yet recognized in net periodic postretirement benefit cost	16,000	19,000
Unrecognized transition obligation	<u>445,500</u>	<u>470,250</u>
Accrued postretirement benefit cost, included in other current liabilities in the accompanying balance sheets	<u>\$ (78,500)</u>	<u>\$ (47,190)</u>

Net periodic postretirement benefit cost for 19X7 and 19X6 include the following components:

	<u>19X7</u>	<u>19X6</u>
Service cost—benefits attributed to service during the period	\$14,500	\$15,000
Interest cost on accumulated postretirement benefit obligation	50,000	44,400
Actual return on plan assets	(4,500)	(3,960)
Amortization of transition obligation over 20 years	24,750	24,750
Net amortization and deferral	<u>1,000</u>	<u>1,000</u>
Net periodic postretirement benefit cost	<u>\$85,750</u>	<u>\$81,190</u>

For measurement purposes, a 7 percent annual rate of increase in the per capita cost of covered health care benefits was assumed for 19X8; the rate was assumed to decrease gradually to 5 percent over the next five years and remain at that level thereafter. The health care cost trend rate assumption has the assumed health care cost trend rates increasing by one percentage point in each year. This would increase the accumulated postretirement benefit obligation as of December 31, 19X7, by \$73,000 and the aggregate of the service and interest cost components of net periodic postretirement benefit cost for the year then ended by \$13,000.

The weighted-average discount rate used in determining the accumulated postretirement benefit obligation was 7 percent. The expected long-term rate of return on plan assets after estimated taxes was 6.6 percent. The rate of increase in compensation used for the life insurance plan was 4 percent.

10. Concentrations of Credit Risk

The Hospital grants credit without collateral to its patients, most of whom are local residents and are insured under third-party payor agreements. The mix of receivables from patients and third-party payors at December 31, 19X7 and 19X6, was as follows:

	<u>19X7</u>	<u>19X6</u>
Medicare	51%	53%
Medicaid	17	14
Blue Cross	18	17
Other third-party payors	7	9
Patients	<u>7</u>	<u>7</u>
	<u>100%</u>	<u>100%</u>

11. Commitments and Contingencies

Operating leases. The Hospital leases various equipment and facilities under operating leases expiring at various dates through April 20X2. Total rental expense in 19X7 and 19X6 for all operating leases was approximately \$859,000 and \$770,000, respectively.

The following is a schedule by year of future minimum lease payments under operating leases as of December 31, 19X7, that have initial or remaining lease terms in excess of one year.

<u>Year Ending December 31,</u>	<u>Amount</u>
19X8	\$517,000
19X9	506,000
20Y0	459,000
20Y1	375,000
20Y2	343,000

Litigation. The Hospital is involved in litigation and regulatory investigations arising in the course of business. After consultation with legal counsel, management estimates that these matters will be resolved without material adverse effect on the Hospital's future financial position or results from operations.

Allowance for doubtful accounts. Beginning in 19X5, the Hospital has provided care under an agreement with Associated HMO. The HMO currently owes the Hospital \$950,000, substantially all of which is overdue. The Hospital has notified the HMO that further services under the contract cannot be provided without payment on the outstanding balance. The HMO has assured the Hospital that additional funds are being obtained in order to pay the overdue balance and continue service under the agreement, however, if the HMO is unable to make payments, additional allowances for bad debts would need to be accrued.

12. Extraordinary Loss

In 19X7, the Hospital advance refunded its 19X2 Revenue Bonds in the amount of \$22 million by issuing 19X7 Revenue Bonds. As a result of this in-substance defeasance transaction, an extraordinary loss totaling \$500,000 was recorded. As of December 31, 19X7, \$21 million of advance refunded bonds, which are considered extinguished, remain outstanding.

13. Related Party Transactions

During the years ended December 31, 19X7 and 19X6, the Hospital contributed capital to Sample Health System, an affiliate with some board members in common with the Hospital, in the amounts of \$640,000 and \$3 million, respectively.

The Sample Hospital Foundation (the Foundation), which is controlled by Sample Health System, was established to solicit contributions from the general public and to support the Hospital. Funds are distributed to the Hospital as determined by the Foundation's Board of Directors. A summary of the foundation's assets, liabilities, net assets, results of operations, and changes in net assets follows.

	<i>At December 31,</i>	
	<i>19X7</i>	<i>19X6</i>
Assets, principally cash and cash equivalents	<u>\$521,000</u>	<u>\$472,000</u>
Liabilities	<u>11,000</u>	<u>10,000</u>
Net assets	<u>510,000</u>	<u>462,000</u>
Total liabilities and net assets	<u>\$521,000</u>	<u>\$472,000</u>
Support and revenue	<u>\$269,000</u>	<u>\$535,000</u>
Expenses		
Distributions to Sample Hospital for property acquisitions	235,000	485,000
Other	<u>13,000</u>	<u>16,000</u>
Total expenses	<u>248,000</u>	<u>501,000</u>
Excess of support and revenue over expenses	21,000	34,000
Other changes in net assets	27,000	17,000
Net assets, beginning of year	<u>462,000</u>	<u>411,000</u>
Net assets, end of year	<u>\$510,000</u>	<u>\$462,000</u>

Liabilities include \$10,000 payable at the end of each year to Sample Hospital. These amounts were paid after the end of each year.

14. Functional Expenses

The Hospital provides general health care services to residents within its geographic location. Expenses related to providing these services are as follows (in thousands):

	<i>At December 31,</i>	
	<i>19X7</i>	<i>19X6</i>
Health care services	\$86,000	\$78,647
General and administrative	<u>12,055</u>	<u>10,643</u>
	<u>\$98,055</u>	<u>\$89,290</u>

15. Fair Value of Financial Instruments

The following methods and assumptions were used by the Hospital in estimating the fair value of its financial instruments:

Cash and cash equivalents: The carrying amount reported in the balance sheet for cash and cash equivalents approximates its fair value.

Investments: Fair values, which are the amounts reported in the balance sheet, are based on quoted market prices, if available, or estimated using quoted market prices for similar securities.

Assets limited as to use: These assets consist primarily of cash and short-term investments and interest receivable. The carrying amount reported in the balance sheet is fair value.

Accounts payable and accrued expenses: The carrying amount reported in the balance sheet for accounts payable and accrued expenses approximates its fair value.

Estimated third-party payor settlements: The carrying amount reported in the balance sheet for estimated third-party payor settlements approximates its fair value.

Long-term debt: Fair values of the Hospital's revenue notes are based on current traded value. The fair value of the Hospital's remaining long-term debt is estimated using discounted cash flow analyses, based on the Hospital's current incremental borrowing rates for similar types of borrowing arrangements.

The carrying amounts and fair values of the Hospital's financial instruments at December 31, 19X7 and 19X6, are as follows (In thousands):

	19X7		19X6	
	<u>Carrying Amount</u>	<u>Fair Value</u>	<u>Carrying Amount</u>	<u>Fair Value</u>
Cash and cash equivalents	\$ 4,758	\$ 4,758	\$ 5,877	\$ 5,877
Short-term investments	15,836	15,836	10,740	10,740
Assets limited as to use	18,949	18,949	19,841	19,841
Long-term investments	4,680	4,680	4,680	4,680
Long-term investments restricted for capital acquisition	320	320	520	520
Accounts payable and accrued expenses	5,818	5,818	5,382	5,382
Estimated third-party payor settlements	2,143	2,143	1,942	1,942
Long-term debt	24,614	23,980	25,764	24,918

16. Promises to Contribute

At December 31, 19X7, the Hospital had received \$1,500,000 of conditional promises to contribute to the building of a new facility for outpatient services. These contributions will be recorded as temporarily restricted support when received. The Hospital had no material outstanding unconditional promises of support at December 31, 19X7.

17. Charity Care

The amount of charges foregone for services and supplies furnished under the Hospital's charity care policy aggregated approximately \$4,500,000 and \$4,100,000 in 19X7 and 19X6, respectively.

18. Subsequent Event

On February 9, 19X8, the Hospital signed a contract in the amount of \$1,050,000 for the purchase of certain real estate.

Supplemental Disclosures of Cash Flow Information:

The Authority entered into capital lease obligations of \$510,000 for new equipment in 19X7.

See accompanying notes to financial statements.

Sample Governmental Hospital Authority
Notes to Financial Statements
December 31, 19X7 and 19X6

1. Description of Reporting Entity and Summary of Significant Accounting Policies

Reporting entity. The Sample Hospital Authority (the Authority) is a public corporation. It was created on January 1, 19XX, by the Board of County Commissioners of Feeling County, Illinois, to operate, control, and manage all matters concerning the county's health care functions. The Board of County Commissioners appoints the Board of Trustee members of the Authority, and the Authority may not issue debt without the county's approval. For this reason, the Authority is considered to be a component unit of Feeling County, Illinois, and is included as a discretely presented component unit in the general purpose financial statements of the county.

Use of estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Proprietary fund accounting. The Authority utilizes the proprietary fund method of accounting whereby revenue and expenses are recognized on the accrual basis. Substantially all revenues and expenses are subject to accrual.

Costs of borrowing. Interest cost incurred on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets.

Cash and cash equivalents. Cash and cash equivalents include investments in highly liquid debt instruments with an original maturity of three months or less.

Ad valorem taxes. The Authority received approximately 29 percent in 19X7 and 19 percent in 19X6 of its financial support from ad valorem taxes. These funds were used as follows:

	<u>19X7</u>	<u>19X6</u>
Percentage used to support operations	26%	16%
Percentage used for debt service on general obligation bonds	3%	3%

Current taxes are received beginning in October of each year and become delinquent after January 31 of the following year.

Accounting standards. Pursuant to Governmental Accounting Standards Board (GASB) Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*, the Authority has elected to apply the provisions of all relevant pronouncements of the Financial Accounting Standards Board (FASB), including those issued after November 30, 1989.

* Includes only disclosures unique to a governmental hospital.

Risk management. The Authority is exposed to various risks of loss from torts; theft of, damage to, and destruction of assets; business interruption; errors and omissions; employee injuries and illnesses; natural disasters; and employee health, dental, and accident benefits. Commercial insurance coverage is purchased for claims arising from such matters. Settled claims have not exceeded this commercial coverage in any of the three preceding years. The Authority is self-insured for medical malpractice claims and judgments, as discussed in Note 14.

Investments in debt and equity securities. Trading securities, if any, which include any security held primarily for near-term sale, are carried at fair value. Gains and losses on trading securities, both realized and unrealized, are included in nonoperating income.

Available-for-sale securities, which include any security for which the Authority has no immediate plan to sell but which may be sold in the future, are carried at fair value. Realized gains and losses, based on the specific identification method, are included in nonoperating income. Unrealized gains and losses are recorded in fund balance. Premiums and discounts are amortized and accreted, respectively, to interest income using the interest method over the period to maturity.

Held-to-maturity securities, which include any debt security for which the Authority has the positive intent and ability to hold until maturity, are carried at historical cost adjusted for amortization of premiums and accretion of discounts. Premiums and discounts are amortized and accreted, respectively, to interest income using the interest method over the period to maturity.

Interest and dividends on investments in debt and equity securities are included in nonoperating income when earned.

2. Restricted Fund Balance

Temporarily restricted fund balance is available for the following purposes:

	<u>19X7</u>	<u>19X6</u>
Program A activities:		
Purchase of equipment	\$ 404	\$ 321
Research	553	683
General	46	63
Program B activities:		
Purchase of equipment	235	235
General	79	110
Program C activities:		
General	206	400
Buildings and equipment	94	72
Annuity trust agreements	44	65
For periods after December 31, 19X7 and 19X6	<u>184</u>	<u>151</u>
Total temporarily restricted fund balance	<u>\$1,845</u>	<u>\$2,100</u>

Permanently restricted fund balance as of December 31, 19X7 and 19X6, is restricted to investment in perpetuity, the income from which is expendable to support:

	<u>19X7</u>	<u>19X6</u>
Program A activities	\$ 158	\$ 158
Program B activities	176	176
Program C activities	423	423
Any activities of the Authority	<u>854</u>	<u>854</u>
	1,611	1,611
Endowment requiring income to be added to original gift until fund's value is \$2,125	<u>1,392</u>	<u>1,392</u>
Total permanently restricted fund balance	<u>3,003</u>	<u>3,003</u>
Total temporarily and permanently restricted fund balance	<u>\$4,848</u>	<u>\$5,103</u>

3. Donor Restrictions Released

Fund balance was released from donor restrictions by incurring expenses satisfying the restricted purposes or by occurrence of other events specified by donors:

	<u>19X7</u>
Purpose restrictions accomplished:	
Program A expenses	\$168
Program B expenses	31
Program C expenses	<u>206</u>
	405
Time restrictions expired:	
Passage of specified time	<u>20</u>
Total restrictions released	<u>\$425</u>

4. Charity Care

Charges excluded from revenue under the Authority's charity care policy were \$5,100 and \$4,845 for 19X7 and 19X6, respectively.

5. Assets Limited as to Use

Assets limited as to use that are required for obligations classified as current liabilities are reported in current assets. The composition of assets limited as to use at December 31, 19X7 and 19X6, is set forth in the following table.

	<u>19X7</u>	<u>19X6</u>
Internally designated for capital acquisitions:		
Short-term investments	\$ 1,125	\$ 1,205
U.S. Treasury obligations	15,530	14,190
U.S. Government Agency securities	4,200	5,100
Interest receivable	<u>145</u>	<u>105</u>
	<u>\$21,000</u>	<u>\$20,600</u>
Held by trustees:		
Under malpractice funding arrangement—		
Cash	\$ 474	\$ 473
U.S. Treasury obligations	<u>771</u>	<u>450</u>
	<u>\$ 1,245</u>	<u>\$ 923</u>
Under indenture agreement:		
Cash	\$ 503	\$ 1,071
U.S. Government Agency securities	1,000	500
U.S. Treasury obligations	1,047	546
Interest receivable	<u>63</u>	<u>63</u>
	<u>\$ 2,613</u>	<u>\$ 2,180</u>
	<u>\$ 3,858</u>	<u>\$ 3,103</u>

6. Bank Deposits

At December 31, 19X7 and 19X6, the Authority had bank balances as follows:

	<u>19X7</u>	<u>19X6</u>
Insured (FDIC) or collateralized with securities held by the Authority	\$3,687	\$5,677
Collateralized by securities held by the pledging financial institution's trust department in the Authority's name	600	300
Uncollateralized	<u>553</u>	
Total	<u>\$4,840</u>	<u>\$5,977</u>
Carrying Value	<u>\$5,021</u>	<u>\$6,539</u>

The Authority's bylaws require that investments be made only in U.S. government obligations and that all bank balances be insured or collateralized by U.S. government securities held by the Authority's third-party agent or the pledging financial institution's trust department in the name of the Authority.

7. Long-Term Debt

A summary of long-term debt, including capital lease obligations, at December 31, 19X7 and 19X6, follows:

	<u>19X7</u>	<u>19X6</u>
7.25 percent Revenue Notes, due November 1, 20XX, collateralized by a pledge of the Authority's gross receipts	\$18,257	\$18,714
9.25 percent mortgage loan, due January 20XX, collateralized by a mortgage on property and equipment with a depreciated cost of \$1,530 at December 31, 19X7	1,709	1,808
9.75 percent note payable, due March 19XX, unsecured	<u>106</u>	<u>570</u>
Total long-term debt	20,072	21,092
Less current maturities of long-term debt	<u>825</u>	<u>1,020</u>
Long-term debt net of current maturities	<u>\$19,247</u>	<u>\$20,072</u>
Capital lease obligations, at varying rates of imputed interest from 9.8 percent to 12.3 percent collateralized by leased equipment with cost of \$1,275 at December 31, 19X7	\$ 850	\$ 808
Less current portion of capital lease obligations	<u>425</u>	<u>468</u>
Capital lease obligations, excluding current portion	<u>\$ 425</u>	<u>\$ 340</u>

Under the terms of the Revenue Note Indenture, the Authority is required to maintain certain deposits with a trustee. Such deposits are included with assets limited as to use in the financial statements. The Revenue Note Indenture also places limits on the incurrence of additional borrowings and requires that the Authority satisfy certain measures of financial performance as long as the notes are outstanding.

Scheduled principal repayments on long-term debt and payments on capital lease obligations for the next five years are as follows:

<u>Year Ending December 31,</u>	<u>Long-Term Debt</u>	<u>Capital Lease Obligations</u>
19X8	\$ 825	\$506
19X9	775	221
20Y0	836	221
20Y1	900	—
20Y2	972	—
Thereafter	15,764	—
	<u>\$20,072</u>	948
Less amount representing interest on capital lease obligations		<u>98</u>
Total		<u>\$850</u>

A summary of interest cost and investment income on borrowed funds held by the trustee under the Revenue Note Indenture during the years ended 19X7 and 19X6 follows:

	<u>19X7</u>	<u>19X6</u>
Interest cost:		
Capitalized	\$ 629	\$ 628
Charged to operations	<u>1,489</u>	<u>1,552</u>
Total	<u>\$2,118</u>	<u>\$2,180</u>
Investment income:		
Capitalized	\$ 429	\$ 564
Credited to other revenue	<u>280</u>	<u>328</u>
Total	<u>\$ 709</u>	<u>\$ 892</u>

8. Pension Plan

Plan description. Sample Hospital Pension Plan (SHPP) provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. SHPP is affiliated with County Employees Pension Plan (CEPP), an agent multiple-employer pension plan administered by the Illinois Retirement System. Article 39 of the Regulations of the State of Illinois assigns the authority to establish and amend the benefit provisions of the plans that participate in CEPP to the respective employer entities; for CEPP, that authority rests with the County of Feeling, Illinois. The Illinois Retirement System issues a publicly available financial report that includes financial statements and required supplementary information for SHPP. That report may be obtained by writing to Illinois Retirement System, State Government Lane, Anytown, USA 01000 or by calling 1-800-555-PLAN.

Funding policy. The contribution requirements of plan members and the Authority are established and may be amended by the CEPP Board of Trustees. Plan members are required to contribute 7.8 percent of their annual covered salary. The Authority is required to contribute at an actuarially determined rate; the current rate is 11.9 percent of annual covered payroll.

Annual pension cost and net pension obligation. The Authority's annual pension cost and net pension obligation to SHPP for the current year were as follows:

	<u>19X7</u>
Annual required contribution	\$ 26
Interest on net pension obligation	3
Adjustment to annual required contribution	<u>(3)</u>
Annual pension cost	26
Contributions made	<u>(12)</u>
Increase (decrease) in net pension obligation	14
Net pension obligation beginning of year	<u>66</u>
Net pension obligation, end of year	<u>\$ 80</u>

The annual required contribution for the current year was determined as part of the December 31, 19X6, actuarial valuation using the entry age actuarial cost method. The actuarial assumptions included (a) 7.5% investment rate of return (net of administrative expenses) and (b) projected salary increases ranging from 5.5% to 9.5% per year. Both (a) and (b) included an inflation component of 5.5%. The actuarial assumptions also include a 2% per year cost-of-living adjustment. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a four-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The remaining amortization period at December 31, 19X6, was 23 years.

Three-Year Trend Information

<u>Fiscal Year Ending</u>	<u>Annual Pension Cost (APC)</u>	<u>Percentage of APC Contributed</u>	<u>Net Pension Obligation</u>
12/31/X5	\$20	94%	\$49
12/31/X6	23	68	65
12/31/X7	26	46	80

(The preparer of the financial statements should consider the need for required supplementary information (RSI) as required by GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, paragraph 22.)

9. Postretirement Plan

In addition to the pension benefits described above, the Authority provides postretirement health care benefits, in accordance with the Authority's bylaws, to all employees who retire from the Authority on or after attaining age 60 with

at least 15 years of service. Currently 250 retirees meet these eligibility requirements. The Authority reimburses 75 percent of the amount of validated claims for medical, dental, and hospitalization costs incurred by pre-Medicare retirees and their dependents. The Authority also reimburses a fixed amount of \$25 per month for a Medicare supplement for each retiree eligible for Medicare. Expenditures for postretirement health care benefits are recognized as retirees report claims and include a provision for estimated claims incurred but not yet reported to the Authority. During the year, expenditures of \$764 were recognized for postretirement health care. Approximately \$64 of the \$128 increase in expenditures over the previous year was caused by the addition of dental benefits, effective July 1, 19X7.

10. Investments in Debt and Equity Securities

The Authority's investments are held by the Authority or its agent in the Authority's name.

The amortized cost and approximate fair value of available-for-sale securities are as follows:

	<i>December 31, 19X7</i>			
	<i>Amortized Cost</i>	<i>Gross Unrealized Gains</i>	<i>Gross Unrealized (Losses)</i>	<i>Approximate Fair Value</i>
U.S. Treasury	\$13,534	\$	\$(43)	\$13,491
U.S. Government agencies	2,074	126		2,200
Other	1,125			1,125
	<u>\$16,733</u>	<u>\$126</u>	<u>\$(43)</u>	<u>\$16,816</u>

	<i>December 31, 19X6</i>			
	<i>Amortized Cost</i>	<i>Gross Unrealized Gains</i>	<i>Gross Unrealized (Losses)</i>	<i>Approximate Fair Value</i>
U.S. Treasury	\$13,839	\$	\$(100)	\$13,739
U.S. Government agencies	1,903	197		2,100
Other	1,205			1,205
	<u>\$16,947</u>	<u>\$197</u>	<u>\$(100)</u>	<u>\$17,044</u>

	<i>Amortized Cost</i>	<i>Approximate Fair Value</i>
Maturities of available-for-sale debt securities at December 31, 19X7:		
One year or less	\$6,783	\$6,487
After one through five years	1,850	1,860
After five through ten years	863	890
After ten years	7,237	7,579
	<u>\$16,733</u>	<u>\$16,816</u>

The amortized cost and approximate fair value of held-to-maturity securities are as follows:

	<i>December 31, 19X7</i>			
	<i>Amortized Cost</i>	<i>Gross Unrealized Gains</i>	<i>Gross Unrealized (Losses)</i>	<i>Approximate Fair Value</i>
U.S. Treasury	\$5,818	\$10	\$	\$5,828
U.S. Government agencies	<u>3,000</u>	<u>50</u>	<u>(202)</u>	<u>2,848</u>
	<u>\$8,818</u>	<u>\$60</u>	<u>\$(202)</u>	<u>\$8,676</u>

	<i>December 31, 19X6</i>			
	<i>Amortized Cost</i>	<i>Gross Unrealized Gains</i>	<i>Gross Unrealized (Losses)</i>	<i>Approximate Fair Value</i>
U.S. Treasury	\$3,496	\$	\$(16)	\$3,480
U.S. Government agencies	<u>3,500</u>	<u>113</u>	<u>—</u>	<u>3,613</u>
	<u>\$6,996</u>	<u>\$113</u>	<u>\$(16)</u>	<u>\$7,093</u>

	<i>Amortized Cost</i>	<i>Approximate Fair Value</i>
Maturities of held-to-maturity securities at December 31, 19X7:		
One year or less	\$1,598	\$1,634
After one through five years	3,480	3,340
After five through ten years	1,432	1,262
After ten years	<u>2,308</u>	<u>2,440</u>
	<u>\$8,818</u>	<u>\$8,676</u>

Gross gains of \$3,844 and gross losses of \$954 resulting from sales of available-for-sale securities were realized during the year ended December 31, 19X7.

Investments in debt and equity securities are reported on the balance sheet as follows:

	<i>19X7</i>	<i>19X6</i>
Short-term investments available-for-sale	\$ 1,961	\$ 2,049
Assets limited as to use		
Available-for-sale	14,855	14,995
Held-to-maturity	6,000	5,500
Held by Trustees—Held-to-maturity	2,818	1,496

All securities are held in the Authority's name by a custodial bank that is the agent of the Hospital.

Other disclosures that may be required include the following:

- 11. Property, Plant, and Equipment***
- 12. Off-Balance-Sheet Risk and Concentration of Credit Risk***
- 13. Fair Value of Financial Instruments***
- 14. Commitments and Contingencies*,#**
- 15. Operating Leases***
- 16. Subsequent Events***

* The disclosures contained in these notes would be similar to the disclosures contained in the notes to the financial statements for a not-for-profit hospital and, therefore, are not repeated here.

Requirements for disclosures about claims and judgments and risk financing by governmental health care enterprises are provided in GASB Statement No. 10, *Accounting and Financial Reporting for Risk Financing and Related Insurance Issues*, and are not illustrated here.

Sample For-Profit Nursing Home, Inc.
Notes to Financial Statements
December 31, 19X5 and 19X4

1. Description of Organization and Summary of Significant Accounting Policies

Organization. The Sample Nursing Home, Inc. (the Company) was incorporated in New State in 19X1 and operates a 128-bed nursing home in Abacus, New State. A summary of the Company's significant accounting policies follows:

Use of estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents. Cash and cash equivalents include investments in highly liquid debt instruments with an original maturity of three months or less, excluding amounts whose use is limited by note indenture.

Investments. Investments in debt instruments, including assets limited as to use, are classified as held-to-maturity because the Company has the positive intent and ability to hold the securities until maturity. Held-to-maturity securities are carried at cost adjusted for amortization of premiums and accretion of discounts.

Assets limited as to use. Assets deposited with a trustee under terms of the note indenture and assets set aside by the Board of Directors for capital improvements are classified as assets limited as to use. Amounts required to meet current liabilities have been reclassified in the balance sheet.

Property and equipment. Property and equipment are recorded at cost. Depreciation is calculated on the straight-line method over the estimated useful lives of depreciable assets.

Bond issuance costs. Costs incurred in issuing the Series 19X1 bonds are being amortized based on the effective interest method.

Net patient service revenue. Net patient service revenue is reported at the estimated net realizable amounts from residents, third-party payors, and others for service rendered.

Revenue under third-party payor agreements is subject to audit and retroactive adjustment. Provisions for estimated third-party payor settlements are provided in the period the related services are rendered. Differences between the estimated amounts accrued and interim and final settlements are reported in operations in the year of settlement.

Income taxes. The provisions for income taxes are based on amounts estimated to be currently payable and those deferred because of temporary differences between the financial statement and tax bases of assets and liabilities. These differences consist principally of bad debts and depreciation.

2. Assets Limited as to Use

Assets limited as to use include:

Assets held by trustee under the Series 19X1 note indenture agreement at December 31, 19X5 and 19X4.

	<u>19X5</u>	<u>19X4</u>
U.S. Government obligations	\$150,000	\$130,000
Cash	24,000	21,000
Accrued interest income	2,000	2,000
	<u>176,000</u>	<u>153,000</u>
Internally designated by the Board of Directors for capital improvements		
Certificate of deposit	\$ 45,000	\$ 45,000
Accrued interest	2,000	2,000
	<u>47,000</u>	<u>47,000</u>
	<u>\$223,000</u>	<u>\$200,000</u>

3. Investments

The amortized cost and approximate fair value of held-to-maturity securities at December 31, 19X5 and 19X4, are as follows:

	<i>December 31, 19X5</i>			
	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized (Losses)</u>	<u>Approximate Fair Value</u>
U.S. Treasury obligations	\$150,000	\$11,000	\$(16,000)	\$145,000
U.S. Government agency obligations	83,000		(7,000)	76,000
Other debt securities	67,000		(18,000)	49,000
	<u>\$300,000</u>	<u>\$11,000</u>	<u>\$(41,000)</u>	<u>\$270,000</u>

	<i>December 31, 19X4</i>			
	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized (Losses)</u>	<u>Approximate Fair Value</u>
U.S. Treasury obligations	\$103,000	\$	\$(10,000)	\$ 93,000
U.S. Government agency obligations	27,000	2,000		29,000
	<u>\$130,000</u>	<u>\$2,000</u>	<u>\$(10,000)</u>	<u>\$122,000</u>

Maturities of held-to-maturity securities at December 31, 19X5, are as follows:

	<u>Amortized Cost</u>	<u>Approximate Fair Value</u>
One year or less	\$131,000	\$126,000
After one through five years	31,000	29,000
After five through ten years	68,000	62,000
After ten years	70,000	53,000
	<u>\$300,000</u>	<u>\$270,000</u>

4. Long-Term Debt

Long-term debt at December 31, 19X5 and 19X4, was as follows:

	<u>19X5</u>	<u>19X4</u>
9.5 percent bonds payable to the City of Abacus, maturing \$50,000 annually through November 1, 19YY, with a final maturity of \$1 million on November 1, 19YY	\$1,750,000	\$1,800,000
Less current maturities	<u>50,000</u>	<u>50,000</u>
	<u>\$1,700,000</u>	<u>\$1,750,000</u>

The notes are collateralized by a first-mortgage lien on all property and equipment of the Company and a security interest in all of its receipts. The note indenture requires the maintenance of certain deposits with a trustee, which are included in assets limited as to use.

Future maturities of long-term debt as of December 31, 19X5, follow:

<u>Year Ending December 31,</u>	<u>Amount</u>
19X6	\$ 50,000
19X7	50,000
19X8	50,000
19X9	50,000
19Y0	50,000
Thereafter	<u>1,500,000</u>
Total	<u>\$1,750,000</u>

5. Income Taxes

The provisions for income taxes are as follows:

	<u>19X5</u>	<u>19X4</u>
Current:		
Federal	\$72,000	\$15,000
State	<u>2,000</u>	
Total current	<u>74,000</u>	<u>15,000</u>
Deferred:		
Federal	6,000	13,000
State		<u>1,000</u>
Total deferred	<u>6,000</u>	<u>14,000</u>
Total provision for income taxes	<u>\$80,000</u>	<u>\$29,000</u>

Deferred income taxes are provided for the temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities.

For the years ended December 31, 19X5 and 19X4, the effective tax rate approximated the statutory rate of 34 percent and 40 percent, respectively.

The net current and noncurrent components of deferred income taxes recognized in the balance sheet at December 31, 19X5 and 19X4, follows:

	<u>19X5</u>	<u>19X4</u>
Net current assets	\$12,000	\$14,000
Net noncurrent liabilities	<u>6,000</u>	<u>14,000</u>
	<u>\$ 6,000</u>	<u>\$ 0</u>

Management has determined that no valuation allowance related to deferred tax assets is necessary at December 31, 19X5 and 19X4, respectively.

6. Concentration in State Medicaid Program

The Company has 100 of its 128 beds designated for care of patients under the state's Medicaid program. The current funding of that program is 90 days behind filed claims. The current state budget has no provision for reducing that lag and, while the proposed budget for 19X6 includes additional funding, there is no assurance that the final budget will include the needed additional funds.

7. Risks and Uncertainties Disclosures*

8. Pension Plan*

9. Postretirement Benefits*

10. Fair Values of Financial Instruments*

Sample Not-for-Profit Continuing Care Retirement Community
Notes to Financial Statements
December 31, 19X5 and 19X4

1. Description of Organization and Summary of Significant Accounting Policies*

Organization. The Sample Continuing Care Retirement Community (the CCRC) is a nonprofit organization that principally provides housing, health care, and other related services to residents through the operation of a retirement facility containing 249 apartments and a 78-bed health care facility located in Evergreen Park, Illinois. The CCRC was incorporated in Illinois in 19X1. A summary of significant accounting policies follows.

Use of estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Investments. Investments, which consist of U.S. Treasury obligations, are measured at fair value in the balance sheet. Investment income (including realized gains and losses on investments, interest, and dividends) is included in operating income (loss) unless restricted by donor or law. Unrealized gains and losses on investments, if any, are excluded from operating income (loss).

Deferred financing costs. Deferred financing costs are amortized using the effective interest method over the term of the related financing agreement.

Advance fees. Fees paid by a resident upon entering into a continuing care contract, net of the portion thereof that is refundable to the resident, are recorded as deferred revenue and are amortized to income using the straight-line method over the estimated remaining life expectancy of the resident.

Obligation to provide future services. The CCRC annually calculates the present value of the net cost of future services and the use of facilities to be provided to current residents and compares that amount with the balance of deferred revenue from advance fees. If the present value of the net cost of future services and the use of facilities exceeds the deferred revenue from advance fees, a liability is recorded (obligation to provide future services and use of facilities) with the corresponding charge to income. The obligation is discounted at 9 percent, based on the expected long-term rate of return on government obligations.

Donor restrictions. The CCRC reports gifts of cash and other assets as restricted support if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires (that is, when a stipulated time restriction ends or a purpose restriction is accomplished), temporarily restricted net assets are reclassified as unrestricted net assets and reported in the statement of operations as net assets released from restrictions. Donor-restricted contributions whose restrictions are met within the same year as received are reflected as unrestricted contributions in the accompanying financial statements.

* Does not include all disclosures common to all health care entities.

The CCRC reports gifts of property and equipment (or other long-lived assets) as unrestricted support unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as restricted support. Absent explicit donor stipulations about how long those long-lived assets must be maintained, the CCRC reports expirations of donor restrictions when the donated or acquired long-lived assets are placed in service.

Income taxes. The CCRC has been recognized by the Internal Revenue Service as a not-for-profit corporation as described in Sec. 501(c)(3) of the Internal Revenue Code (IRC) and is exempt from federal income taxes pursuant to Sec. 501(a) of the IRC.

Property and equipment. Property and equipment are stated at cost. Donated property is recorded at its estimated fair value at the date of receipt. Depreciation is computed on the straight-line method based on the following estimated useful lives:

Land improvements	20 years
Buildings and improvements	40 years
Furniture and equipment	5–15 years

Operating income (loss). The statement of operations includes *operating income (loss)*. Changes in unrestricted net assets which are excluded from operating income (loss), consistent with industry practice, include unrealized gains and losses on investments other than trading securities, permanent transfers of assets to and from affiliates for other than goods and services, and contributions of long-lived assets (including assets acquired using contributions which by donor restriction were to be used for the purposes of acquiring such assets).

2. Property and Equipment

A summary of property and equipment at December 31, 19X5 and 19X4, follows:

	19X5	19X4
Land	\$ 557,000	\$ 557,000
Land improvements	205,000	203,000
Buildings and improvements	14,573,000	14,564,000
Furniture and equipment	752,000	698,000
	16,087,000	16,022,000
Less: accumulated depreciation	(1,194,000)	(742,000)
	<u>\$14,893,000</u>	<u>\$15,280,000</u>

3. Temporarily Restricted Net Assets

Temporarily restricted net assets are available for the following purposes:

	19X5	19X4
Purchase of equipment	\$169,000	\$152,000
Charity care	142,000	142,000
	<u>\$311,000</u>	<u>\$294,000</u>

Net assets were released from donor restrictions by incurring expenses satisfying the restricted purposes or by occurrence of other events specified by donors:

	<u>19X5</u>	<u>19X4</u>
Charity care	<u>\$24,000</u>	<u>\$50,000</u>
Purchase of equipment	<u>\$25,000</u>	<u>\$45,000</u>

4. Permanently Restricted Net Assets

Permanently restricted net assets are restricted to investment in perpetuity, the income from which is expendable to support:

	<u>19X5</u>	<u>19X4</u>
Charity care	\$168,000	\$168,000
Community activities	283,000	216,000
	<u>\$451,000</u>	<u>\$384,000</u>

5. Long-Term Debt

Long-term debt at December 31, 19X5 and 19X4, is as follows:

	<u>19X5</u>	<u>19X4</u>
10.75 percent mortgage note payable	\$8,901,000	\$8,965,000
Notes payable to bank—unsecured	34,000	14,000
Other	26,000	33,000
	<u>8,961,000</u>	<u>9,012,000</u>
Less current maturities	<u>90,000</u>	<u>77,000</u>
	<u>\$8,871,000</u>	<u>\$8,935,000</u>

The mortgage note is payable in consecutive monthly installments of principal and interest of \$85,425 to May 20XX. The note is collateralized by a first mortgage on property and equipment with a depreciated cost at December 31, 19X5, of \$14,893,000 and by a pledge of all operating revenue.

As required by the mortgage note agreement, the CCRC established an initial debt service reserve fund of \$1,000,000 at April 15, 19X3. All resident fees received thereafter, net of resident fee refunds and debt service payments not to exceed \$300,000 annually in the first four years and \$200,000 annually thereafter, are to be added to the debt service reserve fund until the total sum of \$2,050,000 is accumulated. Since June 1, 19X4, the CCRC has been required to deliver to the trustee \$5,500 per month to establish maintenance reserves until the aggregate of such payments equals a residential unit reserve and a health care center reserve of \$240,000 and \$90,000, respectively. At December 31, 19X5 and 19X4, the trustee held investments aggregating \$2,130,000 and \$1,753,000, respectively. Such amount has been classified as assets limited as to use.

Scheduled annual principal maturities of long-term debt for the next five years are as follows:

<u>Year Ending December 31,</u>	<u>Amount</u>
19X6	\$ 90,000
19X7	90,000
19X8	95,000
19X9	105,000
20Y0	105,000

6. Classification of Expenses

	<u>19X5</u>	<u>19X4</u>
Program activities	3,368,000	3,135,000
General and administrative	593,000	570,000
	<u>\$3,961,000</u>	<u>\$3,705,000</u>

- 7. Assets Limited as to Use*
- 8. Risks and Uncertainties Disclosures*
- 9. Pension Plan*
- 10. Postretirement Benefits*
- 11. Fair Values of Financial Instruments*
- 12. Concentrations of Credit Risk*

Net cash provided by operating activities	<u>\$ 76,000</u>	<u>\$ 41,000</u>

See accompanying notes to financial statements.

Sample Not-for-Profit Home Health Agency
Notes to Financial Statements
Years Ended December 31, 19X5 and 19X4

1. Description of Organization and Summary of Significant Accounting Policies

Organization. The Sample Home Health Agency (the Agency) was incorporated in 19X0 in New State as a not-for-profit corporation. The Agency provides health and supportive services to individuals at their homes, primarily in the New State area.

Use of estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents. Cash and cash equivalents include investments in highly liquid debt instruments with an original maturity of three months or less.

Investments. Investments, which consist of U.S. Treasury obligations, are measured at fair value in the balance sheet. Investment income (including realized gains and losses on investments, interest and dividends) is included in excess of revenues over expenses unless restricted by donor or law. Unrealized gains and losses on investments, if any, are excluded from excess of revenues over expenses.

Equipment. Equipment is recorded at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets.

Deferred financing costs. Deferred financing costs are being amortized using the effective interest method over the term of the related financing agreement.

Donor restrictions. The Agency reports gifts of cash and other assets as restricted support if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified as unrestricted net assets and reported in the statement of operations as net assets released from restrictions. When long-lived assets are placed in service, thus satisfying purpose restrictions, the amount is included as a change in net assets, restricted and unrestricted. Donor-restricted contributions whose restrictions are met within the same year as received are reflected as unrestricted contributions in the accompanying financial statements.

The Agency reports gifts of equipment (or other long-lived assets) as unrestricted support unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as restricted support. Absent explicit donor stipulations about how long those long-lived assets must be maintained, the Agency reports expirations of donor restrictions when the donated or acquired long-lived assets are placed in service.

Net patient service revenue. Net patient service revenue represents the estimated net realizable amounts from patients, third-party payors, and others for services rendered.

Charity care. The Agency has a policy of providing charity care to patients who are unable to pay. Such patients are identified based on financial information obtained from the patient and subsequent analysis. Since the Agency does not expect payment, estimated charges for charity care are not included in revenue.

Income taxes. The Agency has been recognized by the Internal Revenue Service as a not-for-profit corporation as described in Sec. 501(c)(3) of the Internal Revenue Code (IRC) and is exempt from federal income taxes on related income pursuant to Sec. 501(a) of the IRC.

Excess of revenue over expenses. The statement of operations includes excess of revenue over expenses. Changes in unrestricted net assets which are excluded from excess of revenue over expenses, consistent with industry practice, include unrealized gains and losses on investments other than trading securities, permanent transfers of assets to and from affiliates for other than goods and services, and contributions of long-lived assets (including assets acquired using contributions which by donor restriction were to be used for the purposes of acquiring such assets).

2. Temporarily Restricted Net Assets

Temporarily restricted net assets are available for the following purposes:

	<u>19X5</u>	<u>19X4</u>
Charity care	\$ —	\$5,000
Purchase of equipment	<u>9,000</u>	<u>—</u>
	<u>\$9,000</u>	<u>\$5,000</u>

Net assets were released from donor restrictions by incurring expenses satisfying the restricted purposes or by occurrence of other events specified by donors:

	<u>19X5</u>	<u>19X4</u>
Charity care expenditures	<u>\$5,000</u>	<u>\$ —</u>

3. Permanently Restricted Net Assets

Permanently restricted net assets are restricted in perpetuity, the income from which is expendable to support:

	<u>19X5</u>	<u>19X4</u>
Program A activities	\$10,000	\$ —
Any activities of the Agency	<u>80,000</u>	<u>80,000</u>
	<u>\$90,000</u>	<u>\$80,000</u>

4. Third-Party Rate Adjustments and Revenue

Approximately 38 percent in 19X5 and 37 percent in 19X4 of net patient service revenue was derived under federal and state third-party reimbursement programs. These revenues are based, in part, on cost reimbursement principles and are subject to audit and retroactive adjustment by the respective

third-party fiscal intermediaries. In the opinion of management, retroactive adjustments, if any, would not be material to the financial position or results of operations of the Agency.

5. Internally-Designated Assets

The Board of Directors has designated investments aggregating \$135,000 to be used for future major capital improvements. Those assets are classified in the balance sheet as investments.

6. Long-Term Debt

Long-term debt at December 31, 19X5 and 19X4, is as follows:

	<u>19X5</u>	<u>19X4</u>
Note payable to bank, interest at 15 percent, payable in monthly installments of \$2,200 per month, including interest, collateralized by equipment with a depreciated cost of \$42,000	\$118,000	\$131,000
Less current maturities	<u>13,000</u>	<u>13,000</u>
	<u>\$105,000</u>	<u>\$118,000</u>

Scheduled maturities of long-term debt at December 31, 19X5, are as follows:

<u>Year Ending December 31,</u>	<u>Amount</u>
19X6	\$ 13,000
19X7	13,000
19X8	13,000
19X9	13,000
20Y0	13,000
Thereafter	<u>53,000</u>
Total	<u>\$118,000</u>

7. Classification of Expenses

	<u>Total</u>	<u>Program</u>			<u>General and Administrative</u>
		<u>A</u>	<u>B</u>	<u>C</u>	
Expenses incurred for the year ended December 31, 19X5, were for:					
Salaries and benefits	\$2,714,000	\$1,363,000	\$699,000	\$363,000	\$289,000
Medical supplies and drugs	1,042,000	511,000	246,000	285,000	
Insurance and other	90,000	58,000			32,000
Provision for bad debts	46,000	16,000	30,000		
Depreciation	21,000	5,000			16,000
Interest	<u>16,000</u>	<u>10,000</u>	<u>3,000</u>		<u>3,000</u>
Total expenses	<u>\$3,929,000</u>	<u>\$1,963,000</u>	<u>\$978,000</u>	<u>\$648,000</u>	<u>\$340,000</u>

	<u>Total</u>	<u>Program</u>			<u>General and Administrative</u>
		<u>A</u>	<u>B</u>	<u>C</u>	
Expenses incurred for the year ended December 31, 19X4, were for:					
Salaries and benefits	\$1,835,000	\$ 915,000	\$463,000	\$216,000	\$241,000
Medical supplies and drugs	675,000	335,000	211,000	129,000	
Insurance and other	83,000	64,000			19,000
Provision for bad debts	21,000	21,000			
Depreciation	15,000	6,000			9,000
Interest	<u>19,000</u>	<u>12,000</u>	<u>5,000</u>		<u>2,000</u>
Total expenses	<u>\$2,648,000</u>	<u>\$1,353,000</u>	<u>\$679,000</u>	<u>\$345,000</u>	<u>\$271,000</u>

(The preparer of the financial statements may wish to include a brief description of the types of programs.)

8. Charity Care

Charity care represented approximately 3 percent and 4 percent of visits in 19X5 and 19X4, respectively.

9. Risks and Uncertainties Disclosures*

10. Pension Plan*

11. Postretirement Benefits*

12. Fair Value of Financial Statements*

13. Concentrations of Credit Risk*

14. Investments*

* The disclosures contained in these notes would be similar to the disclosures contained in the notes to the financial statements for the not-for-profit hospital and, therefore, are not repeated here.

See accompanying notes to financial statements.

Sample Not-for-Profit Health Maintenance Organization
Notes to Financial Statements
June 30, 19X5 and 19X4

1. Organization

The Sample Health Maintenance Organization (the HMO) was incorporated in 19X0 in New State as a not-for-profit corporation for the purpose of providing comprehensive health care services on a prepaid basis and for the purpose of establishing and operating organized health maintenance and health care delivery systems.

The HMO has been determined to be a qualified health maintenance organization under Title XIII of the Public Health Service Act.

2. Summary of Significant Accounting Policies

Use of estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents. Cash and cash equivalents include investments in highly liquid debt instruments with an original maturity of three months or less.

Supplies. Inventories of drugs and other supplies are stated at the lower of cost (first-in, first-out) or market.

Property and equipment. Property and equipment are recorded at cost. Maintenance and repairs are charged to expense, and betterments are capitalized. Property and equipment costing approximately \$700,000 was financed by health maintenance organization initial development grants received in 19X1 and 19X2 from the U.S. Department of Health and Human Services (HHS). This property will be owned by the HMO as long as the equipment and facilities are used for projects related to the objectives of the Public Health Service Act.

Depreciation is computed using the straight-line method over the estimated useful lives of the related assets as follows:

Building	40 years
Improvements	20–25 years
Data processing and laboratory equipment and automobiles	3–7 years
Medical equipment	10 years
Office equipment	5–10 years

Amortization of debt issuance costs. Debt issuance costs are deferred and amortized using the effective interest method over the term of the related debt.

Health care service cost recognition. The HMO contracts with various health care providers for the provision of certain medical care services to its members.

The HMO compensates these providers on a capitation basis. As part of a cost control incentive program, the HMO retains up to 20 percent of the capitation as a risk-sharing fund. In the event of hospital utilization in excess of budget, those providers bear the risk to the extent of 15 percent of the capitation fee. Operating expenses include all amounts incurred by the HMO under the aforementioned contracts.

The cost of other health care services provided or contracted for is accrued in the period in which it is provided to a member based in part on estimates, including an accrual for medical services provided but not reported to the HMO.

Premiums revenue. Membership contracts are on a yearly basis subject to cancellation by the employer group or the HMO upon 30 days written notice. Premiums are due monthly and are recognized as revenue during the period in which the HMO is obligated to provide services to members.

Reinsurance (stop-loss insurance). Reinsurance premiums are reported as health care costs, and reinsurance recoveries are reported as a reduction of related health care costs.

Federal income tax. The HMO is exempt from federal income taxes under Sec. 501(c)(4) of the Internal Revenue Code; accordingly, no provision for federal income taxes has been made in the accompanying financial statements.

3. Property and Equipment

Property and equipment at June 30, 19X5 and 19X4, consists of the following:

	<u>19X5</u>	<u>19X4</u>
Land	\$ 300,000	\$ 300,000
Buildings and improvements	5,473,000	5,459,000
Furniture and equipment	<u>1,786,000</u>	<u>1,303,000</u>
	7,559,000	7,062,000
Less accumulated depreciation	<u>(1,803,000)</u>	<u>(1,436,000)</u>
	<u>\$5,756,000</u>	<u>\$5,626,000</u>

4. Long-Term Debt

Long-term debt is collateralized by assets with a depreciated cost of \$4,943,000. A summary of long-term debt at June 30, 19X5 and 19X4, follows.

	<u>19X5</u>	<u>19X4</u>
HHS loan, interest at 7.5 percent, payable in monthly installments of \$50,000, including interest	\$2,020,000	\$ 111,000
HHS loan, interest at 9.25 percent, payable in monthly installments of \$10,000, including interest	1,658,000	1,694,000
Secured equipment loans, payable in monthly installments of \$15,000, including interest	<u>858,000</u>	<u>686,000</u>
	4,536,000	2,491,000
Less current maturities	<u>241,000</u>	<u>109,000</u>
	<u>\$4,295,000</u>	<u>\$2,382,000</u>

Scheduled principal payments on long-term debt are as follows:

<u>Year Ending December 31,</u>	<u>Amount</u>
19X6	\$ 241,000
19X7	259,000
19X8	280,000
19X9	800,000
20Y0	<u>2,956,000</u>
	<u>\$4,536,000</u>

5. State Guarantee Fund Deposit

In August 19X4 the state in which the HMO is domiciled enacted legislation specifically governing HMOs. Under this legislation, the corporation is required to maintain a deposit of \$150,000 with the director of the division of insurance of the state.

6. Employee Retirement Plan

The HMO has a contributory defined contribution retirement plan covering substantially all employees. Expense determined in accordance with the plan formula (4 percent to 10 percent of eligible covered compensation) was \$354,000 and \$275,000 for the years ended June 30, 19X5 and 19X4, respectively.

7. Stop-Loss Insurance

The HMO entered into a stop-loss insurance agreement with an insurance company to limit its losses on individual claims. Under the terms of this agreement, the insurance company will reimburse the HMO approximately 25 percent of the cost of each member's annual hospital services, in excess of a \$1,000 deductible, up to a lifetime limitation of \$500,000 per member. In the event the HMO ceases operations, (a) plan benefits will continue for members who are confined in an acute care hospital on the date of insolvency until their discharge, and (b) plan benefits will continue for any other member until the end of the contract period for which premiums have been paid.

Stop-loss insurance premiums of approximately \$700,000 and \$500,000 are included in insurance expense (Note 9) in 19X5 and 19X4, respectively. Approximately \$600,000 and \$400,000 in stop-loss insurance recoveries are deducted from insurance expense in 19X5 and 19X4, respectively.

Included in other receivables is approximately \$50,000 recoverable from insurers.

8. Malpractice Claims

Malpractice claims have been asserted against the HMO by various claimants. The claims are in various stages of processing, and some may ultimately be brought to trial. In the opinion of counsel, the outcome of these actions will not have a significant effect on the financial position or the operating income of the HMO. Incidents occurring through June 30, 19X5, may result in the assertion of additional claims. Other claims may be asserted arising from past services provided. Management believes that these claims, if asserted, would be settled within the limits of insurance coverage.

9. Classification of Expenses

	<u>19X5</u>	<u>19X4</u>
Program activities	26,921,000	20,909,000
General and administrative	2,474,000	1,601,000
	<u>\$29,395,000</u>	<u>\$22,510,000</u>

10. Risks and Uncertainties Disclosures*

11. Pension Plan*

12. Postretirement Benefits*

13. Fair Value of Financial Instruments*

14. Concentrations of Credit Risk*

* The disclosures contained in these notes would be similar to the disclosures contained in the notes to the financial statements for the not-for-profit hospital and, therefore, are not repeated here.

Sample Not-for-Profit Ambulatory Care, Inc.
Notes to Financial Statements
December 31, 19X5 and 19X4

1. Description of Organization and Summary of Significant Accounting Policies

Organization. Ambulatory Care, Inc. was incorporated on September 7, 19X3, in New State, to operate an ambulatory care health facility to treat or prevent injury and disease, to provide funds or to expend funds to further the treatment or prevention of injury or disease, and to develop and participate in activities designed to promote the general health of the community.

Three area hospitals—ABC Hospital and Health Center, DEF Hospital, and GHI Hospital—entered into a members' agreement to develop this ambulatory care center. In accordance with this agreement, each hospital contributed capital of \$947,000 to Ambulatory Care, Inc. Ambulatory Care, Inc. began operations in October 19X3.

Use of estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Supplies. Supplies are stated at the lower of cost (first-in, first-out) or net realizable value.

Depreciation. Depreciation of property and equipment is computed on the straight-line method over the estimated lives of depreciable assets.

Third-party contractual adjustments. Retroactively calculated third-party contractual adjustments are accrued on an estimated basis in the period the related services are rendered. Net patient service revenue is adjusted as required in subsequent periods based on final settlements.

Net patient service revenue. Patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors, and others for services rendered.

Charity care. Ambulatory Care, Inc. has a policy of providing charity care to patients who are unable to pay. Such patients are identified and related charges are estimated, based on financial information obtained from the patient and subsequent analysis. Since management does not expect payment for charity care, the estimated charges are excluded from revenue.

Income taxes. Ambulatory Care, Inc. has been recognized by the Internal Revenue Service as a not-for-profit corporation as described in Sec. 501(c)(3) of the Internal Revenue Code (IRC) and is exempt from federal income taxes on related income pursuant to Sec. 501(a) of the IRC.

2. Advances Receivable

In May 19X4, Ambulatory Care, Inc. entered into a five-year agreement with XYZ Affiliates (XYZ). Under this agreement, XYZ is to provide emergency medical services as well as charge and bill each patient treated at Ambulatory Care, Inc. Ambulatory Care, Inc. has guaranteed that XYZ will collect at least

\$18,000 per month during the term of this agreement. In any month in which XYZ does not collect the minimum guarantee, Ambulatory Care, Inc. advances funds to XYZ to cover the deficiency. Such advances are to be repaid to the extent XYZ's net cash collections exceed the minimum guarantee amount. Management estimates that the advances will be fully recovered in 19X8.

3. Related-Party Transactions

During 19X3, Ambulatory Care, Inc. entered into a contract with one of the member hospitals (the managing hospital) for the management of the business and affairs of Ambulatory Care, Inc. Under this agreement, Ambulatory Care, Inc. pays \$4,000 per month to the managing hospital. The agreement with the managing hospital was to remain in effect through December 31, 19X5, but has been extended on a month-to-month basis.

In addition, during 19X4 each hospital loaned \$48,000 to Ambulatory Care, Inc. in the form of promissory notes at an interest rate of prime rate plus 1 percent (effective rates of 10 percent and 9 percent in 19X5 and 19X4, respectively). Of the total \$144,000 liability, \$48,000 is payable on demand after November 28, 19X5, to one member hospital, with the remaining portion (\$96,000) payable on demand after December 8, 19X5, to the other two member hospitals. During 19X5, Ambulatory Care, Inc. paid \$2,000 to each member hospital, thereby reducing the obligation to \$138,000.

4. Revenue From Contracting Agencies

Ambulatory Care, Inc. participates as a provider of health care services to Blue Cross, Medicare, and County Indigent Plan patients. Reimbursement for covered services is based on tentative payment rates. Final reimbursement is determined after submission of annual cost reports and audits thereof by the fiscal intermediaries. Provisions for estimated reimbursement adjustments are reported in the financial statements in the period that the services are rendered.

5. Charity Care

Ambulatory Care, Inc. has a policy of providing charity care to indigent patients in emergency situations. These services, which are excluded from revenues, amounted to \$27,000 and \$13,000 in 19X5 and 19X4, respectively, when measured at Ambulatory Care, Inc.'s established rates.

6. Classification of Expenses

	<i>Program</i>				<i>General and Administrative</i>
	<i>Total</i>	<i>A</i>	<i>B</i>	<i>C</i>	
Expenses incurred for the year ended December 31, 19X5, were for:					
Salaries and benefits	\$485,000	\$216,000	\$102,000	\$121,000	\$46,000
Medical supplies and drugs	189,000	98,000	43,000	48,000	—
Insurance	154,000	79,000	45,000	14,000	16,000
Provision for bad debts	14,000	9,000	—	5,000	—
Depreciation	117,000	100,000	—	17,000	—
Interest	20,000	9,000	—	—	11,000
Total expenses	<u>\$979,000</u>	<u>\$511,000</u>	<u>\$190,000</u>	<u>\$205,000</u>	<u>\$73,000</u>

	<u>Total</u>	<u>Program</u>			<u>General and Administrative</u>
		<u>A</u>	<u>B</u>	<u>C</u>	
Expenses incurred for the year ended December 31, 19X4, were for:					
Salaries and benefits	\$243,000	\$111,000	\$46,000	\$ 57,000	\$29,000
Medical supplies and drugs	66,000	31,000	15,000	20,000	—
Insurance	98,000	45,000	19,000	26,000	8,000
Provision for bad debts	4,000	—	4,000	—	—
Depreciation	100,000	56,000	—	44,000	—
Interest	18,000	7,000	—	—	11,000
Total expenses	<u>\$529,000</u>	<u>\$250,000</u>	<u>\$84,000</u>	<u>\$147,000</u>	<u>\$48,000</u>

(The preparer of the financial statements may wish to include a brief description of the types of programs.)

7. Risks and Uncertainties Disclosures*

8. Pension Plan*

9. Postretirement Benefits*

10. Fair Value of Financial Instruments*

11. Concentrations of Credit Risk*

* The disclosures contained in these notes would be similar to the disclosures contained in the notes to the financial statements for the not-for-profit hospital and, therefore, are not repeated here.

Appendix B

Background Information and Basis for Conclusions

1. This appendix provides background information and discusses the comments received on the April 14, 1995 exposure draft that preceded this Audit and Accounting Guide (Guide)— Proposed Audit and Accounting Guide *Health Care Organizations* and the basis for key conclusions in this Guide.

Background Information

2. In 1989, the AICPA Health Care Committee ("the Committee") completed a total rewrite of the guide. Since then, conforming changes have been made to update the guide for newly issued technical pronouncements. In June 1993, the FASB issued FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* ("Contributions"), and FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations* ("Display"). These Statements provide broad standards and introduce new concepts for which there is no detailed implementation guidance. FASB Statement No. 117 permits the AICPA to provide more specific reporting guidance. Specifically, paragraph 3 of FASB Statement No. 117 states:

"Within the parameters of the Statement, the AICPA or another appropriate body, following the process described in AICPA Statement of Auditing Standards (SAS) No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, may provide more specific reporting guidance for certain not-for-profit organizations."

The Guide provides this guidance as it relates to providers of health care services.

3. In April 1995, the Committee released an exposure draft of a proposed Audit and Accounting Guide *Health Care Organizations* (ED) for public comment. The committees received 40 comment letters on the ED. The committees redeliberated the issues based on the comments received. This appendix discusses the key issues in the ED and comments received on those issues, as well as the basis for AcSEC's conclusions on those and certain other issues.

Basis for Conclusions

Contributions and Display

4. FASB Statements No. 116 and No. 117 allow more flexibility in financial reporting than currently exists within the health care industry. The most prominent flexibility relates to the elimination of the requirements to present a classified balance sheet and income statement as compared to the statement of activities.

5. FASB Statements No. 116 and No. 117 apply to all not-for-profit enterprises, regardless of whether or not the entity is a business enterprise. The majority of tax-exempt health care organizations, however, operate as business enterprises (i.e., are essentially self-sustaining from fees charged for goods and services). The Committee believes that the uniformity and usefulness of financial reporting for business enterprise organizations would be enhanced if the implementation guidance for FASB Statements No. 116 and No. 117 were consistent with the objectives of business enterprise financial reporting. The Committee points to the provisions in FASB Concept Statement No. 4, paragraph 8, which clearly supports the use of business enterprise financial reporting objectives for those organizations:

"Some organizations have no ownership interest but are essentially self-sustaining from fees they charge for goods and services. Examples are those private nonprofit hospitals...that may receive relatively small amounts of contributions and grants, but finance their capital needs largely from the proceeds of debt issues and their operating needs largely from service charges rather than from private philanthropy or governmental grants. As a result, assessments of amounts, timing, and uncertainty of cash flows become the dominate interest of their creditors and other resource providers and profitability becomes an important indicator of performance. Consequently, the objectives of Concepts Statement 1 may be more appropriate for those organizations."

6. Based on the theoretical support provided in FASB Concepts Statement No. 4, as well as the FASB allowance for more specific guidance (see paragraph 2 of this appendix), chapter 1 of the Guide defines four types of operating structures that are found within the industry: (1) not-for-profit business-oriented organizations, (2) investor-owned health care enterprises, (3) governmental health care organizations, and (4) not-for-profit, nonbusiness-oriented organizations. This Guide provides specific reporting guidance for not-for-profit business-oriented organizations, investor-owned enterprises and governmental entities. (Not-for-profit nonbusiness organizations follow guidance for not-for-profit entities provided in the Audit and Accounting Guide *Not-for-Profit Organizations*.) The Guide recommends that these entities provide a classified balance sheet and a statement of operations. The Guide also encourages natural class reporting on the face of the financial statements, with disclosure of functional details in the footnotes.

7. A number of respondents to the ED were concerned that because the exposure draft of the Guide did not require an entity to distinguish between operating activities and nonoperating activities that such distinctions were no longer permissible. In response to these concerns, the Guide was clarified to incorporate paragraph 23 of FASB Statement No. 117. This paragraph specifically allows additional classifications within a statement of operations. Like FASB Statement No. 117, however, the Guide neither requires nor precludes such classifications.

Assets Whose Use is Limited

8. Several comments were received on the ED requesting specific guidance to allow internally designated funds to be disclosed on the face of the financial statements. In response to these comments, the Committee clarified the Guide to require cash and claims to cash that meet one of the following criteria to be reported separately and excluded from current assets:

- a. restricted as to withdrawal or use for other than current operations,
- b. designated for expenditure in the acquisition or construction of noncurrent assets,

- c. required to be segregated for the liquidation of long-term debts, or
- d. required by a donor-imposed restriction that limits their use to long-term purposes.

Consistent with comments received from a rating agency, the Guide requires internally designated funds to be reported separately from externally designated funds either in the notes to or on the face of the financial statements. The Committee believes this separation is beneficial due to the degree of control an organization maintains over internally designated funds.

Investments

9. Chapter 4, as presented in the Exposure Draft, was re-drafted to conform with the provisions of FASB Statement No. 124, *Certain Investments Held by Not-For-Profit Organizations*. This Standard requires fair value accounting for marketable equity and debt securities. The majority of respondents to the ED favored an income recognition approach similar to FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. They believe such an approach is essential because it would foster greater consistency among not-for-profit and for-profit entities. Accordingly, an approach similar to FASB Statement No. 115 (i.e., the differentiation of trading securities vs. available-for-sale securities) was incorporated into the Guide. (The FASB specifically prohibited the use of a held-to-maturity category by not-for-profit organizations.)

Accounting for Donor-Imposed Restricted Contributions on Long-Lived Assets

10. The majority of comments received on accounting for donor-imposed restrictions on contributions of long-lived assets concurred with the Health Care Committee's conclusion that the expiration of donor imposed restrictions on long-lived assets should be recognized when the asset is placed in service (rather than as depreciated as permitted by FASB Statement No. 116). Other respondents disagreed with the Health Care Committee's position for various reasons. After considering each comment on the issue, the Committee concluded that it would maintain the position set forth in the ED. The Committee believes this approach is easier to implement, it provides for uniformity in reporting within the industry and, because the donations are excluded from operating results, an appropriate matching of revenues and expenses occurs.

Use of a Performance Indicator

11. The Guide stresses the importance of the performance indicator and, in an effort to ensure consistency within the industry, provides specific guidance on what the performance indicator should represent. This guidance is consistent with performance criteria historically used in the health care industry, to the extent allowed under the provisions of FASB Statement No. 117. Specifically, the Guide states that health care organizations should report the results of their operations separately from—

- a. Transactions with owners acting in that capacity.
- b. Equity transfers involving other entities that control the reporting entity, are controlled by the reporting entity, or are under common control with the reporting entity.

- c. Receipt of restricted contributions, including temporary restrictions (such as time or purpose) or permanent restrictions.
- d. Contributions of (and assets released from donor restrictions related to) long-lived assets.
- e. Unrealized gains and losses on investments not restricted by donors or by law, except for those investments classified as trading securities.
- f. Investment returns restricted by donors or by law.
- g. Other items that are required by GAAP to be reported separately (such as extraordinary items, the effect of discontinued operations, or the cumulative effect of accounting changes).¹

12. In its deliberations, the FASB discussed the use of the word *net income* to describe the performance indicator of not-for-profit health care organizations. The Board concluded that the term *net income* is an inappropriate term to describe the performance indicator of a not-for-profit organization and that descriptive terms such as *revenues over expenses*, *revenues and gains over expenses and losses*, *earned income* or *performance earnings* would be more appropriate. Accordingly, this guide requires the use of such descriptive terms instead of *net income* to describe the performance indicator of not-for-profit organizations.

Definition of a Governmental Entity

13. Subsequent to the release of the ED, the FASB and the GASB agreed on the definition of a governmental entity. Paragraph 1.02 of the Guide incorporates that definition.

Effective Date

14. Several comment letters were received expressing concern about the effective date of the Guide. In response to these comments, the Committee revised the effective date to fiscal years beginning after June 15, 1996, with earlier application permitted.

Status of Audit and Accounting Guides in the GAAP Hierarchy

15. In several instances the Guide provides more specific reporting requirements than FASB Statements No. 116 and No. 117 (see paragraphs 4 through 6, 8, 10, and 11). In the deliberation of the Guide, the question has arisen regarding the status of the guide in the GAAP hierarchy, given the fact that AICPA Audit and Accounting Guides are “Level B” GAAP while FASB Statements are “Level A”. In discussing the issue the Committee and the Accounting Standards Executive Committee referred to paragraph 49 of FASB Statement No. 117, which states that the AICPA:

“may provide more specific reporting guidance for certain not-for profit organizations. SAS 69 requires that an entity adopt cleared AICPA Industry Audit and Accounting Guides, and cleared AICPA Statements of Position that become

¹ Governmental enterprises should report extraordinary items and the effect of discontinued operations in the statement of operations immediately preceding *net income*; the cumulative effect of an accounting change should be reported as an adjustment to *beginning fund balance* in the period of the change. Investor-owned enterprises should report extraordinary items, the effect of discontinued operations and the cumulative effect of an accounting change in the statement of operations immediately preceding net income.

effective after March 15, 1992. As used in SAS 69, cleared means that the FASB has indicated that it does not object to the issuance of the proposed pronouncement.”

The FASB has indicated that it does not object to the more specific reporting requirements contained in this guide for health care organizations.

Appendix C

Information Sources

Further information on matters addressed in this Guide is available through various publications and services listed in the table that follows. Many non-government and some government publications and services involve a charge or membership requirement.

Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow the user to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

All telephone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed for data lines.

Appendix A	Modified.	June, 1997
Glossary	Definition of “in-substance defeasance” revised.	June, 1997

Glossary

acquisition costs. Marketing costs that are (a) directly related to the acquisition of specific subscriber contracts and member enrollment and (b) incremental to general marketing activities.

acute care. Inpatient general routine care provided to patients who are in a phase of illness that does not require the concentrated and continuous observation and treatment provided in intensive-care units.

advance fee. A payment required to be made by a continuing care retirement community (CCRC) resident prior to, or at the time of, admission to the CCRC for future services and the use of facilities specified in a contract that remains in effect for as long as the resident resides in the CCRC.

advance refunding. A transaction in which refunding debt is issued to pay the refunded debt at a specified future date(s), with the proceeds placed in trust or otherwise restricted to pay the refunded debt.

allocated loss adjustment expense (ALAE). Claim expense that can be assigned to individual claims (for example, attorney's fees, claim adjusting service fees, or court costs).

ambulatory care organization. A partnership, association, corporation, or other legal entity organized to deliver health care services to patients that come or are brought to a health care facility for a purpose other than admission as an inpatient (for example, emergency room services, clinic services, or outpatient surgery).

ancillary services. Services performed for diagnostic or therapeutic purposes. Ancillary services generally are those special services for which charges in addition to routine charges customarily are made (for example, laboratory, radiology, surgical, or other services).

anticipated revenues. Amounts including third-party payments (for example, those from Blue Cross), contractually or statutorily committed investment income from sources related to the activities of a continuing care retirement community (CCRC), contributions pledged by donors to support CCRC activities, periodic fees expected to be collected, or the balance of deferred nonrefundable advance fees.

asserted claim. A claim made against a health care organization by or on behalf of a patient alleging improper professional service.

assets limited as to use. Assets that are segregated and limited either by the Board or management (for example, designated for expenditure in the acquisition of property and equipment or for the liquidation of long-term debt) or by outside third parties other than a donor or grantor (for example, funds under bond agreements or malpractice arrangements) as to how the assets may be used.

associated entity. An individual practice association, hospital, medical group, or similar health care organization that contracts with a prepaid health care provider to provide health care services.

bad-debt expense. The provision for actual or expected doubtful accounts resulting from the extension of credit.

capitation fee. A fixed amount per individual that is paid periodically (usually monthly) to a provider as compensation for providing comprehensive health care services for the period. The fee is set by contract between a prepaid health care plan and the provider. These contracts are generally with medical groups, independent practice associations (IPAs), hospitals, and other similar providers. Capitation fees may be determined actuarially or negotiated based on expected costs to be incurred.

charity care. Health care services that never were expected to result in cash inflows. Charity care results from a provider's policy to provide health care services free of charge to individuals who meet certain financial criteria.

claims-made insurance policy. A policy that covers only malpractice claims reported to the insurance carrier during the policy term, regardless of the date of the incident giving rise to the claim.

clinic. A freestanding facility or part of another health care organization used for diagnosis and treatment of outpatients.

commercial paper. Short-term, unsecured promissory notes that represent a flexible and low-cost form of short-term financing. Taxable commercial paper is sold on a discount basis, rather than on an interest-bearing basis, with the discount determined by the maturity of the notes, the creditworthiness of the issuer or its credit support, and general market demand. The primary risk is the variable interest rate exposure. Issuance often requires some form of credit enhancement or liquidity support.

comprehensive medical plan (CMP). A health plan option that may be available to Medicare beneficiaries and provides a more limited range of services than health maintenance organizations but includes physician services, laboratory, radiology, emergency, preventive, and inpatient services. A CMP assumes the financial risk for the provision of services and for out-of-area coverage.

conditional promise to give. A promise to give that depends on the occurrence of a specified future or uncertain event to bind the promisor.

continuing-care contract. An agreement between a resident and a CCRC specifying the services and facilities to be provided by the CCRC to a resident over an established period of time (usually the remaining life of the resident).

continuing care retirement community (CCRC). A legal entity sponsoring or guaranteeing residential facilities, meals, and health care services for a community of retired persons who may reside in apartments, other living units, or in some cases a nursing center. (Also referred to as a residential care facility or a life-care retirement community.)

contract period. The period (typically one year) for which premium rates are fixed by contract.

contractual adjustments. The differences between revenue at established rates and the amounts realizable from third-party payors under contractual agreements.

contribution. An unconditional transfer of cash or other assets to an entity or a settlement or cancellation of its liabilities in a voluntary nonreciprocal transfer by another entity acting other than as an owner.

costs of acquiring initial continuing-care contracts. Costs incurred to originate a contract that result from and are essential to the acquisition of the initial contracts and are incurred through the date of substantial occupancy but no later than one year from the date of completion of construction.

These costs include—

- The costs of processing the contract, such as evaluating the prospective resident's financial condition; evaluating and recording guarantees, collateral, and other security arrangements; negotiating contract terms; preparing and processing contract documents; and closing the transaction.
- The costs from activities in connection with soliciting potential initial residents (such as model units and their furnishings, sales brochures, semipermanent signs, tours, grand openings, and sales salaries). These costs do not include advertising, interest, administrative costs, rent, depreciation, or any other occupancy or equipment costs.
- The portion of an employee's compensation and benefits that relates to the initial contract acquisitions.

courtesy and policy discounts. The differences between revenue recorded at established rates and amounts realizable for services provided to specific individuals such as employees, medical staff, and clergy.

credibility. A measure of the statistical significance of a provider's own data, dependent on its stability and volume in relation to the stability and volume of the industry data. Actuaries use credibility to blend an estimate from a provider's own experience with a broader estimate based on the experience of similar institutions. A provider's own experience may be assigned a credibility weight less than 100 percent due to year-to-year volatility. Such volatility is often a function of the size of the provider. Large providers generally have less volatility than small providers. In such an instance, a broader and more stable body of experience of similar providers would be used to supplement the specific provider's experience.

credit enhancement. Typically, a bank letter of credit that guarantees investors will receive principal and interest in the event of an issuer default. A line of credit provides liquidity support to an issuer but does not provide a guarantee of the repayment of principal and interest in the event of issuer default. The liquidity support provides a loan to issuers in the event the issuer is unable to place large amounts of maturing commercial paper with investors.

crossover refunding (also called a *delayed defeasance*). A type of advance refunding in which the old debt is not immediately replaced. The proceeds from the new debt, additional cash deposits (if any), and the income earned on the related investments are sufficient to pay the principal and any call premium of the old debt and the interest on the new debt until the date of crossover. Until the crossover, the proceeds from the new debt serve as collateral for that debt. The old debt is serviced by the entity until the date of crossover, at which time the proceeds from the new debt are used to retire the old debt and the entity becomes obligated to service the new debt. The old debt remains as a liability on the issuer's books until the crossover, when it is called in accordance with the call provisions of its indenture.

deductions from revenue. Reductions in gross revenue arising from contractual adjustments, courtesy and policy discounts, or other adjustments and deductions.

defeasance. Legal satisfaction of refunded debt without the debt necessarily being retired.

development factor. A computed factor used to project future changes in estimated losses from the date of the occurrence of the incident to the date-of-claim payment resulting from inflation, claimed cost growth, industry trends, and court awards. The development factor can be applied to incurred losses, paid losses, claim counts, and average values.

diagnosis-related group (DRG). A patient classification scheme that categorizes patients who are related medically with respect to primary and secondary diagnosis, age, or complications.

donor-imposed condition. A donor stipulation that specifies a future and uncertain event whose occurrence or failure to occur gives the promisor a right of return of the assets it has transferred or releases the promisor from its obligation to transfer its assets.

donor-imposed restriction. A donor stipulation that specifies the use for a contributed asset that is more specific than broad limits resulting from the nature of the organization, the environment in which it operates, and the purposes specified in its articles of incorporation or bylaws of comparable documents for an unincorporated association. A restriction on an organization's use of the asset contributed may be temporary or permanent.

endowment fund. An established fund of cash, securities, or other assets used to provide income for the maintenance of a not-for-profit organization. The use of the assets of the fund may be permanently restricted, temporarily restricted, or unrestricted. Endowment funds generally are established by donor-restricted gifts and bequests to provide a permanent endowment (to provide a permanent source of income) or a term endowment (to provide income for a specific period). The principal of a permanent endowment must be maintained permanently, that is, not used up, expended, or otherwise exhausted—and is classified as permanently restricted net assets. The principal of a term endowment must be maintained for a specified term and is classified as temporarily restricted net assets. An organization's governing board may earmark a portion of its unrestricted net assets as a board-designated endowment (sometimes called *funds functioning as endowment* or *quasi-endowment funds*) to be invested to provide income for a long but unspecified period. The principal of a board-designated endowment, which results from an internal designation, is not donor restricted and is classified as unrestricted net assets.

enrollee. An individual who is a subscriber or an eligible dependent of a subscriber in a prepaid health care plan.

estimated costs of future services. Amounts that are expected to be incurred to provide services and the use of facilities to individuals over their remaining lives under continuing-care contracts. Examples include resident care, dietary, health care, facility, general and administrative, interest, depreciation, and amortization costs.

exposure. The amount of potential claim risk. The basis for reflecting differences in the claim potential among providers' bases for charging insurance premiums or allocating member contributions to a captive. Exposure bases for hospital professional liability include number of occupied beds, outpatient visits, emergency room visits, and number of residents by specialty.

floating rate note (FRN). A debt instrument that allows issuers to borrow at a floating short-term rate with a long-term stated maturity without some of the risks traditionally associated with commercial paper. The investor is subject to principal risk to the degree the issuer's credit deteriorates or investor demand for FRNs decreases. Most health care issuers of FRNs require credit enhancement and a bank liquidity facility in conjunction with an FRN program.

functional classification. A method of grouping expenses according to the purpose for which costs are incurred. The primary functional classifications are program services and supporting activities.

fund. A self-contained accounting entity set up to account for a specific activity or project.

gross service revenues. All revenues from the provision of health care services excluding charity care.

health care services. Services provided to individuals related to the diagnosis or treatment of physical or mental illness.

health maintenance organization (HMO). A generic group of medical care entities organized to provide defined health care services to members in return for fixed, periodic premiums (usually paid monthly) that are paid in advance.

home health agency. An agency organized to provide health and supportive services in a person's home. These services may include nursing, nutritional, and therapeutic aid (such as physical therapy and dialysis) and the rental, as well as sale of medical equipment.

increased limit factor. The relationship between losses limited to a per-occurrence limit at which the provider's own experience is meaningful to losses limited to the provider's total retained limit per occurrence.

incremental costs. Costs that vary with and are directly attributable to changes in business, such as an additional employer or HMO contract. Fixed costs such as building depreciation or general overhead that do not change with the addition or loss of a contract are not incremental costs.

incurred but not reported (IBNR) costs. Costs associated with health care services incurred during a financial reporting period but not reported to the health care organization until after the financial reporting date.

indenture. An agreement between two or more persons specifying the reciprocal rights and duties of the parties under a contract (such as a lease, mortgage, or contract between bondholders and the issuer of the bond).

individual practice association (IPA). A partnership, association, corporation, or other legal entity organized to provide or arrange for the delivery of health care services to members of a prepaid health care plan and nonmember patients. In return, the IPA receives either a capitation fee or a specified fee for services rendered.

inpatient. Under most circumstances, a patient who is provided with room, board, and general nursing service and is expected to remain in the health care facility at least overnight and occupy a bed.

in-substance defeasance. A form of advance refunding in which the debtor places into an irrevocable trust an amount of assets estimated to be sufficient to satisfy all future principal and interest payments of a specific obligation. In such cases, the debt is not considered extinguished because the debtor is not legally released from being the primary obligor. (Corresponds with the effective date of FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, as amended by FASB Statement No. 127, *Deferral of the Effective Date of Certain Provisions of FASB Statement No. 125*.)

integrated delivery system. A provider or group of providers that is organized to deliver and finance acute and preventive health care services. An integrated delivery system generally will provide (or arrange to provide) a complete continuum of health care services (inpatient acute care, ambulatory care, outpatient surgery, home health care, including long-term care) to an enrolled population, generally for fixed prepaid fees called premiums.

interest rate swaps. An agreement to exchange interest payments without actually exchanging the underlying principal. The two parties each agree to make interest payments based on the calculation formula for the other's debt. Swaps can be used for a variety of purposes, such as to reduce the overall cost of borrowing, lock in forward rates, reduce interest rate risk, or adjust the ratio of variable and fixed-rate debt liabilities. Interest rate swaps do not change the amount or type of debt outstanding, but they do affect the issuer's debt portfolio and risk profile.

intermediate care facility (ICF). A facility that provides care to individuals whose mental or physical conditions require services that are above the level of room and board and that can be made available only through institutional facilities. The care provided at an ICF does not require hospitals or skilled nursing facilities.

maintenance costs. Costs associated with maintaining enrollment records and processing premium collections and payments.

margin for risk of adverse deviation. Actuarially determined estimate of the additional funding requirement to obtain a specific confidence level that losses will not exceed the amount paid into the self-insurance fund. Margins are determined using statistical simulation techniques.

medical group. An association of physicians and other licensed health care professionals organized on a group basis to practice medicine.

medium-term notes. An intermediate-term security offered on a continuous basis providing flexibility for an issuer to vary the amount of outstanding notes as its funding requirements change. The broad range of possible maturities enables an issuer to borrow at the most attractive yield at the time of each issuance. They can be issued domestically or abroad.

member. An individual who is enrolled as a subscriber or as an eligible dependent of a subscriber in a prepaid health care plan.

multiprovider captive. An insurance company owned by two or more health care organizations that underwrites malpractice insurance for its owners.

natural classification. A method of classifying expenditures according to the nature of the expense such as salaries and wages, employee benefits, supplies, and purchased services.

net advance refunding. A type of advance refunding in which the proceeds from the new debt, additional cash deposits (if any) and the income earned on the related investments are sufficient to pay the interest, principal, and call premium on the old debt. After the advance refunding, the old debt is serviced by the investments in trust and the new debt is serviced by the entity.

net service revenue. Gross service revenue less provisions for contractual adjustments with third-party payors.

nonfinancial assets. Nonmonetary assets such as inventories or property, plant, and equipment.

not-for-profit organization. An entity that possesses the following characteristics that distinguish it from a business enterprise: (a) contributions of significant amounts of resources from resource providers that do not expect commensurate or proportionate pecuniary return, (b) operating purposes other than to provide goods or services at a profit, and (c) absence of ownership interests like those of business enterprises. Not-for-profit organizations possess these characteristics in varying degrees.

nursing center. A facility that provides nursing care to residents with a variety of needs or medical conditions. A nursing center may be a component of a continuing care retirement community. (Also called a health center, skilled-nursing facility, intermediate-care facility, continuing-care facility, or basic-care home.)

occurrence-basis policy. A policy that covers claims resulting from incidents that occur during the policy term, regardless of when the claims are reported to the insurance carrier.

outliers. In referring to the Medicare Prospective Payment System, additional payments that are made for cases that either have unusually long lengths of stay or have charges in excess of the cost outlier threshold.

outpatient. A patient who is not confined overnight in a health care institution.

peer review organization (PRO). Under federal statutory provision, PROs are required in each state to monitor hospital activity under the prospective payment system. Each hospital must contract with a PRO, which will review (a) the validity of diagnostic information, which establishes the diagnosis-related group; (b) the appropriateness of admissions; (c) the appropriateness of care to outliers; and (d) the adequacy of care provided.

periodic fees. Amounts paid to a continuing care retirement community by a resident at periodic intervals for continuing-care services. Such fees may be fixed or adjustable. (Also called *maintenance fees* or *monthly fees*.)

periodic interim payment (PIP). A plan under which the health care organization receives cash payments from a third-party payor (usually Medicare) in constant amounts periodically.

permanent restriction. A donor-imposed restriction that stipulates that resources be maintained permanently but permits the organization to use up or expend part or all of the income (or other economic benefits) derived from the donated assets.

permanently restricted net assets. The part of the net assets of a not-for-profit organization resulting from (a) contributions and other inflows of assets whose use by the organization is limited by donor-imposed stipulations that neither expire by the passage of time nor can be fulfilled or otherwise removed by the actions of the organization, (b) other asset enhancements and diminishments subject to the same kind of stipulations, and (c) reclassification from (or to) other classes of net assets as a consequence of donor-imposed stipulations.

premium. The consideration paid for providing contract coverage. (Also called a *subscriber fee*.)

premium period. The period to which a premium payment applies (generally one month) that entitles a member to health care services according to the contract provisions.

prepaid health care plan. A plan in which the provider is compensated in advance by the sponsoring organization. The sponsoring organization pays or compensates the provider based on either a fixed sum or a per-enrollee amount. Prepaid health care plans include health maintenance organizations, preferred provider organizations, eye care plans, dental care plans, and similar plans. Under such plans, the financial risk of delivering the health care is transferred to the provider of services.

prepaid health care services. Any form of health care service provided to a member in exchange for a scheduled payment (or payments) established before care is provided, regardless of the level of service subsequently provided.

prevailing charge. A charge that falls within the range of charges most frequently used in a locality for a particular service or procedure.

primary care. Care that is rendered in an ambulatory fashion, such as in an emergency room, an outpatient clinic, or other outpatient department.

prospective payment system (PPS). Medicare payment made at a predetermined, specific rate for each Medicare discharge, based on the patient's diagnosis. Each discharge is classified according to a series of diagnosis-related groups. (See also *diagnosis-related group*.)

provider. A person or entity that undertakes to provide health care services.

providers of prepaid health care services (prepaid health care providers). Organizations that provide or arrange for the delivery of health care services in accordance with the terms and provisions of a prepaid health care plan. Providers assume the financial risk of the cost of delivering health care services in excess of preestablished fixed premiums. However, some or all of the financial risk may be contractually transferred to other providers (affiliated entities) or by purchasing stop-loss insurance. Other providers of prepaid health care services may include comprehensive medical plans, physicians groups (for example, independent practice associations), and hospitals.

refundable advance fees. The portion of an advance fee that is payable to a resident of a continuing care retirement community or the resident's estate.

refunded debt. Debt for which payment at a specified future date has been provided by the issuance of refunding debt.

- refunding debt.** Debt issued to provide funds to pay for refunded debt at a specified future date.
- reported incident.** An occurrence identified by a health care organization as one in which improper professional service may be alleged at a future time that would result in a malpractice claim.
- retrospectively rated insurance policy.** An insurance policy with a premium that is adjustable based on the experience of the insured health care organization or group of health care organizations during the policy term.
- risk contract.** A contract between a provider of health care services and a prepaid health care plan that exposes the provider to the uncertainty of financial gain or loss by obligating the provider to provide specified health care services to enrollees of the plan for a negotiated price, which may be an amount per case, service, or day. The price may vary based on the volume of services furnished during the contract period.
- secondary care.** Care that is rendered to inpatients in hospitals that offer short-term, acute-care services of either a general or a specialized nature.
- self-insurance.** That portion of risk or loss assumed by a health care organization. There is no external insurance coverage.
- skilled nursing facilities (SNF).** These facilities provide services on a daily, inpatient basis. The services provided by an SNF are ordered by a physician and require the skilled services of technical or professional personnel.
- stop-loss (or reinsurance) insurance.** A contract in which a company agrees to indemnify providers for certain health care costs incurred by members.
- subscriber.** The person who is responsible for the payment of premiums or whose employment is the basis for eligibility for membership in a prepaid health care plan.
- tail coverage.** Insurance designed to cover malpractice claims incurred before, but reported after, cancellation or expiration of a claims-made insurance policy.
- taxable variable rate demand notes.** Issuers may call the notes on any monthly interest payment date, which provides issuers the opportunity to refinance short-term obligations with long-term bonds if market conditions make this alternative attractive.
- temporarily restricted net assets.** The part of the net assets of a not-for-profit organization resulting (a) from contributions and other inflows of assets whose use by the organization is limited by donor-imposed stipulations that either expire with the passage of time or can be fulfilled and removed by actions of the organization pursuant to those stipulations, (b) from other asset enhancements and diminishments subject to the same kinds of stipulations, or (c) from reclassification to (or from) other classes of net assets as a consequence of donor-imposed stipulations, their expiration by passage of time, or their fulfillment and removal by actions of the organization pursuant to those stipulations.
- tertiary care.** Care that is rendered in hospitals that possess the personnel, equipment, and expertise to handle complex cases.

third-party payor. Any agency (such as Blue Cross, Medicare, or commercial insurance companies) that contracts with health care organizations and patients to pay for the care of covered patients.

trend factor. A factor used in actuarial methodology to adjust ultimate losses from historical experience periods to the loss cost levels of the projection period, due to the impact of economic, jurisdictional, and social changes affecting hospital professional liability loss costs.

trust fund. A fund established with an outside entity to be used for a specific purpose, such as to pay malpractice claims and related expenses as they arise.

ultimate cost. Total claims payments, including costs associated with litigating or settling claims.

unasserted claim. A medical malpractice claim that has not been asserted formally against a health care provider by or on behalf of a patient alleging improper professional service. It may relate to either reported incidents or to unreported incidents.

unreported incident. An occurrence in which improper professional service may have been administered by a health care provider, which may result in a malpractice claim of which the provider is not yet aware.

unrestricted net assets. The part of net assets of a not-for-profit organization that is neither permanently restricted nor temporarily restricted by donor-imposed stipulations.

voluntary health and welfare organizations. Organizations formed for the purpose of performing voluntary services for various segments of society. They are tax-exempt (organized for the benefit of the public), supported by the public, and operated on a not-for-profit basis. Most voluntary health and welfare organizations concentrate their efforts and expend their resources in an attempt to solve health and welfare problems of society and, in many cases, those of specific individuals. As a group, voluntary health and welfare organizations include not-for-profit organizations that derive their revenue primarily from voluntary contributions from the general public to be used for general or specific purposes connected with health, welfare, or community services.

wholly owned captive. An insurance company subsidiary of a health care organization that provides malpractice insurance primarily to its parent corporation.
